MURPHY PICKS MILE RACE.

Trainer Murphy announced yesterday that the Murray Mile Race entry for this year’s race to be run at 4:30 one mile on Saturday afternoon, would consist of four horses, and that this entry would be repeated in one year’s time. The race will be held in the same condition as last year’s race, and has an excellent chance of being the best race of the season.

Contrary to expectations it was decided that the Murray Mile Race entry should be made instead of a two-mile entry, and that the Murray Mile Race should be run for the same time. This decision was made after careful consideration of the track and the weather conditions.

Editor of The Pennsylvaniaian.

Dear Sir,—The newspapers and current periodicals are full of political, industrial and educational news from Turkey, Persia, Japan, Argentina, and Africa, and it occurs to me that some 1900 men might like to know of several openings for interns and teachers in the colleges and schools of those countries.

The Canton Christian College, China, wishes to receive teachers. The Treasur- er of the Faculty in a 1900 Pennsyl- vania man, C. N. L. Hall. The Secre- tary and Treasurer of the Board of Directors is a Pennsylvania man. Our own University Medical School in Cam- bridge is affiliated with the college.

Allahabad Christian College, India, needs two men, one to teach English and the other to teach philosophy.

Tabriz Memorial School, Persia, needs two men, one to teach English, the other to teach French.

Chungking, China, and Constantinople, seeks a man to teach commercial sub- jects. (Just the place for a Wharton School graduate.)

The Santiago Institute, Chile, needs two teachers, one of whom should be able to teach elementary commercial subjects. This is a Presbyterian school.

A nontaching teacher for St. John's College, Tokyo, a teacher of manual training for a school in the Philip- pines, and four teachers for Episcopal colleges in Shanghai, Wuchang and Rangpur, China, are needed.

The Shanghai Baptist College, China, wants a science teacher.

The Rochester University, China, wants a teacher of chemistry.

Omagle College, India, a Baptist in- stitution, wants a man to teach mathe- matics and physics. Three principals for high schools in India are required.

Two men who have taken advanced work along educational lines are needed for China and Arabia respect- ively.

In the Anglo-Chinese College at Shanghai a teacher of English, book- keeping, and the English Bible is needed.

There are a few of the calls that have come to my office for teachers.

Men of Christian character who can be of real help to the students find those positions highly satisfactory.

The term is in each case. From three to five years residence is re- quired. Various allowances for travel- ing expenses, board, etc., are made, in addition to salaries. I shall be glad to correspond with any man who wants further particulars.

Spring football practice began this week as both Yale said Cornell.

Soccer is to be introduced as a spring sport at the University of Wisconsin.

Eight members of the University of Chicago Glee Club "got the horn" when they attempted to sing at an amateur night at a city theatre.

It is possible that basketball will be discontinued at Harvard on account of the lack of interest shown in the sport by the student body in the past few years. The Manager and Captains are in favor of its continuation, and the final decision will be given by the Athletic Committee.

Cornell crews have been troubled lately by quantities of heavy bugs which float in the lake on which the practice is held, and many shells have been badly damaged. Last week the first Varsity four ran into a submerged log, which powdered a hole under the bow, and the boat all but sank before it could be brought to the boat.

Thompson and Sunday were once

the slabs of the time, yet the players

on the line of to-day can show even

rigger folding averages. Why?

You ask. Just compare the 11th season

with those of even ten years past.

Games are won on closer margins,

fewer hits and less errors. Better

fielding tells the story.

It isn't that the players themselves

are so much better than the old timers.

The real reason for the better base-

ball of to-day can be traced directly

to better fielding and more

grace.

The men on the mound and the men

in the outer gardens need to wear al-

most any old kind of glove, with very

little if any padding.

The mitts of
gloves were not molded, consequently

many a hot liter that to-day would be

coddled by a catcher in the old days

would have reached the batsman

unmuffled, and the bases safely

reached by the basemen.

Interest in the matter led to its

further into the question of mitts and

gloves as used by the big teams of the

present.

Almost without exception we

find the World's Champions, the Na-

tional and American League teams, the

minor leagues, semi-professional

colleges and a matter millions all using

mitts and gloves made by the A. J.

Reach Company of Philadelphia. The

name tells much. For Mr. Reach him-

self was one of the famous second

basemen of his day, and so knows

what is required in the shape of mitts

and gloves.

It takes a player to fill a player's wants

and Mr. Reach has certainly

solved the mitt and glove problem for

the baseball player.

The demand for such a variety of

mitts and gloves, in all styles and

shapes, in different materials and in

different prices to meet varied re-

quirements, has resulted in making the

Reach lines the standard of the world.

Care in making it a watchword in

the Reach factories. Every mitt and

glove must be just right, the hollow

should be in the palm and just right,

for every Reach Mitt and Glove is fully

guaranteed to give satisfaction.

It's safe to say that Reach mitts, and gloves

are the best in the world. The making

of them is one of the oldest crafts

known to man.
