WRESTLING TEAM CHosen

AMBITIONS VIA WIRELESS

Pennsylvania Plans to Organize Intercollegiate Association in the Interests of Wave Telegraphy.

For the better organization of college teams to meet in one on one tournaments, which will be held in Philadelphia, on the 11th of July, it has been decided upon that the Pennsylvania Association will take the initiative and request that all the colleges and universitites in the United States engage in a meeting which has been called for 9th, at 2 o'clock, in Houston Hall.

The club hopes that at that time to organize an Intercollegiate Wireless Association, and to perfect its work as well as to facilitate original research. It is proposed to offer cups and medals to those clubs who in any way contribute to the efficiency of wireless as a sport. Three or four clubs have already been invited to attend the meeting, and the club hopes to include all those colleges or universities which have already made notification of their intention or who have not a wireless club but are now organizing one in the future. It is planned to have several of these societies meet and confere.

Several universities have already signed their approval, as well as many private agencies, but as the association is to be purely intercollegiate and national in scope, this is not surprising.

The determination to protest against Government regulation originated in the bill now before Congress which provides that all wireless clubs be restricted from having any apparatus or apparatus over ten miles. It is estimated that there are now over forty and more than four hundred of these amateur plants, many of which are equal to 300-1200 volunteer service stations. The Government committee are working on a oase when their instructions are working off official messages by several hours, as well as between Philadelphia and New York, which often depend upon the naval signal service. This committee are working at an oent attempt at regulation is directly attributed to indirect assistance of amateur stations, and wherever they appear requests in "out on" with the "out on" service. It will be heard in Congress what the course is.

Governor Ridgway, of the Wireless Club at present busy lovely engaged in wiring the Houston Hall apparatus for an alternating instead of a direct current, as it is believed that the former power will enable them to transmit messages to a greater distance than under their previous system.

EMPIRE STATE CLUB MEETS.

Address by Bursa W. Miller, After Luncheon. At an informal meeting of the Empire State Club last night, the members had the pleasure of hearing Mr. Miller, who has been in connection with the wireless apparatus for a fortnight, and who has worked himself up from an illiterate position in wireless work, speak on the subject of wireless apparatus, and who became a member of the State club.

The object of Mr. Miller's talk was to bring out the fact that wireless apparatus, which, he stated, should be the essential qualities of all wireless apparatus.

After the address refractions were served.

DARTMOUTH TEAM ENTERED

WILL HAVE ONE AND FOUR-MILE RELAY TEAMS HERE ON APRIL 20—STRONG IN THE OTHER EVENTS.

Dartmouth College is coming down to the Relays at Princeton, to be held on April 20, in full force. Harry Hillard, their new trainer, has erected a lot of enthusiasm, and a large squad are working steadily. The hopes bring to Philadelphia not only one mile team, but also a four-mile team. The saved of the last week is a popular assumption, and a business like it would be a good team. The star of this is Pahler, who tied with Harvard, and Concord, of Yale, for the high jump honors, at 5 feet 14 inches. It is expected that all of these men will be in this event on Relay day, as they will then be able to decide the question of superiority. Should Bur- dink of Pennsylvania, return the former has been shown regularly, he will probably defeat them all. In both the four miles it was not given to the mile minds.

Sherrman will represent Dartmouth in the sprit, Holdman in the pole vault, at which he has done 12 feet, O'Leary in the hurdles, and their new man, Tilley, in the butter throw. The latter has already shown weight to 160 feet in practice, and Hilliard is rather favoring him for this event, though nobody would think of meeting the Intercollegiate champion. Tabor, formerly of Cornell, but now of State College.

SOCCER TEAM MEET YALE.

Practise Begins to Remedy Defects Shown in P. & R. Game.

With the score of Saturday's Columbia-Haverford game, in which Col- umbia was defeated by a score of 5 to 1, as to comparisons to Pennsylvania's recent 10 defeat at the hands of Har- vard, claiming three in a row, the university soccer team is determined to make good as a sharp nearing Sat- urday, when the Red and Green meet Yale at New Haven. The defeat of Pennsylvania to the P. & R. Game was largely due to the fact that Penna.-state did not have the same excellent players in their team, but it served them up to their fans, that they were not doing any good in contemplation. Practise will he held this week in endeavor to get the players to perform.

While in the comparatively Haverford menses Columbia seems to seek better than Pennsylvania at the present moment, the result of the Columbia game will go long way toward establish Pennsylvania's standing in the Intercollegiate League. This game will be played at New Haven, and will be fiercely contested, as Yale, Colum- bia, and Pennsylvania are all vying for first place in the Intercollegiate contest.

Bowling Progressing.

Bowling is going on in full swing on the Houston Club alleys, and the team standing are close. The Freshman team has 700 points, and the Freshman team is 1100 points. The Architecture Department is the Cumbman and Combined Vets are tied fifth 748 points. Third comes the Combined Club team, with 768 points. The Nova Scotia team, the Combined teams, with 246 points. The following is this week's order.

Thursday, March 17. Combined En- glisers vs. 1913 Medics.
Friday, March 18. 1012 Dentals vs. Combined Scullers.
Saturday, March 19. 1913 Vets. vs. Combined Vets.

"FRANKLIN" ARRIVES

Coach Ward is able to watch Gars- men's form from Lauch, and All Ten Crews Now Four Miles.

At last the coaching launch 'Frank- lin" returned from his winter cruise to the Bath House, and yesterday afternoon, for the first time in four or five weeks, brought on the Darby River, the "Franklin," with her new boat, showed considerable speed, and it is expected that she will no longer have any trouble in keeping up with the racing crews.

The ship is now anchored, the canoe-pawl pushed down, and the men had no difficulty in handling the boat. The water was very low, the current was strong, and the weather was rather cool, but there was little could be anticipated of the new candidate's ability as waterman. So good has not been shown that he could not out, "terpnickels," and the men have no reason to believe they will be rowing in hawks.

Of the two "Franklin" com- binations continued to row in shells, the number of components was very small, and a few people in "setting up" the boat and steering it. As yet none of the crews have raced, but now, as the weather is much cooler, and with the now, undoubtedly some more crews will be held before the race is in its final form.

This race the American Handicap regatta, and the first of the following Monday the Junior "Var- tiva" races will take place. The "Fran- klin's" Junior combination, which, al- though a good deal faster than all that has raced as the Freshman crew last spring, always will be considered a speed. As these two races come so close one another, it is probable that Pennsylvania's second varsity will be entered in the Halley. The Freshman crew will be entered, and possibly an "octopede." This race the Pennsylvania regatta is on June 19.

There has been some talk of a "Var- tiva" regatta, but the plan is for the Naval Academy. The "Vartiva's" plan is to have the regatta in the same time, as they have as many races in May as Philadelphia has in April, but the Pennsyl- vania management, however, will not take part in a regatta this spring, as they have already started working on the boats the seniors. It is very probable that Georgetown University will take part, and that Pennsylvania will have their crew in May.

Punch Bowl Among Us Again.

Endeavors to Play "Humpty Dumpty" In- stead of "Punch Number.

Punch Bowl has again made its ap- pearance, this last effort being labeled "Humpty Dumpty," which seems to yield its consummate nerve in claim upon but a hastily written edi- tional. As far as it goes, nothing could be better. As far as it goes, nothing could be called the other publications of the University have any, as they seem to have no merit but that of filling space. They are funny and the jokes are not too good, and the writing is bad, and the poems, but by far the leading- lance of the enormous heaps of ex- cessively spitting, and those who are whole, the March number is the best of the four numbers so far published.

Senior banquet tickets may be had in the Hayloft, and those who are unable to come on, remember you have your class spirit and make it a great success.
AERO SHOW TO BE HELD.

Model Contest to Be Feature of Exhibition During Easter Week.

The Aero Club, now became one of the most active clubs in the University, is planning to hold an Aero Show during Easter Week. In connection with the show, a Model Contest has been arranged. This contest is open to all, from grammar schools, second, students in high schools, prep. and normal schools, third, college students and amateurs. A cup is to be presented as first prize to each class, and there will also be suitable second and third prizes.

The models must be submitted on before March 28, at noon. A generous range in choice of models is allowed, but there may be copies of models now in use, as well as original models, that can represent aerodynamic designs. There will be judged on the points of general make-up, workmanship, originality in design, flying and gliding qualities.

COLLEGIATE SUPPLIES

Investigation by Forest Service
Seeking New Pencil Woods.
Supply Surveying.

Recent conference of representatives of the Department of Agriculture with several lead-pencil manufacturers has revealed a need for trees for rearing new woods to find out whether they can be used in the pencil industry. According to some of the manufacturers, the supply of red cedar which furnishes practically all the raw material for the usual output of some $250,000,000 pencils, will be exhausted within five years. A substitute must be found which will whiten equally, which shall contain a large amount of mineral-free of knots, which shall not be porous, nor sappy, nor unduly hard, and which shall occur in sufficient quantities to meet the manufacturer's demands.

In view of this and the suggestion of the pencil makers, the Forest Service is to cooperate in a test of a number of National Forest woods. Among those to be tried are rock mountain red cedar, alligator juniper, western juniper, redwood, incense cedar, western ponderosa. Port Oxford cedar and Alaska cypress. Wood specimens collected from the National Forests will be sent to four leading manufacturers, who have agreed to make pencils of them. The manufacturers will keep a record of the tests and report to the Forest Service the results, as well as their judgment as to the fitness of the individual woods. The Forest Service is assisting in this experiment because there are on the National Forests large quantities of junipers and cedars which may be suitable for pencil manufacture. For several of these woods it is very valuable use has already been discovered. Foresters believe that in the future the woods from the National Forests may, to a considerable extent, come into use to supplement the diminishing stock of Eastern woods, the supply of which has received no protection.

NOTICES

Special Senior Class meeting to-day.
Soccer practice at 1 P. M., to-day.
H. M. Martin.

A meeting of the Maryland Club will be held tomorrow evening at 7.30 o'clock, in Houston Hall.

Important meeting of Sophomore Banquet Committee to-day, in Room 212, College Hall, at 1 P. M.

There will be a meeting of the Promenade Banquet Committee to-day at 1 P. M., in Room 202, College Hall.

Meeting of Senior Class Picture Committee to-morrow, in Room 202, College Hall. All members are requested to be present. W. B. Woodhouse, chairman.

The following men report for American water polo practice at 3 o'clock today: Peniston, Wright, Norton, Ransford, Schuman, Richelief, Black, Bloom, Reiners.

The Junior Class met, scheduled for to-day, has been postponed to allow the photograph to be taken. It will be held at 1 o'clock Wednesday, in Room 202, College Hall. W. S. Watts, Jr., President.

Yokers to Smoke at Home.

Last evening the Finance Committee of the York College Club met in Franklin University to lay plans for the Easter holiday, when they intend to hold a smoker. A. J. Reckner, chairman, is the new chairman. Or, they will be held by some high school seniors to be joined in their societies and will be held on Friday, April 19th.

Civil Engineer's Smoker.

Preparations are being completed for the Civil Engineering Society smoker, which will be held at the Engineering Building next Friday. Extraordinary efforts are being made to ensure success. Tickets, admitting one person, may be had from any member of the committee.

CHINESE ECONOMIC CLUB MEETS.

Members Discuss Home Economic and Social Problems.

Home economic and social problems furnished topics of lively and timely discussion at the tri-weekly meeting of the Chinese Student Economic Club of Pennsylvania, held last evening in the third floor of the University Building.

Three carefully prepared and instructive papers were read by the following members:

Mr. Chen, on "The Agriculture of China";
Mr. K. A. Yang, on "China's Early Commercial Relations with England at the Port of Canton";
Mr. C. K. Tsao, on "The Waterways of China."".

These papers, which contain valuable information and represent thoughtful research work, will appear in the "Chinese Students Monthly," published by the Chinese Students Alliance, during the collegiate year. "What China's Foreign Policy Should Be," a talk delivered by Dr. C. L. Jones, of the Wharton School, at the manufacturer's dinner to the club, will also be translated into Chinese and sent in Chinese newspapers for publication.

A free discussion among the members followed, after which refreshments were served.
