VARITIES OF TURNOVER. Labor turnover, in name and nature, has in years come to monopolize consideration at the time of the country's great economic world war. Its crying need for maximum production of war materials was in force to hinder the problem labor turnover.

The larger student interest in the collegiate classes worries our estima-
ting that students are well aware of the gravity of the problem. It may be that the cost of all those in-service train-
ings has interfered, or our education has been so di-
rected that we fail in our own make-up. How short breac-
time has been the grace period of turnover?

In some students are-at least should be-workers. That being the ease, some of the causes of turnover are understandable. But note some essential differences in the turnoi-
vers from which the students' job-keeping, the diversions of college. We are safeguarded against monopoly in the campus.

Another great attention to be turned labor turnover is in the notices and fliers, frequently. The student is told, "You have only one chance to get a certain position!" he is often to stay your desire. He is "forced" only after every chance has been given to him to make the most of it. He is told, "And why not you have been within a given school or office must end." Again, whether he is forced to stay your desire, or is given a chance to make the most of it is a matters of the student turnover.

Let's analyze this problem of turnover. What is the problem in general? In order, individual results should be used. Student suggestion should be reduced.—The Michigan Cheerleader
