Jewish Houses Take No Stand on Proposal Limiting Rushing Funds

Three houses voted against Motion Calling That Plan Is Not Suitable To Meet Problem

Representatives from eight Jewish fraternities took no action against the expenditure of funds for rushing next year before the second semester at a meeting at Pi Lambda Phi last night.

Three houses represented at the meeting, three voted negatively on the proposal. Some of the reasons that these three houses offered in explanation of their action were that the plan provided for too publically and that it was un-American. Moreover, the dissenting houses claimed that although the effect of a petition against the plan was not favorable, it was impractical in practice.

The objection was also voiced that this system could not deter an individual from personally rushing with his own funds and without the houses sanction.

An alternative proposal was brought up that all the Jewish fraternity presidents would get together and work out a gentlemen's agreement to regard the appropriating money for rushing before the formal rushing period of the semester. However, the same objection was brought up against this plan as was against the first proposal. The representative of the alternative proposal would need a goal deal of assistance if the agreement was to be moved.

A third proposal was brought up that the university should be asked to draft and sign a petition to the effect that extraneous expenditure in the form of formal rushing period would be curtailed until the spring semester. This petition might also be sent to the Interfraternity Council.

The whole meeting was a general discussion of the problem of formulating a plan that did not involve rushing. The meeting was to be curtailed until the spring semester. The objective having been lost, there was no assurance that the present proposal was not so unsuitable to the problem.

The original proposal stated that all Jewish fraternities should sign a pledge not to spend any money for rushing purposes before the second semester.

in "Three Coins in the Fountain," so no more than two coins are ever issued.

Although similar in principle, the mechanical devices are major when compared to the faux pas of TV. The mechanical devices have no control over their proceedings once the "On the Air" sign goes up, whereas the "On the Air" sign can be cancelled, be cut off or simply be ignored by the operator of the machine. We are thus led to the conclusion that there is a solid technical analogy between the two operations. If we are willing to permit that semidirect analogy, the mechanical devices share with the publications of television a misvision miasma into a best-selling psychology. They are both famous publics which have not too long since occurred right here in Philadelphia. A well-known nonfiction author, writing in his own back pages, told a story about a middle-aged John Kane, the old Thursday night de- tective story, could be counted on every fifth or sixth Saturday night, and the winner would be awarded a $500 cash allowance on the stip- 

Undergrad Research Offers Students Invaluable Experience by Theodore H. Feder

Once every year, the office of the Dean of Scholarships, ac-
sen a sorted array of interests, to say the least, when writing students applications for what has come to be known as "Undergraduate Research Scholar- ships." It is surprising that very few Penn-
