Crew has been surrounded by many obstacles, but Burk has been able to keep his athletes at a high pitch and moving toward victory. He is considered one of the finest crew coaches in the country and has been named "Coach of the Year." His achievement came in 1923 when he was the captain of the Harvard men's varsity eight and an outstanding American amateur oarsman.

The main purpose of the meeting was to discuss the strategy of the upcoming spring practice. Burk was elected as the leader of the Penn crew, and the team was determined to improve their performance and win the championship. His leadership and guidance were instrumental in the team's success.

In 1923, Botts undertook the gigantic project of charting the heavens. He was the first to name constellations after their wives, and his choice was Betelgeuse, after his wife Betelgeuse. This started the custom of naming constellations after their wives, and the tradition has continued ever since. Botts was a famed dirt track racer, and his name became synonymous with precision and speed.

A Wise Selection
In choosing, Dr. Robert E. Spiller, who nominated Dr. Seton, is to be congratulated for preserving the tradition of the scholar-administrator, so well exemplified by Dr. David, rather than choosing a professional librarian who would not, perhaps, be as aware of the interests of a University library. The Harvard Council is the official body which guided the University system with wisdom, foresight, and an unflagging concern for those who are responsible for it.
