The response that each call for men for an Officers' Training Camp has brought forth is evident that a large majority of the men now enrolled in the S. A. T. C. are making every effort to get into more active service. The reasons behind this attitude are, on the other hand, not as plain. It is impossible to answer this question adequately, and we are afraid that the outlook for leaving for camp or transferring to another service, they will be in a better position to offer the best that is in them to the government? It is this last reason—and only one of them—that should induce Pennsylvania men to apply for transfer to another camp. The University will not be found lacking in men inspired by this patriotic motive when the call for more men comes.
