EDUCATOR TELLS FORUM "WHAT FRANCE WANTS"

DAMES' EXPERTS STUDY PROGRAM

Miss Margaret Clement, of the Women's College, which recently formally admitted its first girl, and later by her Albert through his influence, was in attendance, and Miss Clement presented some interesting opinions on the war and France.

In the intercollegiate matches fifteen members of the winning team, only the top three highest being counted in the results. In the Harvard-Temple matches seven men will participate, with the team scoring thirty points.

CLASS DAY NOMINATING PETITIONS DUE MONDAY

**The Cost**

Figured in months of wear, our custom Cloths are really cheaper than ready-mades. Their first cost is slightly higher but the superior fit, finer washing, hand tailoring and the impression you make as a well-dressed man far overbalances the initial outlay. Try on this season and you will be far more than satisfied.

**The comet came back**

The great comet that was seen by William of Normandy returned to our skies in 1910 on its eleventh visit since the Conquest. Astronomers knew where it would appear, and the exact spot in the sky where it would first be visible.

Edmund Halley's mathematical calculation of the great orbit of this 76-year visitor—his scientific proof that comets are part of our solar system—was a brilliant application of the then unpublished *Principia* of his friend Sir Isaac Newton.

The laws of motion that Newton and Halley proved to govern the movements of a comet are used by scientists in the Research Laboratories of the General Electric Company to determine the orbit of electrons in vacuum tubes.
Penn and INK

Attorney that little affair between our froshmen and the Philadelphia police force—our first impression from the newspaper accounts was that the combined military forces of Great Britain had been satisfied by the Royal Irish Army.

There were certain persons who appeared to wish to encourage this student printing. As you can see, there were a number of people who had a vested interest in this matter. It's quite easy to detect the source on the mattress.

In fact, we feel sure that they could omit all the blemished paragraphs on sheet.

The aforementioned journalist however would lead a terrible life at now. Each of these would have to account for the individual appearance of a life work.

There is little doubt that the majority of these will take of life at the corner of the earth and in the depths of the ocean upon their early training. As you can see, there were a number of people who had a vested interest in this matter. It's quite easy to detect the source on the mattress.

UNIVERSITY TO BUILD NEW STEAM PLANT ON SCHUYLKILL

Continued from Page Three

windows 25 feet in height, the largest side there will be three sets of immense being 13 feet in width. These openings will command a height of 250 feet with its base corresponding to the pyleon of the building.

The best engineering authority obtainable has been consulted in respect to the heating arrangements with the result that the latter methods will be in accordance with the latest improved methods. Specifications have been made for the installation of four stokers which will be automatically fed from overhead coal bunkers. These methods, in conjunction with the modern designed stack, will bring about the entire consumption of practically every part of the cinders.

Costing a figure slightly under $760,000 this new plant handled by Architect Thomas Martin and Kiernan, all graduates of the University's School of Architecture, will be operated at a total overhead saving of $80,000 per annum.

At present it requires in the neighborhood of 25,000 tons of coal annually to heat the University buildings which number 70 and cover an area of over 110 acres. Upon the completion of the new steam station, the University will be able to tear down the present light and heat plant located at Thirty-fourth and Spruce streets. On this site will be erected the Irvine Auditorium. This new auditorium has been made possible by a bequest of slightly more than $600,000 left to the University by the late William Irvine, for many years the treasurer of the City of Philadelphia.
