City School System Subject Of Lecture

Thomas E. Flegen, Head of Educational Work in Keystone State Will Speak Today

Following the plan of having one lecture each fortnight on some educational subject, the Education Club has arranged for a talk on "The Organization of a City school System" by Thomas E. Flegen, in Rittenhouse Hall at 4 o'clock this after-
noon. As has been the custom, the lec-
tures will be preceded by a short organ recital by Mr. Robert Lyle Thomas, Jr.,elt, having about twenty minutes.
Mr. Flegen is well qualified to speak on an educational subject, as he has outlined one of the foremost educators in the country. He was the first deputy commissioner of education of New York and performed most of the active duties of the Commissioner's office during that time.

The lecturer is at present, and has been for the last four years, Registrar outside of Education at the State of Pennsylvania. His term overlaps the present administration about six months and he has not been reappointed, but the consensus of opinion is that such a man is in only a matter of time, as he has gained the Keystone State in educational time to a place among the first five states of the Union.

Hockey Squad Holds Early Morning Practice at Arena

Coach Edward Powers sent the Un-
varsity hockey team through the first early morning practice yesterday at the Arena. The drill started at 7:30 and continued until 9 o'clock.
Since the large attendance at the Col-
ombia game last Monday evening made it certain that the team would be allowed to use the rink, the management granted the Red and Blue pack several more practices a week at the Arena and also the use of the rink for the home games.

Two of the practices will be held in the early evening according to the agreement while the remaining one will be staged before school in the normal time.

This evening at 6:15 the hockey squad holds its third and final practice of the week. The next game will be with the Swarthmore Hockey Club at the Arena on Wednesday while four days later Yale will be met at New Haven.

The Pennsylvania
OTHER QUALITY LIFE

Outsiders, knowing but little of fraternities, often erroneously characterize the fraternity as the typical ex-ample of the college lad. They see in the fraternity merely a social club, existing for the convenience and pleasure of its members. To outsiders, the fraternities in Pennsylvania may appear an impenetrable secret society. But to those who know us, the fraternity is a source of help, but not of kind which the fraternity really gives to its members.

When a man joins a fraternity he assumes a certain responsibility, for he becomes a member of a great organization which often extends throughout the length and breadth of the land. This organization has come into being because it offers a means of college life. Its members aim constantly to maintain in it this position, else the whole purpose is ruined. Each fraternity has different ideals as to its duty to the college which allows it to exist, and in consequence different courses are followed to fulfill this obligation.

On one point every fraternity is agreed—its members must be made to realize that the University comes first. When the freshman becomes a member of a fraternity, his "brother" seeks to interest him in the life of the University. He is compelled to keep up his scholastic standing and to engage in the activities of the campus. He is taught to respect the seniors and value their opinions—self-important freshmen are taught that "fraternity" will cause them trouble. And so, in various ways, the newcomer is taught to forget self and work for his University. Many a freshman is helped over the rough spots in his path by the encouragement and help of his new brothers. He has instilled within him a desire to stay in college and do great things for his Alma Mater.

The friendship that a man makes among his fraternity brothers will be of great value to him all through life. In the intimate contact between himself and other men he will learn to value friendship. He will become less selfish and more unselfish in his thoughts and actions. Usually the finer qualities within him will be strengthened, and the bad ones destroyed. For his life as a fraternity man he will receive inestimable value which will become apparent to him at life goes on. The more he puts into this existence the more benefits he will reap.

And so, the fraternity benefits both the University in which it is located and the men who are its members. It forms a unit in the service of the University which can perform services that no man could perform alone. The University can now reach his fraternity members if he has not become indifferent to the fact that his supply of the following letters has been destroyed. For his life as a fraternity man he will receive inestimable value which will become apparent to him at life goes on. The more he puts into this existence the more benefits he will reap.
