"RECLAIMING THE MAIMED"
DR. M'KENZIE'S THEME

University's Physical Director Bases
Book on Experiences in War
Hospitals.

Dr. R. Tolst M'Kenzie's new book,
"Reclaiming the Maimed," has recently
come of the press. This remark-
able book is a technical treatise based
upon the modern science of "Physical
Therapy." Dr. M'Kenzie produced this
work by special authority of the Surgeon-General of the British
army. It is based on an experience
of over a year as medical officer and
inspector of institutions for the treat-
ment of convalescents in the British
army and in Canada.

The object of the book is, quoting
the publisher, "to rehabilitate and re-
turn to the battlefield many thou-
sands of men who previously con-
sidered as permanently disabled, as-
well as to restore to normal a para-
suita thousands of others." Not
only does Dr. M'Kenzie explain what
has been done, but he has originated
many new methods for the rehabilita-
ting of disabled soldiers and inter-
mental.

The text is profusely illustrated
with photographs of reeducating ap-
pliances and apparatus, the original
of which are familiar to many students
who happened to pass through the north end of the gymnasium building
last year, where they were stored. It
is interesting to note that Pennsyl-
va students have passed for many of
the photographs demonstrating the
area of the various appliances. The
new methods of treatment are now
actually being taught and practice-
ally applied in the hospitals of rehabili-
tation in Canada.

This work is not only for practical
use in war times, but able to restore
those crippled by accidents in indus-
trial plants. Although the hand-book
is intended for technical use, the vivid
descriptions of rehabilitation and the
clear explanations of the different
methods, together with the numerous
photographs, make the reading inter-
esting and easy. All of the processes
of treatment and materials are in-
stantly applicable for use by the medi-
cal man or nurse.

FRENCH CLUB ELECTS OFFICERS.

Society Plans to Continue All Work During Coming Year.

One of the active organizations on the campus to continue its activities during the present term is the La Cigale Franciscans. At a recent meeting it was the unanimous opinion of all the members that the work of the society be continued on without interruption, in view of the immense good done by it in past years in attaining an active interest in practical French among the students of the University. Carlo A. Parmilo, '38 C, was elected president for the coming year and Urban T. Holmes, '21 C, was made vice-president.

The first meeting of the French Club is planned for next Thursday night, and the officers wish to extend to all new students an invitation to attend. These meetings afford an excellent opportunity to develop conversational French, as all of the speeches are delivered in that language. One of the most important activities of the society is the presentation of an annual play, and it is present plan to give this as usual.
