A FRATERNITY SCHOLASTIC STANDARD

There are on the campus some extra-curricular activities which are entirely dependent upon the undergraduate participation in them. And recognizing the danger of engaging their interest on matters of the academic and getting into the daily details the faculty maintains stringent requirements, demanding that all competitions measure up to the present scholastic standard before they are permitted to engage in activities.

Herein, eligibility requirements have been applied as to non-scholastic activities. Membership in a Fraternity, although certainly needing demands upon the time of the individual, has not been so rigidly recognized as an activity.

With the movement to the interscholastic agreement which has been solicited by the Fraternity Houses for such work, providing that before membership may be initiated into fraternities they must be passing in at least 25 per cent of their work, the fact that these fraternities are not in the major, distinct from the academic is semi-recognized. And forcing the faculty to recognize that the Fraternity houses are attempting to reach the scholastic requirement as far as possible.

The amendment will, in our opinion, operate for the mutual benefit of Fraternities and Fraternity houses. If other modifications at the University, the fraternities are now so lax in order that they must measure up to the prescribed standard in order to be eligible to membership in a Fraternity, the regulations will ensure sufficient time to their studies in order to conform to the requirements. And the Fraternity will actually benefit by losing lesser members in the “shakiest” vocations.

THE BASKETBALL CURTAIN FALLS

With the closing whistle of the Princeton-Pennsylvania game, Saturday evening, the potential curtain coming down on the 1928-29 basketball season. Just one more picture session to be played, and that will be a post-season benefit concert, in which only the members of the squad who will return for competition next year will take part.

With a team agaist the mighty Wildcats from Exeter, the Red and Blue contenent gave them all an in attempt to Log them back into the pennant-race. Falling in the second of the exciting contests from North Jersey, forced the Strongs and Black to play as they never did before. And, in the face of that uniform attack the Exeter representation faltered by the extremely narrow margin of one point.

In a few days Variety letters will be awarded to those boys who have been as noble for the game Red and Blue and those recipients of the "O" along with the former of Princeton. There will go hand in hand. And the next group will be the symbols of their achievement at the Annual Variety "O" Dinner, which will be held in the Pennsylvania Hall on the 1st of February. The names of the greatest Red and Blue University can award. Make plans to attend this gala affair.

BLUE SKIES

Blue does, and are part of the mixture of the who deals from the life of knowledge to the joy of the coming years. The sun moves slower with the days becoming shorter and the nights are long. The baby evenings are more adaptable to the people, as is spreading along the avenues of homes and dormitories.

There is a drift to everything, especially cold, the smoke is more intense, the snow and cold days are white. The baby evenings are more adaptable to the people, as is spreading along the avenues of homes and dormitories.

It would appear that the boys look a certain height when they attempt to lift them into an oddity of an impossible job by writing the column for us last Friday evening. To be honest I must mention a certain Western by-play, the boys "take note of us." Not only did they write a good column but they also expressed a natural law by "panting" the present handling. The only handicap the boys had was that we didn't tell them where we were going.

The thousands of people that this column is this delight for Sunday morning would seem to indicate that our fellow students were under great emotional stress when they were here last. One might even go so far as to say that this team has all the outward appearances of the score of an exceptionally bitter losing match on the morning after. We already know that writing the column did not produce such fine results. We are reminded of the only quotation we know from Franklin, which runs like this: "This mountain can in itself naturally a little house will be born."

Perhaps some of our standard conditions will object to writing a column to a new name.

We see by the announced Public Ledger that Lady Dorothea Mansell telephoned her induct in England from her induct in England. That makers may recognize, that it was 9, 9.9. In England and 7, 9.9. In England, on which we predicate our assumption that Lady Dorothea is really in love with her husband. Some thousand of Dublin feature stories to the contrary notwithstanding, we are convinced that few people get up as early as ten o'clock in the morning, even to telephone their husbands.

Chapter actors and actresses would have nothing in common with our current students if they didn't sleep later than last A. M.

Nancy joins on his way to Sunday School to remark that what the University takes to be a good campus fall? And opens up to the suggestion. Very well, inasmuch as we finance at least two per cent of public opinion on the campus, we are willing to assume this responsibility. We received still photographing in Houston Hall, that being the only result with which we are acquainted that is fully equipped with the essential equipment.

We are also indebted to the Public Ledger for the following information that a girl went home-declared dead. Dead last Saturday. And how?

It is our observation that if a person is exceptionally purist with one group, he is equally unpopular with another.

Pennsylvania—there who joins the Suicide Club. Registered—there who joins the Longest-Day Club.

This is our third spring in the crowded atmosphere of this department so we should know what to expect from these doing boys. "Feel the pulse," Take a look at this:
