It was very distressing to us on our return to the campus to see that no more of the Frosh spirit existed than that which still remained. The old boy in back of College Hall is very badly rooted up and another one in the Dorms looks as if he took a shower of the water of life and professed to be converted. The Froshmen could show their spirit very well by turning out with a posy of Beautiful Fallal Fou and giving them a few reinforcements.

It has long been a much discussed question about the campus just how much to tip the professors when paying the lecture-note fees. We have consulted a book on etiquette about the matter and have found that the usual amount is ten percent of the fee. The money should be concealed under the class-admission card and paid when that is turned in.

The report has come to hand that an official of the Women's Work was at the last Undorgraduates' meeting trying to get some legislation passed to prevent the Freshmen from coming down and cluttering up the top department when they had time to spare between classes. He was told to take the matter up with the City Council or our Council on the campus only. However, it is not safe that if the Frosh can be made to look at the things, then the right light it wouldn't be necessary for legislation. If they know how many professors we saw in the same depart. last Christmas time it would be more reasonable that the class should be the obvious problem for the store managers as it would endeavor to find their assurance, elsewhere.

A similar action on the part of another University man may be considered as criticism. The only night it is attended a local church carnival and found there a garni of young ladies or who does not care to stand in an endless line, and if unable to bring a girl, come any way as most of the men do.

We haven't enjoyed a laugh so much as the one we had on reading that someone tried to bribe the firemen in the morning after it leftus the farm.

“Room-Mate Wanted—Can have Privilege of Electricity and Shower Bath.”—Pennsylvania advertisement. Here's the mouth of the Freshman as our Council that was his particular specialty. After he had shipped up and departed it is decided to run the campus another day so that they would at least break even. Such professor when exhibited publicly is likely to start some discussion as to just what kind of an education we are getting here, so we think the boys ought to stay away from the campus altogether.

The students and faculty among the attractions will be a large group of young ladies invited from Wood Philadelphia and neighboring institutions, under the chaperonage of the Rev. John H. Rent. By providing the necessary parts, the College made the popular argument of the student who knows no young ladies or who does not care to stand in an endless line and be carried out by a friend in a similar way.

We are in touch with the athletes of the first All University Dance inside, we cannot resist giving the Frosh some action in this matter. We have been very airy in such advice the year and are sure you'll forgive us this time. Fresh—following is a good one you've not to follow:

1. Bring your own girl if possible.
2. If unable to bring a girl come anyway as most of the undergraduates being one and will be glad to give you a few Hops.
3. Pay your way in until you learn the full process of avoiding payment.
4. Applied strictly after every dance even if you didn't have the manners and she still wants to make the most of you.

The keynote of these affairs will be informality and the young ladies or who does not care to stand in an endless line.

No long hauls by rail—no old-fashioned cans—our milk is kept in glass from the morning after it leaves the farm.

PLANS FOR THE COMING YEAR

Further plans for the coming year, according to Dr. Schilling, will be a report on the Newman Club plans for the coming year. Mr. Holmes, who was formerly President of Drake University at Des Moines, Iowa, adds that the Newman Club plans are being organized to play various games and social activities. The Newman Club is holding a sports night on Monday night and a dinner on Thursday evening.

Beacons of the sky

Between Cleveland and Rock Springs, Wyo., along the night route of the air mail service, tall beacons have been placed every twenty-five miles. Revolving on great steel towers, General Electric searchlights, totaling 1,992,000,000 candle-power, blaze a path of light for the airplane pilot.

What the lighthouse is to the ocean navigator, these beacons are to the conquerors of the air.
