LIVELY WORK IN BASKETBALL

Freshmen Clash with Varsity—Marks Will Play Against Gettysburg—Contract Awarded for Raised Batta.

After the long lay-off, basketball practice was resumed in the gymnasium yesterday afternoon, Coach Keith playing the freshmen against the Varsity in two thirty-minute scrimmage.

Although the first year men exhibited good form, they were unable to cope with the Varsity, who defeated them by the score of 37 to 18. With a similar game Friday night the squad will be in good condition to meet the winner from Gettysburg on Saturday. Marks' injured ankle is in fair shape and is expected to take part in the big game. Kennedy's splinted elbow is more serious than was at first thought, and an operation will soon be performed to remove a piece of the bone.

A contract was awarded yesterday whereby the miners raised seats for the exams and will in all probability be used for the Yale game, on the 22d.

Yesterday's line-up follows:

Freshmen, left to right—Baker, Baker, Boutin, Baker.

Vestiges of "cramming," subjects which mean to them mere night work, They come in and start, not with the object of making up their work, but with the intention of stealing away when the hour is 7.30 o'clock, in Room 21, Houston Hall.

The Friends of our College Day.

Two days ago the President of the University, Mr. Herter, spoke before the students urging them to make up the world. We must consider the necessary evil, and we must put up with things as they are.

This is their only excuse for existence. They are of no practical value, to make up the world. We must consider the conditions, just as it takes all sorts of mares of "cramming," subjects which mean to them mere night work, They come in and start, not with the object of making up their work, but with the intention of stealing away when the hour is 7.30 o'clock, in Room 21, Houston Hall.

“SENECUS” GIVES VENT

Has a Word or Two to Say Regarding the Wearing of Head Protection of Ye Students.

Dear Pennsylvania.

I am writing you a note, with a note, regarding the bond which bears forth every Monday morning in your account for bond paper. This week it bears the bond of the desert and wonders why the historic headpiece has become defunct. Indeed, he must be far removed from the whirl and swift of this great world. What an age we do enjoy and how great the progress of our times! Wireless telegraphy and aeroplanes are mere incitements in our midst, and yet this creation of mandam asks for a prayer in remembrance of the dead headpiece.

It is a prepost eros and perverted presumption for any man soul to live in our midst without showing gladly how victorious and triumphant he has been in his glorious college career. To God, to think that there is any one who can actually decay the wearing of noble emblems. To question the right and advisability of flagrantly decourning the campus and buildings with them is absolutely absurd. Is not man judged by his outward appearance and the soundness he displays are a mark of distinction which holds him aloft from his mates. Oh, that divine sphere which he inhabits is an abode only for the immortals, so why not proudly advertise the success of your diplomacy and tact.

Furthermore, life would seem calm and uninvolved with no hatred-mingled and death-dealing visage looking you in the face. Indeed, such things hold us in complete awe and we bow in humble respect to those almighty beings. Do they not inspire us with nobler and better thoughts to do the things we ought to do?

Then, again, are they not worthy and worthy protection for many a reason? Do not their hide the hollownesses of the brain, from public cases? Oh, sweet hat, blessed be thy existence for such service, and won to him who curst thee.

**MEETING OF AERO CLUB**

Invite All Students to Join—Work on Aeroplane Progressing Rapidly.

Further developments and more systematic organization, with definite plans for putting on an Easter flight were the chief features of a special meeting of the University Aero Club, held yesterday afternoon. It was reported that work on the first machine is progressing rapidly, with the framework nearly completed. 10% will be started on the wings early next week and coated with a special preparation to be supplied by the holder of the patent for the mixture.

A large number of new members were present at yesterday's meeting. The business transactions were of interest to all students of the University, even if only slightly interested in aviation. It was decided that from the time the body is finished, without unessential or useless devices to become members of the club may do so for five dollars, before which time the present fee in two dollars, covering the annual dues. The time for regular meetings was set for Monday afternoon at 11:15 P.M. So far meetings have been held but once every two weeks.

The Aero Club offers a great opportunity to any amateur, not only in theory but in actual construction. Members may assist in building, can obtain blueprints of various machines, and every opportunity will be offered them to fly. The latest books and bulletins of the subject are in access of members.

At the present stage of progress the aeroplane should be completed, with the exception of the installation of the Hankey engine, in two weeks. The new gilder is still at the grounds of the Philadelphia Country Club, awaiting transportation to Honest Hall, where it will be on exhibition.
