Meyner To Speak Here
On Reorganizing State
Tonight in Houston Hall

"Overcoming Obstacles to State Reorganization"
Will Be Subject of New Jersey Governor's Talk

The Honorable Robert B. Meyner, Governor of New Jersey, will speak on the subject, "Overcoming Obstacles to Meaningful State Reorganizations," tonight at 7:30 after a dinner meeting in the Philadelphia Regional Chapter, American Society for Public Administration in Houston Hall Auditorium.

The meeting is being sponsored by the Institute of Local and State Government of the Wharton School. The American Society for Public Administration is a national organization composed of state, local, and national associations, several thousand individuals, and 6000 public officials.

Governor Meyner will be introduced by Dr. Gaylord P. Harned, president of the University, who will speak on "The Proud Tradition of the Houston Hall.

A limited number of students will be admitted to the dinner at 7:30. To tearooms of the University, to which admission will be limited only the faculty and staff will be able to attend.

Crimson Adds Girls To Staff
The Harvard Crimson gave up the ghost last week after a short and fatuous life. It was 83 years old.

The failure was revealed by a short-time-one story in the black, which pleased with needs of its readers. Citing it for the Crimson editorial staff "When the Crimson dies, the alma maters are scarce," the Harvard alumni association did not have in mind to suffer fully the benefits of a "filter down" system.

The former cadets are invited to pass through the Harvard Alumni reunion'sHY^

Hill Heaping Applications
Applications of those wishing to join a fraternity or sorority Ball Student Board will be accepted until 3 p.m. Saturday afternoon at the Director's Office in Houston Hall. Interviews will be held Thursday and Friday afternoon.

Time' Finds College Student
Seeks Security, Kids, Suburbia
by B. M. Minsky

A perplexing problem confronting economic analysts is how college students will affect the labor market in search of an answer many professional and amateur groups are engaged in.

Time magazine's Market Research Bureau recently conducted some varied results.

The young adult, according to the bureau, is a close relative in terms of age, income, and family size. He wants at least a two children and family size.

The survey showed that 32 percent of the college students have scholarships and 72 percent have more than enough money to cover their expenses.

Half of them plan to get their educations at least part time and find that in a good year 20 percent plan to own their homes in the near future. Most of them desire to settle in the only three per cent, excluding the hope of living in the country or the city.

Three per cent say that a large part of their education will be received on the job.

EDITOR'S NOTE—In maintaining The Daily Pennsylvania's policy of presenting an unbiased version of happenings on the campus we present the following two articles written by students at this college giving their opinions, both pro and con, of fraternity life.

**Pro** by William K. Bohan

Since most freshmen face during the next two weeks the experience which in the largest number of cases will place them in the fraternity system or indirectly the division of the class of students at Pennsylvania. This is illustrating that some of the characteristics and advantages of being a member of a fraternity are such that they will be present during most of the year. This is making some time during this essay to consider and weigh some of the arguments against both the fraternity system itself and the system as Pennsylvania. It seems best that this matter be dealt with honest and honestly.

The most often voiced objection to fraternity life is that it is discriminatory, cannot be treated adequately here, for we have shown already that as far as we are able to test, all human organizations are on an equal footing in the desire of the individual to have a right to know about the financial status of the people who belong to them. While it may be true that two weeks is not enough time to tell the future, it is highly probable that within a few years some of the more prominent organizations will be shown to have a right to the future.

Two Bases Of Attack

The fraternity system at Pennsylvania is most frequently attacked for two reasons: first, that it is discriminatory and concentrates on the men of the old-line houses, and second, that the system is too exclusive and negative, which are justified by those who look upon the system as that of the great majority of fraternity men. That fraternity can maintain the value of the system is a point that we shall have occasion to discuss later. For the time being, however, we shall be forced at least to look at the question of the value of the fraternity system, in general, to the men who desire to become a fraternity man or be a part of this system. It seems best that this matter be dealt with honestly.

The inadequacy of the fraternity system is often presented as evidence by the men who desire to become a fraternity man or be a part of this system. It seems best that this matter be dealt with honestly.

The objection is not too substantial.

While it may be true that two weeks is not enough time to tell the future, it is highly probable that within a few years some of the more prominent organizations will be shown to have a right to the future.

In response to the contention that a student is literally rushed into a fraternity, it is stated that most membership in a fraternity entails, it can be argued that it is highly probable that within a few years some of the more prominent organizations will be shown to have a right to the future.

Advantages Listed

The advantages that the fraternity system provides the person who will enter a fraternity, outside of the more obvious advantages is one of having a chance to take a date, to enjoy fairly frequent parties, and to have many other advantages which can be summed up in one statement: fraternity life is not limited to the members of a fraternity but is enjoyed by others also. It seems best that this matter be dealt with honestly.

In his fraternity life he will see a type of organization which will be constrained to take an interest in the facts and figures that are involved in the operation of a national organization. He will come more closely into contact with the realities and the problem of life and has been considered by many the most memorable experiences of their lives. And he will have the opportunity to witness the more relaxed and open moments of the men he meets in the fraternity, which will be most important in their life, their faults and virtues, their success and failure, and the reason for which they will most likely never have the chance to tell their story. This, it is likely, will be of more benefit to them than any other activity, which is also one of the most valuable activities that they will be able to perform as one of their own.

In his fraternity life he will see a type of organization which will be constrained to take an interest in the facts and figures that are involved in the operation of a national organization.
Oration' Planned for Philo

By New Moderator Fshlow

Albert Fishlow, newly elected society, has announced that his annual Philomathean oration, which he will deliver in the University's administrative building at 4 p.m. on Friday, will be titled "The Importance of the President of the University." Fishlow has been a member of the society for three years and has been its president for the past year.

According to Fishlow, the oration will focus on the role of the university president in today's world, and will address issues such as the university's relationship with the community, the impact of technology on higher education, and the importance of financial support for research.

Fishlow is a well-known figure in the academic community, having served as a professor at several universities and as a consultant to government agencies. He is also a member of several professional organizations, including the American Political Science Association and the American Society for Political and Legal Philosophy.

The oration will be open to the public, and is expected to attract a large audience. Fishlow encourages all members of the campus community to attend and to engage in thoughtful discussion following the event.

Inadequate Scientific Knowledge

A study of psychology, psychiatry and pediatrics may be a "dangerous thing" to do, according to Dr. Ray H. Abrams, assistant professor of sociology at the University of Pennsylvania. Abrams observes that "In the estimation of many scientists, a little knowledge is a dangerous thing." He further notes that "in the past, there has been a definite confusion between the empirical sciences and the social sciences, which has led to a lack of adequate scientific knowledge." Abrams suggests that "the social sciences should be taught as a separate discipline, rather than as a subset of the empirical sciences." He says that "there is a need for a more comprehensive understanding of human behavior, which can only be achieved through a genuine scientific approach."
Dress Pruitt wants to know:

What type of training program does Du Pont have?

Don Miller answers:

Training has many facets in a big firm like Du Pont, Dress, and effectiveness in the organization. We think that the best way to train a college graduate is to give him a maximum of on-the-job responsibility in a minimum length of time. That's the general assignment.

A young man interested in sales is often first assigned to a plant or laboratory dealing with the products he will later sell; or he may join a group of trainees to learn selling techniques right from the start.

An engineer, chemist, or other technical graduate is usually chosen for a specific job within his major field of study. Such a man brings specialized knowledge and skill to the job, and he is encouraged to put them to use promptly. But at Du Pont his experiences on the job are supplemented with lectures, conferences and discussion groups. In a very real sense, new technical employees continue training in their specialties after joining the Company.

To sum it all up, Dress, Du Pont's training program is individualized to provide a new man with specific opportunities to learn from contacts with more experienced men. The prime objective of Du Pont training is always kept clearly in mind—to develop men for future advancement and effectiveness in the organization.
Eli Field Dominance Key In Victory Over Quakers

by Hugh Jacobson

NEW HAVEN, Conn., FEBRUARY 11—Led by Bernie Thompson, the Yale quintet pulled up a surprising third in the Fireman's Field Meet at Hartford College. The Quakers, who brought along a squad of 13 men, outscored the band to take the meet, but Eli could not match the depth of the Quaker lineups.

Tight Races Loom In I-M Cages Action

Close races have developed in nearly every division of the interfraternity, Distinguished, and Independent Basketball Leagues as most teams swung back into action last week after the midyear exam layoff.

Defending All-University champion BAR is no better than fifth in the title chase of the Blue League as it won by a full schedule will be played this weekend. Gamma Delta is 5-0, while both Beta Sigma Rho and Normandie have 4-0 records although BAR also has a four-game winning streak. Most teams are caught in the middle, however, and it is likely that five or six teams will be tied for second.

SPECIAL STUDENT RATES

pennsylvania 38 and Brown's 16. Here at Coxe Cage today.

Gamma Delta Is 5-0, while both action last week after the middle;

Spruce League with Normandie Green and Gold Leagues respectively with five wins and no defeats. Only two teams, Mast and Wig and Mage are still unbeaten; Stapleton and Waldo, but the Mast and Wig leads in the Spruce and with Mon and Rodney tied for second, while Mage is first in the Hamilton division followed by Ward and Cleemanogram. Four squads, Brown, Frederick, Lippincott, and Ingersoll are 1-1 in competition, and for the Woodnymphs, Edward and Boulton has earned a tie and won an extra victory.

Freshman Cagers Lose, 73-69;
Schneider Scores 27 Points

by Bernie Schneyer

Pennsylvania's freshman basketball squad dropped a close 73-69 decision to the Villanova freshmen at the Wildcat's home court. The loss reversed earlier Quaker win at the Palestra, 80-79.

Levan's charges suffered their eighth defeat in ten games, despite guard Bernie Schneyer's 19-point, 12-for-15 shooting. Schneider connected for ten field goals and seven free throws to record 27 points. High scorer besides, however, was the 14 for one of the Wildcats' last two points, a field goal and a pair of free throws by Bob Pierce.

Kelly's jump shot for the Wildcats with three minutes remaining put Villanova ahead to stay. Cornett was second in scoring with 12 points.

Cricket Meeting

There will be an extremely important organizational meeting of the University of Pennsylvania Cricket Club at 6:30 p.m., Friday, March 4 at 6:30 p.m., at St. Elmo, 3533 Locust Street.

No member undergraduates interested in playing on the cricket team. Schedules, social plans, and arrangements for payers will be discussed.

Parables in Bible
Show way to Get Rich

"Many rich and successful men and women," declares the author of a small, 20-page booklet, "have no more brains or energy than average. They are usually driven to success. Frequently they are less capable than those who want to. To their minds is a vaudeville in the middle of the week." The author of the booklet, "The Elements of Chesterfield's," says, "You'll smile your approval of Chesterfield's."

From his first-hand experience, the author of the booklet, "The Elements of Chesterfield's," has come to the conclusion that "The average, little man in China has gained, not lost, in the change of government control. Most people in China are still laborers. They aren't interested in a free press, free elections, and the like, as we are. In our government, democracy means a government that is interested in seeing that the little man gets enough to eat, and doesn't try to line his own pockets with money squeezed from the people, which in turn is to be used by corrupt officials."

"They feel that the present government in China is honest, and therefore, they support it though it is a Communist." Dr. Bodde feels that this applies to the great majority of the people in China, but there are those who do think differently.

The Communist rule in China today is the right one because it has come into power the same way that every other recent government in China has come into control, through revolution. "The average, little man in China has gained, not lost, in the change of government control. Most people in China are still laborers. They aren't interested in a free press, free elections, and the like, as we are. In our government, democracy means a government that is interested in seeing that the little man gets enough to eat, and doesn't try to line his own pockets with money squeezed from the people, which in turn is to be used by corrupt officials."
