Student Health Will Give Salk Polio Injections To Those With Vaccination

Students Must Get Parent’s, Physician’s Permission, Provide Own Vaccine if Desiring To Use Service

Any student at the University who has the approval of his family, his family physician, and who has the vaccine may use Student Health Service facilities for injection of Salk polio vaccine according to Dr. Paul F. Schrode, medical director of the Student Health Service.

Dr. Schrode said that at the present time the vaccine is not readily available and that therefore it is possible that the parents of students who would need the vaccine may have to try to obtain it themselves, and then call the Student Health Service when they have obtained it.

He said that the Student Health Service would give the vaccine to the students at the earliest possible date when the vaccine is available.

Dr. Schrode also said that the Student Health Service would give the vaccine to students who have the vaccine but who have not had it administered.

Alternative Offered For Eggs Sent To Alabama Segregation Rioters

Four University students have offered an alternative plan to the Student Health Service for the distribution of eggs to the students at the University of Alabama with the suggestion that they are available.

A Negro co-ed, Aunteer Lucy, was polled with eggs during demonstrations against racial integration on the Alabama campus.

In an open letter, the students, who are members of the White House today, put forward a plan that would make the eggs available to all students.

Strickland Named AROTC Colonel

James C. Strickland, a seven-year transportation branch cadet, was named the new Army ROTC colonel at the University of Alabama.

The colonel in charge of the ROTC program is a resident of Anniston, Alabama.

Business Men Thanked

The four Pennsylvania students under the name of the "Breakfast Club of Annamariah, India," thanked the business men of the Lake City for their cooperation and support.

Dr. Schrode requested the cooperation of students in calling the Health Service when they wish to make an appointment for a vaccination.

He also mentioned that the students were not recorded completely since some students had not made an appointment through his office.

Mayor Strickland said that when a student takes into account the various factors that affect his daily life, he will probably realize that some delays are unavoidable.

Older Men, Fathers

Exempt From Draft

Due to Exec. Order

President Eisenhower has put forward the idea of excluding from the draft those men who are fathers of children.

An executive order, signed yesterday, and made public by the White House today, points up the relationship of age to the top of the list in a new order of draft registration.

The new order provides that 1,947,000 registrants now in that seven years age classification can be exempted with proper registration.

A Selective Service spokesman said calls for registrations could be expected to approach 300,000.

The highest of those rates, 14,000, is for the month of January.

Until the issuance of this order, fathers of young children were a factor which would be considered by the Selective Service. But the new order provides that the law permits the drafting of open searches of the current age.

Law Students Gain Actual Experience With City Attorneys

Nearly 100 University law students are in their second year, getting first-hand experience in the tough fields of problems in Philadelphia law.

The course, which is the Whig-Lincoln Law School, was organized by the Philadelphia Bar Association, and is under the direction of the University Law Review office.

The course is a course being pioneered this term by those students, who are law students on the Philadelphia Bar Association and who have records that promise.

It puts the students in the position of working on a firm basis for the Philadelphia Bar Association, for the student who is interested in the field.

Each lawyer supervises three or four students in the relationship of a "partner" to the law office.

John Dugan (center), Pennsylvania Sports Editor, accepts a student in the University Law Review Program, as they were selected for the University Law Review Program.

The editors said that the selection of students for the program would be based on the following criteria:

1. The student must be a law student at the University.
2. The student must have demonstrated an interest in the field of law.
3. The student must have a good academic record.

The program is designed to provide practical experience for law students.

The organization of the new program is a cooperative effort between the University Law Review and the Philadelphia Bar Association.

The program was initiated by the Philadelphia Bar Association, which provided the funds to support the program.

The University Law Review office is responsible for the administration of the program.

The program is open to all qualified law students at the University.

In order to be eligible, a student must have a minimum of 60 hours of credit and must have achieved a minimum GPA of 3.0.

The program provides an opportunity for students to gain practical experience in the field of law.

Letters to the Editor

Editor, Daily Pennsylvania:

We have read with some interest the recent correspondence regarding the grammar and punctuation of our recent article. While we certainly agree that proper usage is important, we would like to clarify a few points.

Firstly, regarding the sentence: “The moves by Columbia University’s student...”, it was intended as a citation of a point made by another author. The quote is not a part of the university’s stated position, nor was it meant to suggest that the university is adopting it.

Secondly, the sentence: “The university might try to hold onto a bit...” was meant to suggest that the university is hesitant to change its policies, not that it actively prevents change.

We appreciate the feedback and will strive to improve our writing in the future.

Sincerely,

[Your Name]

Editor, Daily Pennsylvania:

In response to your recent correspondence, we would like to clarify a few points regarding grammar and punctuation.

Firstly, regarding the sentence: “The moves by Columbia University’s student...”, it was intended as a citation of a point made by another author. The quote is not a part of the university’s stated position, nor was it meant to suggest that the university is adopting it.

Secondly, the sentence: “The university might try to hold onto a bit...” was meant to suggest that the university is hesitant to change its policies, not that it actively prevents change.

We appreciate the feedback and will strive to improve our writing in the future.

Sincerely,

[Your Name]
Prospects Appear Bright For Frosh Track Squad

Despite a crying need for more performers, prospects seem bright for the freshman track team.

Freshman "Boo" Morcom is especially in need of more men in the sprint, broad jump, pole vault, discus, and javelin. Yet in every event there is a man who appears to be headed towards stardom on the varsity.

Heading the list of sprinters is Joe Morcom, a 10.4 runner from Belleville, N. J., and holdup of the county record. In this group are Dryer Henderson, a 10.8 runner from Normality High in St. Louis, and Bob Rover, who has run 6.0 for Sandwiches.

Distance Runners

The Quakers are even better supplied in the distance events, especially in the 880. George Kaatzerman, who has already run 2:13.9 for Dyer, N. H., High School, set county and conference marks as well as won the New Britain Invitational titles. Bill Szymiele, subman champ from Newton, compiled a 2:33 checking 5 and a 4:48 mile.

Heading the milers in Bob Morcom, William, the Harvard 3:53.5 on the sharp curves of the board track and has used 2:08 for the 880 at Central High. Dan Hende said from 3:56 to 2:47.

Two Star in Hurdles

Deke Lovett, a 4:48 mile from Brooklyn and star cross-country runner, and Mike Tischman from Elizabeth, N. J., High School, have run 11.6 and 12 for the two-miles.

The hurdlers also features high caliber talent, led by Verona's Andy Wolchmar, the New Jersey champ, and Scaramanga's Ro Maughan, who has good hurdle form and keeps posting fast times.

In the high hurdles also among the frosh for Mike Kapchuck, whose record and Ill's plans.

The high hurdles also flit for the Friday at Central High. Dan School Shot put Chumps also among the frosh for Mike Kapchuck, whose record and Ill's plans.

Week's Ivy Cage Schedule

Lists Eight Important Games

Eight important contests are scheduled for the Ivy Cage this week.

Only Cornell plays less than two games, hosting Columbia in a major action. Princeton again involved in three matches in four days. The Quakers entertain Dartmouth Sunday and have a week-end road trip to Brown and Dartmouth. Princeton and Yale, two of the top contenders for the league crown, play each other twice in four days. The Eli at home against the Tigers on Wednesday, and the pairings are reversed on Saturday. Continuing the advantage of home court, Cornell plays against Catholic tomorrow and Brown and Dartmouth.

Bows Charm the City

The Quakers are off to a great start in the Ivy League, which is considered the best of the Ivy. The Quakers have outscored their opponents this season 7-1, and have not been scored on since the opening game against Pennsylvania. The Quakers have a 12-5 record, with their only loss to Columbia.

Notice: Opportunity for technical graduates with Goodyear

Representatives of The Goodyear Tire & Rubber Company will be here on the date shown below to interview students who will receive B.S. or advanced degrees in the following fields of technical study:

- Electronics Engineering
- Mechanical Engineering
- Civil Engineering
- Chemical Engineering
- Electrical Engineering
- Industrial Engineering
- Mathematics
- Physics

There's a career for YOU at Goodyear in any of the following fields:

- Plant Engineering
- Process Development
- Research
- Factory Management
- Technical Sales
- Production Development

Contact your student placement office now—plan now to have a personal interview.

Sponsored representative will be here on

FEBRUARY 21 & 22

The Goodyear Tire & Rubber Company

Aeronautical Engineers
- Aerodynamics
- Structures & Weights
- Rocket Development
- Missile & Aircraft Project Engineering

Mechanical Engineers
- Rocket Development
- Research Laboratories
- Servomechanisms Hydromechanical
- Valve Development
- Structural Test

Electronic Engineers
- Electronics Development
- Servomechanisms Inertial Guidance
- Missile Testing
- Flight Test Installation
- Field Service & Training

Mathematicians and Physicists
- Dynamics Analysis
- Aerodynamics
- Electronic Development

To holders of a Master or Ph.D. Degree, Bell offers exceptional opportunities in advanced research on a variety of projects.

Our representative will be on campus:

FEBRUARY 27

THE GOODYEAR TIRE & RUBBER COMPANY

SCHRAMM Speaks at Colloquium

The National Center of Scientific Research of the Ministry of Education of France has invited Dr. J. B. Schramm, professor emeritus of botany at the University, to participate in a Colloquium to be held in Paris in September.

Schramm Speaks at Colloquium

The National Center of Scientific Research of the Ministry of Education of France has invited Dr. J. R. Schramm, professor emeritus of botany at the University, to participate in a Colloquium to be held in Paris in September.

The Colloquium will be devoted to a study of the contributions of French botanists to American flora in the 19th and 20th centuries. Dr. Schramm has recently joined the Department of Botany of Indiana University at Bloomington.

What Next, Mr. Engineer?

Your best move to make next is to check the outstanding opportunities a very particular engineering senior is sure to find at the Radio Corporation of America, world leader in electronics.

An RCA engineering management representative will be on campus.

WEDNESDAY, FEB. 22

See your placement officer now for your appointment. Ask him, too, for literature with the down-to-earth facts about RCA careers.

The GOODYEAR TIRE & RUBBER COMPANY

THIS IS ONE WAY TO LOOK FOR A CAREER, BUT...

You can't depend upon a crystal ball with your future at stake. Bell Aircraft has something tangible to offer... a rewarding career with the engineering team which is recognized for its important contributions in aigraft, guided missiles, electronic systems and other diversified fields. Here are exciting assignments—demanding creative engineering and rewarding individual ability and initiative. Get the facts from our representative.
