Japanese Propaganda.

By Joseph A. Romer.

W HEN the question of Japanese propaganda in this country is raised, a
false impression is often created that Japan is making an effort to gain
favor and control the loyalty of the Chinese people in the United States.

This is a misconception. The real object of Japan is to gain an
understanding and friendship with the Chinese people through mutual
commerce, travel, and cultural contact. The Chinese people are not
being used as a tool for political purposes by Japan. The Chinese people
are not being used to advance Japanese interests in the United States.

The Chinese people are not being used to advance Japanese interests in
the United States. The Chinese people are being used as a force to
advance Japanese interests in the United States. The Chinese people

With the recognition by the Board of Directors of Athletic Association books which are so widely used by students, and the fact that these books are so frequently purchased by them, it is quite evident that the educational value of the books is appreciated by the students. It is for this reason that the Board of Directors of Athletic Association books has decided to publish these books in the future, and to give them the recognition they deserve.

After this work fifty men will be examined daily, and this branch of the ordination examination will complete its work probably by the first of November.
