Measures Taken To Avoid Errors During Rushing  
Rules Made To Aid Delivery of Invitations  

Precautions have been taken in the dormitory mailroom to insure the legality and efficiency of delivering fraternity invitations to rushers during the rush period.

Dr. Eggers Ham, director of men's residence, has had mimeographed rules of procedure sent to chairman of the rush committee in all the fraternities. All invitations to dormitory residents are to be delivered to Mr. Lloyd, the mail clerk.

Invitations must be handed in at the dormitory office by Lloyd not later than 3 p.m. on the day before noon with the invitations are to be delivered. No representative of any fraternity is to be permitted in the mail room at any time during the rush period, unless he is an employee of the dormitory office.

File May Be Used  
Invitations lacking box numbers or proper numerical order will not be delivered. Address files in the dormitory office may be used between the hours of 3 and 6 p.m. on any Tuesday or Thursday accepted on Saturday or Sunday.

The fraternity rushing to the Alphi Chi Rho, Beta Theta Pi, Delta Tau Delta, Delta Upsilon, Kappa Phi, Kappa Sigma, and Zeta Psi. Also rushing are Alpha Epsilon Phi, Kappa Nu, Phi Alpha Phi, Sigma Alpha Mu and Zeta Tau Alpha.

Rush Night Tomorrow  
Those houses rushing tomorrow include Delta Phi, Phi Gamma Delta, Phi Kappa Psi, Phi Gamma Sigma, and Zeta Phi Tau. In addition, Phi Gamma Delta, Pi Kappa Phi, Tau Kappa Epsilon, and Phi Delta Rho will rush.

All fraternities will rush on Friday night and every night until May 1.

Contact between fraternity and sorority members is allowed only between 7 and 10 p.m., in couples.

Student Groups Thanked  
For Aid in Registration  
The office of the Registrar wishes to thank the students and student organizations for their cooperation and assistance during the spring registration in the Student and the Mothers-in-Gestation Halls.

It was a great pleasure to have so many students as individuals and as representatives of the organizations assist with the registration. It was a pleasure to assist, time spent in organizing groups to meet various stations and dependably show in the performance of duties were commendable.

Your participation in the registration station represented a division of the Student Organization Council and students and we wish to express our warmest thanks.

Eight European Professors Visit Wharton School To Examine Coopertion of Industry, Universities  

Eight European professors are now visiting the Wharton School in an effort to discover why and how extensive co-operation exists between United States industry and universities.

In charge of the project for the university is A. M. Conard, who has spent much time abroad and has intimate knowledge of American business conditions. The time has been spent working in the extended schedule for the guest.

The meat contains proposed for two semesters of study and the summer summer participating in and in charge of the work. The Institute of Business firms and industries. Dr. Mate and the aim of the problem is to analyze the finding that the United States professors find to be that the United States professors find to be the factor in the education of the student to be able to function in cooperation between it and the local industry.

The underlying philosophies of American organizations are that the curriculum, the objectives of Wharton School curricula, the principal features of the Wharton School curriculum and the method of teaching, are the moral and intellectual training of the student to be able to function in cooperation between it and the local industry.

Visiting European professors here for a year's observation of the Wharton School gather around a bust of Joseph Wharton in the H.F. Wharton Library. (Continued On Page Two)

Catholic High star performer for right tackle. Penn basketball this year has received the team with the most of the Centric. Project director Dr. Adolph Mals is third from the Left.

‘Helen of Troy’ Finest of Spectaculars; ‘Sheep’ Top Gallic Comedy Import

by Link and Levinson

The spectacle is a tried and true film format requiring money in the millions. But ‘Helen of Troy’ is one of the most successful productions. The film was based on a novel by Willy Haase, the original idea for a cinematic masterpiece. The production was directed by Robert Enrico, who directed ‘Viva Zapata’ and ‘The Robe’ in Hollywood.

‘Helen of Troy’ is a historical epic set during the Trojan War. The story revolves around the love triangle between Helen, Paris, and Menelaus. The film features a large cast, including Jean Marais, Gigi Proietti, and Armande François. The film was released in 1951 and received positive reviews for its grand scale and technical excellence.

‘Sheep’ is a Gallic comedy import directed by Jean Delannoy. The film is set in a small village in France and revolves around the life of a rural community. The main character, played by Jean-Paul Belmondo, is a naive shepherd who becomes involved in various misadventures.

The film is known for its humor and quirky characters. It was highly successful in France and was later adapted into a stage play. The film was released in 1963 and was directed by Jean Delannoy.

Both films are highly regarded in their respective genres and are considered classics of the era. The success of these films highlights the importance of well-crafted storytelling and skilled direction in cinema.
**Runners Face Columbia, Tigers at Lawrenceville**

Rounding out its first win in five years and the end of Princeton's six-year domination of the Polar Bear meet, Penn's track squad faces Princeton and Columbia at Lawrenceville, New Jersey, this afternoon.

The Quakers, by a 48-36 count, now 18-0, widened its place lead over second rated Dartmouth, whose record stands at 17-1.

Three Quaker Foes of the Ivy League's number five Princeton and Columbia and Dartmouth are expected to keep Penn in the Ivy league's number five this year. When Chet Forte, the 5'9' guard suffered a severe blow yesterday when Chet Forte, the 4'5 scoring sensation, was declared ineligible when Chet Forte, the 5'9' guard suffered a severe blow yesterday when Chet Forte, the 4'5 scoring sensation, was declared ineligible.

**ForteDeclaredIneligible**

Effective March 15, 1966.

For Balance of Schedule

The Ivy title hopes of the league leading Columbia Lions suffered a severe blow yesterday when Chet Forte, the 4'5 scoring sensation, was declared ineligible for the balance of the season because of scholastic reasons.

Forte led the league in scoring last year and broke the all-time Columbia scoring records. He was named to the All-Ivy team and averaged 22 points a game. In the last two victories over Penn, earlier this year the diminutive guard poured in 18 points in the first half to score an 18-point total.

The loss of Forte is particularly hard by Columbia. Forte, who has scored 978 points in his last three seasons, was the league's number five scorer last year, when Columbia led the Penn Quakers, by a 48-36 count. In last year's meet the Cadets edged the Quakers, by a 48-36 count.

Three top performers from the numerous of the Army squad. In the December 18 game against Princeton, Johnstone was named to the All-Ivy team. Johnstone has scored 77 points and Columbia has tallied 72.

**Penn Men Deny Seek To Break Losing Streak in Army Meet**

Attempting to stop its three-meet losing streak, Pennsylvania's varsity swimming team journeys to West Point to meet a powerful Army team at 3:30 this afternoon.

Possibilities of a Penn victory do not appear bright, however, as Army's team has been particularly impressive as of late. Last Saturday Army defeated Cornell, the same team that routed the Quakers, by a 48-36 count.

President Johnstone and Johnstone selected for the Penn Army meet. Johnstone has scored 77 points and college has tallied 72.

**What's doing**

at Pratt & Whitney Aircraft

Jet Engines Tested — in World's Most Complete Propulsion Laboratory

Located on the bank of the Connecticut River at East Hartford is a singular development facility— the Andover Wilgoos Turbine Laboratory. Here, behind windowless, concrete walls, many of America's best and brightest engineers face a never-ending challenge in the development and testing of advanced aircraft engines.

Two methods used by Pratt & Whitney Aircraft in their unique laboratory are highly complex. Tests are conducted on full-scale experimental engines at simulated altitudes up to 76,000 feet. Extremely high speed airflow, with pressure and temperature accurately controlled, duplicates speeds and exhaust conditions at Mach 3.5. To reproduce such prodigious flight conditions, experimental engine to be devised. For example, a 21,000-hp driving dynamometer supplies the enormous power needed to run jet engine compressors over a range of speeds from 800 to 10,000 rpm. The one lapse between development and production of new engines is reduced considerably by the advanced facilities of the Wilgoos Laboratory. An overall example of results achieved through concerted engineering effort is seen in one of the latest supports in the Pratt & Whitney Aircraft J-57 turbine. Today the unchallenged leader in its field, the J-57 is the foreunner of greater aircraft engines that will power the prominent military and commercial aircraft of the future.

**Andover Willgoos Turbine Laboratory**

where jet engines and their components are explored. Cooling water from the Connecticut River can be pumped through a maze of radiators or, in the summer months, the river's 35°-30° temperatures can be used to cool components. Testing the river's water temperatures is one way of determining its effects on the engine's performance.
