Juniors and Sophomores Especially Urged

For Granville Bennett, of the English department, speaking at the Council of Organizing the fourteenth meeting, last month, Bennett declared that facts alone do not determine the amount of one's knowledge. "Never before," said Mr. Bennett, "has there been so much education, so much knowledge. From all over the world the best is being sent to be taught us."

"I remember the first electric light, the first automobile, the first can of soda. These are the ways of the world, and they have come from knowledge, and I am under the impression that further and further changes. We must have a hypothesis, however, in order to get this knowledge."

This is the first of the series of the seminars to be held in the monthly meetings of the Council of Organizing. The meetings will be held on the last Monday of each month.

**LACROSSE TEAM LEADER FRATURES COLLARBONE**
Albert Saydel, One of the Best Players in Years, Received Injury During Practice Last Week.

**THREE FOOTBALL MEN ON SQUAD**
Casch, "Pete" Fries, of the University lacrosse team, is facing his ball full in the face of two conditions for this coming season. Fries has been occupied in concerts, but the latest makeup will probably be different from the previous season. Albert Saydel, one of the best players in years, is out with a broken collarbone. Sayde was hurt last weekend, but the exact extent of his injury was not known until yesterday. An X-ray examination showed that the collarbone was fractured, and that the healer of the squad would have to be on the sidelines for some time. Saydel is not so badly injured that he will not be out for the whole season, but he will not be available for some time.

Saydel played an attack position on the team last year and gave promise of developing into a first-class scorer. He has been with the squad for the past two years, and played only once under Fries' care. Coach Fries, in reviewing the situation yesterday, was not very hopeful. He has more material out for the team this year than ever before, but there is practically no experienced material among the seniors. A few veterans from last year are still with Fries to work around. The coach has not favored us," said Coach Fries as he discussed the team's chances. "We have been unable to get any outside work until this week, and this has kept us back. I hope to be able to take the boys out of doors from now on and get some real work in. We can't really organize a team while working indoors.

"For the past month I have held practice daily in the Armory, at Thirty-second and Lancaster. The boys have had their sticks in play and are now used to handling the ball. Now we must put them on the field and make up a couple of teams.

"More than 100 men are out daily working with the squad. This includes both Freshman and Freshman, and although I have two men helping me this year, the squad is too large. During the next week we will cut the squad to about 20. The Varsity men and about 20 Freshman. That ought to be plenty to work with."

Although there are numerous other points new out for the team, it is practically impossible to tell who will make the final squad. Many of the players have had their elbows in play and are now used to handling the ball. Now we must put them on the field and make up a couple of teams.

Seconded of the football players who made last year's team have decided not to go out this season. Notable among this group are Al Living, quarterback of the 1923 Varsity football team, and Karl Robinson, Varsity center, who cannot find time to come out this season. Sam Parker, substitute guard, who played because last year, will probably again see the field.

The first match of the year is less than it month off, for the combined Oxford-Cambridge team will be played at the Merton Croquet Club on April 6. Fries will have to hurry if he hopes to have a team that can cope with the great English squad.

Our class selected four honors last year. We got eight citations and eight men think we voted for him. That's, what being around here four years will do to a chap. We held each one individually that we voted for him and our own science doesn't bother to a bit.

The Class Record has announced that all pictures must be in by the end of this week. This time limit for pictures is getting to be just another myth, along with the Sunbonnet, Sunny Class, and the Easter rabbit.

A statement from Dr. Egbert, warning against an epidemic of "so-called art and so-called things that will stimulate the campus and in the classrooms or laboratories." The worthy University health officer advises that they still hold lectures in 122 Logan Hall and that there are some very important elections at this time of the year.

Wasted Words
"There shall be no electioneering in your presence."

Some time ago there was talk of moving the entire University. The organization of a University Travel Association seems to be a step in that direction.

The Mask and Wig singing chorus went to Canada yesterday to make some records of the songs from their latest hit, "What Pleasure." The trip was a great success and the only blight on the whole day occurred when one record had to be made all over again, because the leading tenor missed an important line in the opening number.

It was thought for a few moments yesterday, that the presence of the Swiss Club had spoiled a number in a record. However he was found over in Weightman Hall at a gym meeting.

Our idea of a good time, after we graduate, will be to return and stand in Weightman Hall, watching the boys go through the pieces.

The Post Office clerk just handed us a letter in which the writer wants to know if George Kefler has any connection with the "Sea Beast."

We don't know why, but somehow or other, it wouldn't surprise us if we should someday discover that he has thrown cop plays a trombone in the Police band.

We do not recall exactly what was said, but it seems to have come down directly into election.

In that the Interfraternity Ball is to be held Friday night, we think it is wise for the boys to start in right now looking for their shirt starch.

Our roommate has definitely decided to take the girl from the Interfraternity Ball, but he really can't make up his mind as to whether to come down and go with him.

sent, and disappointed. An adjustment to advancement and change was necessary, while the facts alone were not so to impress upon Phite.

"Another case is that of a man who killed himself because the whole subject matter of a certain science was becoming, so suddenly changed. He could not accommodate himself to the advancement. He thought he knew all there was to know about the subject, and when the change came he was thrust out so completely that his mind was affected by the great movement in the advancement of the science.

"This is an age of tremendous learning but mighty little wisdom and little ability to use and assimilate the available facts. We are a series of contacts, and personalities are affected by these contacts. Queer or odd people are those who have not been able to absorb these contacts. We are all trying to make contacts that will benefit our vision of God's work and to get a more advantageous aspect on life.

"I think that we are going to be judged, when the day comes, by our contacts, our effect on others, our personality through our contacts, and that which others have gotten from us. Jesus Christ is the only one who has ever given us progressive, useful contacts, and under his guidance we hope to make the best out of this life, both to ourselves and to others."

VACATION OPPORTUNITY

A student or faculty member may earn vacation money or a free vacation trip this summer to the most picturesque part of Rocky Mountains (Including Enloe National Park) by doing some interesting work in spare time. This is a strictly high class and legitimate proposition, that has educational advantage which will be immediately recognized. The work is collecting data for and acting as agent for a personal representative of an old established concern utilizing recrea-
tional facilities and conducting pleasantly supervised vacation trips in the Wy-
oming Rockies.
