CRAWFORD, PENNSYLVANIA

THE TImE-THROB OF THE DAY

By R. C. H. P.

The time of elliptical shapes, of ellipses, is not the time of the day, but the time of the year. The time of the day is the time of the earth, the time of the sun, the time of the moon. The time of the year is the time of the seasons, the time of the cycles, the time of the rhythms. The time of the earth is the time of the spinning, the time of the tilt, the time of the orbit. The time of the sun is the time of the light, the time of the heat, the time of the night. The time of the moon is the time of the phases, the time of the tides, the time of the cycles. The time of the seasons is the time of the growth, the time of the harvest, the time of the dormancy. The time of the cycles is the time of the life, the time of the death, the time of the rebirth. The time of the rhythms is the time of the music, the time of the dance, the time of the prayer. The time of the spinning of the earth is the time of the day. The time of the tilt of the earth is the time of the year. The time of the orbit of the earth is the time of the eon. The time of the light of the sun is the time of the day. The time of the heat of the sun is the time of the summer. The time of the night of the sun is the time of the winter. The time of the phases of the moon is the time of the lunar months. The time of the tides of the ocean is the time of the lunar cycle. The time of the growth of the plants is the time of the spring. The time of the harvest of the crops is the time of the summer. The time of the dormancy of the seed is the time of the fall. The time of the life of the organism is the time of the spring. The time of the death of the organism is the time of the winter. The time of the rebirth of the organism is the time of the spring. The time of the music of the universe is the time of the day. The time of the dance of the universe is the time of the year. The time of the prayer of the universe is the time of the eon. The time of the spinning of the earth is the time of the day. The time of the tilt of the earth is the time of the year. The time of the orbit of the earth is the time of the eon. The time of the light of the sun is the time of the day. The time of the heat of the sun is the time of the summer. The time of the night of the sun is the time of the winter. The time of the phases of the moon is the time of the lunar months. The time of the tides of the ocean is the time of the lunar cycle. The time of the growth of the plants is the time of the spring. The time of the harvest of the crops is the time of the summer. The time of the dormancy of the seed is the time of the fall. The time of the life of the organism is the time of the spring. The time of the death of the organism is the time of the winter. The time of the rebirth of the organism is the time of the spring. The time of the music of the universe is the time of the day. The time of the dance of the universe is the time of the year. The time of the prayer of the universe is the time of the eon.

WINTER’S BIGGEST LITTLE CLOTHES COST!
When you compare a cheap, so-called custom-made suit and a real hand-tailored custom suit, the difference is noted at once; the one is gone after a few months’ wear while the other is good for a year. It will hold its shape, will prove and climb well, and at all times you know you are well-dressed. Such are the clothes we make, and many Penn men know this. Why not you? Our prices are $25 to $85

NEW IRVINE AUDITORIUM RAPIDLY ASSUMING FORM

Many Features of Building Will Include Meeting Rooms, Piano Organ, and Lunch Room.

The Irvine Auditorium, now being constructed for the University at city limits and Prince Street is rapidly assuming form. The eighteen month construction period is about half over and the building should be completed about February, 1939, as the contractors are up to their usual schedule.

The auditorium will be composed of central brick and Indiana limestone on
the exterior. It will be of the Gothic type of architecture with several pillars and a minaret and a spire over the central part. The pointed spire of this structure will be the tallest and twenty feet from the first floor. The windows and windows frames are being imported from a famous English firm.

The interior of the auditorium will consist of the main floor and two balconies.

The seating capacity will be twenty four hundred. This wall paneling of marble and granite will give greater ambiance to the halls. The maximum height of the auditorium on the interior will be one hundred and ten feet.

Most of the basement will be taken over by the heating and ventilating equipment. It will also have a receiving room and a stage in which stage floors will be provided. On the main floor will be two large rooms where University and alumni will hold their meetings. There will also be a serving room which will connect with the stage. The stage will be located at the rear of the auditorium.

The acoustics of the auditorium have also received careful attention. The curtains are rich velvet and the draperies with leather. This will prevent any possible noise from external sources.

Other features will be moving picture booth on the second balcony, a large pipe organ and an orchestra pit. There will be fourteen dressing rooms located in the stage work of the building.

SAVE POSTPONES PLAY IN SCHOLASTIC NET TOURN

(Continued from Page One)

reservists, Shuler, Baker, and Smith plan to enter Pennsylvania after being graduated from high school. The records made by these men attest their respective abilities. Shuler to HHS captured three national boys' championship: outdoor and indoor singles and indoor doubles. Baker, with Smith, holds the Presidency, Pennsylvania and Western Junior doubles titles.

In addition to the tournament, the University and Pennsylvania tennis teams will meet Amberly and Yale, respectively. Singles matches will be played by Hofs- kirch, Milos, Kraft, Rompel, and Lindsay. Missouri, who will also see action in the doubles are: Umfreville and Straw- berski; playing together; Levine and Bums- tons paired Barnes and Ryan.

At this time of the year the courts are being used practically every hour of the day. Coach Houghton estimates that the number using the seventeen new courts on River Field weekly totals 500.

GALA BALL CONCLUDES IVY WEEK FESTIVITIES

(Continued from Page One)

Dancing will include additional entertainment with group dances. No greatly
tier dance was required that they gain several scenes. The favors given out were much more formal. The beauty of them was well deserving of an affair as grand as this formal University dance of the school year.

Gala ball concludes Ivy week festivities.

If It’s Action You Want!

If it's action you want, jazz or otherwise, stop in the nearest store carrying Columbia Records and look over the latest Columbia release. Then ask to hear any of the up-to-the-minute dance and vocal records that appeal to you. There’s a lot of ‘em, all by artists who are nationally known. Pick as many records as you wish. The dealer will play them for you. There’s no obligation. He likes to hear them, too.

Straw Hat Day—and SUPPLEE ICE CREAM

Both are institutions at Old Penn. When the winning run scores in the ninth inning, bringing the stands into a frenzy of cheering, straw hats—new or old—are tossed into the air. But every fellow—Senior or “Frosh” or Old Grad—holds tight to that priceless possession, first aid to dry throats—a brick of SUPPLEE ICE CREAM.

The individual brick—in three flavors—Chocolate, Vanilla and Strawberry, is the popular combination on Franklin Field.

Supplee-Wills-Jones

Unexcelled Milk and Ice Cream
