NECESSITY OF EXERCISE

Dr. R. Tait McKenzie Emphasizes Need of Early Physical Training in Letter Last Night.

Dr. R. Tait McKenzie made clear the necessity for physical exercise at an early age. "Physical education is best when the child is young," he continued. "The younger the child, the better for him."

The physical training of the young is extremely important. The child's body is still developing, and regular exercise helps to build strong muscles and bones. McKenzie emphasized the importance of starting physical education early in life.

Dr. McKenzie also discussed the benefits of exercise for children. He mentioned that exercise helps to improve mental health and concentration. "Learning is easier when the body is healthy," he said.

Dr. McKenzie's letter was an important reminder of the importance of physical education for children. It highlighted the need for early and regular exercise to promote healthy growth and development.

The Rev. Charles Stelzle, of the Labor Temple, at New York City, is to be the speaker at the Sunday ser-
to-morrow morning. He will take
for his subject, "The Religion of the
Workingman." After the service
proper he will addresses the
"What the College Man Can Do to
Help build the Labor Temple of To-
day" to those students who desire to
receive.
Mr. Stelzle is a famous sociologist,
not only in this country, but abroad.
For many years he has devoted him-
self to studying labor conditions and
problems. As head of the Labor
Temple, he has come in personal touch
with the working classes and has be-
come acquainted with the labor lead-
ers as well as with the workers.
The early part of his life was spent
in machine shops, where his technical
training enabled him to get a position.
Here, as one of the men, he studied
actual conditions. In 1890 he was or-
dained a minister of the Presbyterian
Church.
Beside being a practical worker
of note, he is author of numerous
books and essays. Among his best-
known are, "Labour and Social
Problems," "Days of the Street,
How to Win a Letter from a Working
Man." In the current issue of the
"Outlook," he has an article on "Labor Unions" which has won many favorable comments from the press of
the country.

SOPHOMORE DEBATERS CHOOSE

Fourteen Candidates Report at Trials
 Held Yesterday.
It took an hour for the judges to de-
cide upon the first and second speakers for the
Freshman-Rhodogene debate at the trials held yesterday in College
Hall. Fifteen men reported for the
team, and each expounded weighty
arguments for four minutes, following
later with a two-minute rebuttal.
The question decided was that to
be argued at the coming interclass
debate, "Resolved: That labor unions
as they now exist are, on the whole,
harmful to society." When the last speaker has spoken his allotted six
minutes, the last speaker was Mr. O'Brien, of Mr. Mendenhall and Mr. Hall decided
that Sylvia Lang, Wharton; Robert
C. McKinnon, Arts; G. Ray Oliver, Arts, and
D. P. Samuel, Wharton, had shown the best advantage.
After the trials the team met and
elected Sylvia Lang captain.

NOTICES.

Important meeting of the Camera
Club, Room 3, Houston Hall, Monday
evening at 7. All those in the University having cameras are urged
to attend at this meeting. New
members will be taken in upon payment
of one dollar. Photo for intercolle-
geate exhibition will be discussed.
The following members of the "Var-
sity" team will report at the
Belmont Cricket Club, Philadelphia
minutes, Thursday morning, January
2. Those who wish to attend may
be directed to Mr. Stelzle for further
information.

Grand Orchestral Concert

Weightman Hall, Monday Evening, January 16, 1911
The Philadelphia Orchestra
CARL POHLIG, Director
Soloist THADDEUS RICH Violinist
The Philadelphia Orchestra, now in its Eleventh Season, the
Fourth under the baton of Carl Pohlig, is giving at the Academy
of Music, Philadelphia, a series of 23 Friday afternoon, and 25 Saturday
evening Concerts, which represent the most extraordinary range of
music and composers. The Programmes interpreted so far have been
hailed with the greatest enthusiasm by critic, journalist, and the
First Concert of the New Year at the University will be a musical
event of signal importance.

PROGRAM

1. G. A. Rossini . . . . Overture, "William Tell"
2. Ludwig von Beethoven Symphony No. 5. in C Minor. Op. 67
3. Henri Wieniawski Fantaisie, for Violin and Orchestra

THADDEUS RICH

W. S. JONES, Inc., 116 Walnut St.
CUSTOM-TAILORING ONLY

O

WE week ago to-day we started our semi-annual reduction sale!
To you this may mean little,
To those who know Jones' Custom Tailors—who realize the moderate
prices which always apply here—the fifteen per cent, dis-
count looks so big that the first day of the January sale becomes a sort of
New Year's reception to our customers.
Men who wear Jones' custom-tailored clothes, who know how abso-
lutely we guarantee every detail, who realize that the stocks
are replenished by the constant addition of new fabrics long after most
tailors have ceased their winter's buying—such men will realize the
opportunity as good as an offer of government bonds at a discount.
They come instantly, look over the suits, note the price on the tag
attached to each suit of cloth—make their selection and deduct their
own discounts, if they wish.
It will put the man who wants to get acquainted with good tailoring,
to do likewise. He will be able to start as low as $35.50 for our regular
$50 suits; or run as high as $59.50 for our handsome $75 custom-made
Montgomery overcoat.

As always—we are glad to give samples: we welcome comparison.

Winter Reduction
SACK SUITS $30.00 and $35.00 reduced to $25.00
Made and trimmed to your satisfaction, with satisfactory fitting
garments.
DRESS SUITS $40.00 to $65.00

SAVIN & MCKINNEY
1229 Walnut Street.
Philadelphia

Full Dress Suits

The making of Full-dress Suits is an important
part of our business because it means as if every
customer we have places an order with us.
This condition is due to our success in the $1
in the finish of the garments and the moderate
price. We make a fine line of Suits at $49
and one at $60 is also a leader.
Do not forget that this is no higher than a
ready-made suit, yet the latter will be outgrown in
a year perhaps, while ours will last five, owing
to the fact that, we provide large outside.
Which will you choose?
Perhaps you only need a coat? Or a white
vest? Of the latter, we show a hundred patterns
at 47 to $12.

PYLE, INNES & BARBERI
Full Dress Suits, $35 to $40.
DR. KENNELLY ON WIRELESS

Gives Practical Explanation of Its Workings Before Sigma Xi Society in Jarman Laboratory.

"Wireless telegraphy and telephone have completely fulfilled the prophecy made by St. John in the Book of Revelations, that there will be no more sea," declared Arthur Edward Kennelly, Professor of Electrical Engineering at Harvard, in his lecture on Wireless Telegraphy and Telephone as Compared with Wire Telegraphy and Telephone. Under the pieces of the Sigma Xi Society last night in the Jarman Laboratory. Before an audience which filled the large lecture-room of the laboratory, the lecture bore the employment of many diagrams and sketches, clearly explained the workings of the greatest of modern electrical sciences, the wireless telegraph and telephone.

"The elementary difference between wireless telegraphy and wire telegraphy is that in the former the electric waves travel in the shape of an arc, the electric force being at its maximum strength at the two bases and at its minimum at the top. In wire telegraphy, the waves are anchored, as it were, to the wire and thus are forced to move in a straight line, which gives them much greater strength for sending distance of 100 to 1000 miles."

"The electric waves, sent out from a wireless apparatus, have an action directly similar to that of waves made in a pool of still water into which a coin has been thrown. The waves travel in a widening circle, growing weaker as the circle enlarges."

With the exception of the two great Trans-Atlantic wireless stations which are able to transmit messages from North America to Ireland without a break, the sending distances of most stations is not far. Usually the range of a ship is 120 miles, but since the waves travel in the form of a circle, an operator is in reality sending messages over an area of 40,000 square miles. Wireless telegraphy is a great civilizer. No longer can the old idea of a man own the space between his land and another, for in the future conversations are being continually sent through the ether. All nations and people are being brought into closer relations by the means of this invention."

Picture of Varsity Letter Men. The list of those who won their "P" should meet in the gymnasium next Friday afternoon at 1:30 to hear a lecture on their picture taken for the 1915 Record. The men are to be dressed in the costume of the sport to which they have devoted their efforts. Anyone who fails to be present will not be able to take part in this year's book, as no additional photographs will be added.

Books—Covers Free. Medical, Electrical, Veterinary, Biological, for sale at Pennock's, 3009 Woodland Ave.
