First race scheduled at 3 P. M.

Field ushers in straw hat season.

Pitchers battle expected.

NOTICE.

The annual Freedom Debate contest, which will be held in room 202 College Hall, will be on Wednesday morning at 10 o'clock. All the schools have entered and Mr. Ed. M. Wooten, editor of the Pittsburgh Press, will be in charge of the debate.

The debate is scheduled for 10 o'clock and will be followed by the straw hat day baseball game.

The game is one of the features on the schedule of Coach Walter Carter's charges, which are now in New York University. The game will be played.

From present indications it is probable that Oberon Temple will play third base and "Barnie" Emmer, center field, for the Red and Blue varsity. Both have shown up well in these positions after the shift in the game with New York University. As the exception of these two men the Pennsylvania team will probably lineup just as against Yale last week.

Since Pennsylvania has recently suffered several defeats mainly because of base running, Coach Carrie has carefully drilled his charges in preparation for today's game. He is of the opinion that the team will overcome its early season hardships and win against the Fordham team.

The game is scheduled to start at 3 o'clock.

to produce the desired results. Here General Electric Water Heaters, General Electric Electric washers, and the General Electric Electric dryer can be found economy, labor, and ease.

A series of GE advertisements which the word is doing in every field will be in the issue. Ask for book B-50.

Crows

In a field in sunny Spain stands a stone mortar. Crows hover around it, picking up bits of grain and chaff—cawing.

Here Marcheta, in the fresh beauty of her youth, will come to pound maize. For years she will pound maize. The stone will stand up under the blows; not a dent has the muscle of three generations of women made upon it. But the crows will hurl their black gibes upon a woman aging early and bent with toil. Old Marcheta—still in her thirties.

The American woman does not pound maize. But she still beats carpet; she still pounds clothes; she still pumps water. She exhausts her strength in tasks which electricity can do better, and in half the time. 

Interest so that of the spirit will always be right in quality and fit—which electricity has become the unanimous choice of the people.

Tentative proposals have been made for giving to the undergraduate student a more definite part in the direction of the enterprise so that when they become alumni they will be familiar with the work and be better qualified to take an active part in it. This will probably be accomplished through the method of inviting annual gifts and by means of permanent maintenance of the fund in the development of the university. 

The American college and school committees which have been established in several schools and colleges of this University are expected to act as permanent representatives of the fund with the alumni at their respective schools and as continuing factors in the development of the fund.

One of the first purposes of the fund was to provide a system whereby the alumni may make voluntary contributions to the University. The contributions which have been formed or are to be formed in all of the various schools and colleges of this University are expected to act as permanent representatives of the fund with the alumni at their respective schools and as continuing factors in the development of the fund. This is in accord with the request expressed by the alumni at the Alumni Association which has provided a program for the future developments in electricity which the future developments in electricity will enable us to do.
A SUCCESSFUL ENTERPRISE

Today marks the one-year anniversary of the University Fund Drive. Its progress from the time of its inception has been steadily forward, coming each day nearer to the sum total which has been set as an objective: $20,000,000.

This is a radical change from the position, Intensive Instead of decreasing. The Fund workers have developed an intimate, personal contact with the members of the graduate body which has proven very effective in their work. Those who have attended to the Fund have, in the majority of cases, been interviewed and solicited and a relative few have actually subscribed to the Fund. The same success which greeted the efforts of our Fund workers in the past year, which will now characterize the drive, has been the result of the intimate, personal contact with the members of the graduate body which has made the campaign so successful. This success will continue, as the report shows, throughout the year.

The success of the first year of actual work has proved to the officials of the campaign that self-satisfied attitude which is so liable to be assumed at this stage of the game. They have adopted a future policy which is just as hard and fast as that which was shown during the past year which will not tend to lessen their work. The work will become more intense instead of decreasing.

The main deviation from the former policy is that of the giving the students the various school a definite part in the direction of the solicitation to familiarize themselves with the work. This is a radical change from the position which was assumed this year. In the past the work of the Fund was entirely within the alumni, which was as it should have been during the formative period of the enterprise. However, now that the campaign has been firmly established the aid of the undergraduates can now be utilized, under the direction of the alumni officers.

The Fund, from its inception, has been extremely successful. The under-graduate body contributed liberally and willingly, many of the returns exceeding estimates of all of their active members. Following this preliminary drive, the alumni was solicited. The same success which marked the student drive was shown in the drive by the alumni. During the year the alumni has been able to bring in $2,750,000 has been obtained. This is a splendid showing for one year's work.

Considering the success which greeted the efforts of the Fund workers this year and the progressive policy as outlined for the ensuing year, we feel that the ultimate success of the campaign is assured.
