The University Aeronope Society, although not yet a month old, has made a great deal of progress toward permanent organization. No section of officers has been held at yei, nor has any concerted action been taken in regard to securing apparatus or headquarters. On Friday night Class C. Willard has consented to address the students interested, at the football mass-meeting. Mr. Willard has promised to cooperate with the student body in the formation of a society for the scientific study of aviation.

A committee representing the society has been sent to examine flights at Pottstown yesterday afternoon. Mr. Willard made four successful flights, the first ever seen in Philadelphia. In an interview immediately afterward, Mr. W isard promised to speak at the football mass-meeting in the near future. Birost does not accept his challenges for any flight at this time. Mr. W isard holds the American record for cross-country flights, having flown twelve miles. Birost has not the slightest thought that Willard will compete with him for the record. The first meeting and call for members of the society was made at the University Settlement as soon as the successful flight was seen. It is well known that there are few persons so interested in the society as is Professor Provoost Smith has reported that the society has formed the formation of an organization.

CROSS COUNTRY SCHEDULE

Two Dual Meets for "Varsity-Four Races for Freshmen.

Dual "Varsity-Cross-Country meets are pending with Haverford and Columbia. The University has selected a team of runners from Central High School, South- east Manual, Central Manual and the University. The contest can be arranged, this will be one of the best meets in the country in five years. Five men are trying for the team, and the one which has not been chosen will refuse to give them numbers. Probably he may cancel the meets which have been arranged so far.

The management has planned a series of three handicap runs to be held during the fall, but they will probably be called off, owing to the large schedule.

The management of the Massachusetts Institute of Technology has formally accepted the invitation of the Intercollegiate Association of Athletes of America to hold its track meets at the Massachusetts Institute of Technology on November 15. The meeting will be at Harvard Stadium.

Wants More Fresh Swimmers.

Just as you ask to be forgiven your neglectful, he has failed. There must be an effort to improve his habits of industry. Idleness is prohibited. Whenever a man has done his day's work diligently, he should do just as he can, he has lived a good life for that day. He has been idle, dilly-dally, neglected, he has been idle.

To do one's work, perform one's duties, prove oneself to be a "useful" man. A "useful" man is a man who holds a religious belief, cannot doubt but that the God and Father of our Lord Jesus Christ, if he seeks them in the right way. One does not have to be a fanatic, "chiseled religious" or a "re- 

A sermon on the subject was given by Mr. Harlan. The subject was "Justice and Forgiveness." The speaker urged the importance of justice and forgiveness in our daily lives. He also spoke on the importance of living a good life. The sermon concluded with a prayer for the audience.
Entrance Friday night is the eve of ending Pennsylvania's name on the banner. The coaches want to see it. The spirit of the entire University should show the team this. Friday night is the time to do so.

Fifty men were in attendance at the chapel services yesterday morning. We hope to report an increase in tomorrow's issue on this basis. We believe in the men who are doing this work. We must please you.

The following committee has been appointed by President Watts of the Junior Class, to confer with Dr. F. A. Chittick on the matter of debate between the Junior and Senior classes.

W. Plunck  W. H. Kiesewetter  and E. P. O'Donnell.

The Pennsylvania desires to secure the following crop of last year's paper:

November 6th, 9th, November 10th, December 22nd, January 1st, February 9th, February 10th, February 11th, February 12th, March 1st, March 2nd, March 11th, April 8th, April 9th.

President O. R. Pearson, of the Rifle Club, announces that a Rifle Shoot will be held this afternoon at the First Regiment Rifle Range at Easton. The following men will take the range:

MEDICAL SCHOOL PROSPERS

Slight Decrease in Enrollment Due to Higher Requirements—112 Freshmen Registered.

The Medical School has already an enrollment of 507 students—this year's Freshman class numbering 112. There is a slight decrease over last year, in the number of the entering class, owing to the advanced entrance requirements.

The Faculty now demand a year of college work, including preparation in General Biology or Zoology, Physics and Chemistry, for entrance. Next year they will require two years of collegiate work, with the same special subjects being insisted upon.

Dr. Allen J. Smith, the new Dean of the Medical School, when interviewed on the subject said:

"At the Medical School, owing to the addition of a full collegiate year's work in preparation, it is expected that the Fall of this year will also be true, as at that time the entrance requirements will demand two years of collegiate study."

"It is believed in the years after 1910 the numbers in the entering classes will gradually increase and return to the size to which the University has been accustomed. There is no question but that there is an effort on the part of the schools throughout the country to meet the new requirements. This is shown by the decrease in the number of conditions enforced against the numbers of this year's entering class."

"The extent of the conditions imposed on the average conditioned student is materially less than last year. In addition to this, the advancement in requirements seems to be appreciated by the friends of higher education in that there is a proportionately higher number of college graduates in this year's Freshman class than in preceding ones."

"Following last year's increase in admission requirements it was noticed by the officers of the school that there was a decided drop in the number of failures in class. Attention is being directed as to whether this year, with a further increase, there will be a further diminution in the number of failures. Should this prove true, it seems fair to attribute it to the fact that the University is admitting a higher grade of medical student, a state of affairs we have been looking forward to as justifying the imposition of the new requirements."

Informal exercises in the presentation of a bronze medallion, which has been given to the Medical School by Mr. John Doran, will be held at 2 P.M., on November 4. It was presented to commemorate the daring attempt on the part of the schools throughout the country to meet the new requirements.
