Freshmen And Sophomores Meet The Press

Prospective Heelers For Daily Pennsylvanian
May Speak With Staff Representatives at Smoker

Freshmen and sophomores will have an opportunity to see for themselves the activities of the Daily Pennsylvanian, at a mixer this evening in the Downham Club room in Houston Hall.

The advantages of being affiliated with a daily newspaper are numerous no matter what department or division of the University one is interested in. A staff member of one of the University's papers is down the block whenever one wishes to park their cars. The staff is also interested in the news and actively contributes to the variety of news and opinion. The Daily Pennsylvanian is especially interested in the students' suggestions and ideas for improving the newspaper.

President Wireman

From Karachi, First Stop

Dr. Gaylord P. Harwell, president of the University, called the University Monday morning for a tour of the downtown area. While in Karachi, Pakistan, he attended a conference on modernization and development in the Middle East.

The conference was organized by the United Nations Economic Commission for Asia and the Far East. The conference was attended by representatives from 40 countries and organizations. The conference lasted for three days and was attended by representatives from 40 countries and organizations.

The schools which Dr. Harwell visited were all cooperating with the University on educational projects.

Intergovernmental Cooperation

Called For by Mayor Dilworth

The City of Philadelphia will be strangled by the ever-increasing problem of traffic and transportation if it is not the neighboring counties do not cooperate, Mayor Richardson Dilworth and last night.

Speaking at a meeting of the Association of Public Administrators, the mayor cited the plan proposed by the Urban Traffic and Transpor tation Committee as the first "adequate approach" to the problem.

The plan calls for high-rise and mass transportation facilities to absorb the heavy traffic at present handled by the city's streets.

Until the facilities are in operation, he added, "no traffic scheme will work unless surrounding counties cooperate."

He estimated the cost of the plan would be $2.5 billion if the methods of mass transportation, at present in the planning stage, were put into operation within 15 years. The mayor estimated his "worst case" figure for the cost would be a Federal Government loan of $1 billion and the rest by the city and county governments.

Mayor Dilworth pointed out that the cost of present efforts to control traffic is $200 million a year. "By year's end, our systems must attract more riders through modernization and certain improvements," he said. "To keep the traffic off the streets is becoming more and more difficult."

Dilworth said the present system is not designed to serve the group's delegation, at meeting this evening, is in a constant struggle to find the best way to serve the group's needs.

Three members of the group, Morton Miller, Daniel Moskowitz, and Janice Englund were named as permanent standing committee.

Undergraduate Group Passes Anti-Discrimination Resolutions

Resolutions urging the University Housing Office to adopt non-discriminatory housing policies, and suggesting that the Daily Pennsylvanian and Pennsyl vania News not accept advertisements from landlords who practice discrimination were adopted by a meeting of a group of students yesterday in Houston Hall.

The students, brought together by the students for Democratic Action to consider the problem of discrimination in housing also resolved that the general purpose of the group would be to prevent discrimination in the field of housing for students of the University and that it supported the legislation of the Pennsylvania State Senate.

The meeting was the result of a desire to exchange ideas on the subject of discrimination and the housing situation.

The proposal of the trustees' housing committee, which is headed by a panel of landlords, is to be a test for all landlords seeking to stay in the University and the landlords.

The Housing Office's practice of letting landlords who practice discrimination was also scored. Although there are officially no rules for landlord discrimination, the fact that 20 of those who apply for student housing are usually sent to homes where it is certain discrimination is not present.

Add to that Dr. Baltzell, who was present at the meeting, his statement that most of the students "are actually living in slums and are being led into slums and the rest by the city and municipal government." The proposal of the trustees' housing committee, which is headed by a panel of landlords, is to be a test for all landlords seeking to stay in the University and the landlords.

The Housing Office's practice of letting landlords who practice discrimination was also scored. Although there are officially no rules for landlord discrimination, the fact that 20 of those who apply for student housing are usually sent to homes where it is certain discrimination is not present.

Haines' Performance at Saturday Meet Was "Surprise to Garden Newsmen"

By Hugh J. Janse

The name "Haines" has become synonymous with sprinting in collegiate track and field. His record in the 100 yard dash of 9.8 seconds, and his 220 yard time of 20.3 seconds are well known. In addition, his work in the hurdles, the 400 yard dash, and the 440 yard dash has made him a well known sprinter.

However, Feb. 28, 1956, the name Haines once more was in the news as he ran side by side with Penn's Willi am C. Brune, Lawrence W. Hansen, and James M. Spitzer.

At the first of the spring series of outdoor meets this year, Haines' performance was far beyond expectations. While in the 100 yard dash, he ran an average of 9.8 seconds, which is the third fastest time in the country for the 100 yard dash this season.

In the 220 yard dash, Haines' performance was even more spectacular. He ran the 220 yard dash in 20.3 seconds, which is the second fastest time in the country for the 220 yard dash this season.

In addition to his sprinting performances, Haines also excelled in the hurdles. In the 110 yard hurdles, he ran an average of 15.0 seconds, which is the second fastest time in the country for the 110 yard hurdles this season.

In the 440 yard dash, Haines' performance was again outstanding. He ran the 440 yard dash in 45.3 seconds, which is the third fastest time in the country for the 440 yard dash this season.

In conclusion, it can be said that Haines' performance at the Saturday meet was a "surprise to Garden Newsmen". His performance in the 100 yard dash, the 220 yard dash, the 110 yard hurdles, and the 440 yard dash was far beyond expectations and will be remembered as one of the greatest performances in the history of the University of Pennsylvania track and field.
Here's How

by Howard Boum

Dartmouth College's basketball team, having an over of 14 in favor, is in the lead for the first time this season. The Indians barely missed their first chance to clinch the N.E.A.C. championship with a gain victory in their last seven league games. However, the team looks as for as long as Dartmouth retains the Ivy League title, Big Green finishes up its season on a high note. They will finish the season with a winning record and it is the past indicates that the Harvard coaches will be in a a formidable team. However, the Big Green's are against Cornell.

PENN, which is third in the league this year, and

for third in the league title race.

PENN is behind only by two

up to the Ivy League title.

to the question of how should we do?...
Dartmouth Five Defeats Penn 74-60 at Hanover

By Dan Dawley

It was cold at Hanover on Saturday night, but inside Alumni Gym Pennsylvania's basketball forces were even colder as they lost a 74-60 decision to Dartmouth in a brutal evening contest.

The win was the team's high— and more important, the entire coach's extreme accuracy when it counted—from the foul line. In fact, it was free throws that provided the Indian margin of victory, as the two squads split eight of the 12 field goals. Dartmouth converted 30 of 51 shots against 27 for six in total; the Quakers ended the game 16-24 for Penn.

The win wasn't a very effective stopgap for the Quakers. Captain Joe Burgin broke through for nice finishes, five on tap—his two from 20 points, but his most effective support came from sopho

Cill Booner to Maloney, who started 12.

Penn opened with a 1-3-2 zone setup with Paul Maloney employed as the closer. To com- deress this strategy, the Indians aded their sixth triumph against two double at Cranshaw on Saturday with a 16-11 win over Pas- on the court nearly two months ago. THE CARE AND FEEDING OF ROOM-MATES

Today we take up room-mates, a delightful phenomenon of American college life. Having a room-mate is not only heaps of fun; it is also very educational, for the proper study of mankind is man, and there is no better way to learn the dreams and drives of another human being than to share a room with him. This being so, it is important to keep the same room-mate too long, because the more room-mates you have, the more you will learn about the dreams and drives of human beings. And that’s what we’re all after, isn’t it?

Now let us discuss how to go about choosing a room-mate. Most混凝土ers agree that the most important thing to look for in room-mates is that they be people of regular habits. This, I say, is not an inordinate amount. What if one of your regular habits happens to be beating a great song from midnight to three a.m.? Or growing cultures in the toothpaste? Or reciting the Articles of War? Regular habits indeed! I say that beyond ridicule, for and the most important quality in room-mates is that they be exactly your size. Otherwise you will have to have their clothes altered to fit you, which can be a considerable nuisance. In fact, it is sometimes flatly impossible. I recall one time I roomed with a man named Tromblett Chance who was just under seven feet tall and weighed nearly four hundred pounds.

But I digress. Let us get back to the qualities that make delectable room-mates. Not the least of these is that they are the cigarettes they smoke. When we borrow cigarettes, do we want them to be harsh, shoddy, and disdaining of our palates? Certainly not! What, then, do we want them to be? Why, we want them to be gentle, delicately-privileged and designed to suit the tempo of today’s broader, easier life! And what cigarette is gentle, delicately-privileged, and designed to suit the tempo of today’s broader, easier life? Why, Philip Morris, of course! (I bet you know all the time!)

To go on. In selecting a room-mate, take great pains to find someone who will wear well, whom you’d like to keep a permanent friend. Many of history’s great friendships first started in college. Are you aware, for example, of the remarkable fact that Johnson and Boswell were room-mates at Oxford in 1727? What makes this fact so remarkable is that in 1727 Johnson was only three years old and Boswell had not been born yet. But, of course, children are forever forming ties by then. Take Wolfgang Amadeus Mozart who wrote his first symphony at the age of four; or Titian, who painted his first masterpiece at five. Oswald Otto McIntosh, who was in many ways the most remarkable of all; he was appointed chief of the Copenhagen police department at the age of twelve. (It must be admitted, however, that the appointment was less than a success. Criminals roamed the city, robbing and looting at will. They knew young McIntosh would never take them; he was not allowed to cross the street.)

The makers of Philip Morris, who sponsor this column, cordially invite you and your room-mate to try today’s new, gentle Philip Morris. It’s always welcome.
