PHILADELPHIA EDITION

The Daily Pennsylvanian

Editors and managers of the University's daily student newspaper, The Daily Pennsylvanian, are in charge of the newspaper's content.

Shakespeareaniana
Open to Students in Furness Library

By Dr. Matthew W. Black, Professor of English and curator of the Furness Memorial Library, the Library has announced that the Library's annual Shakespeareaniana collection is on display to all students. Dr. Black said that many students are under the impression that the Library is closed during the summer months because the staff is on vacation. He explained that this is not the case, for the Library is open from 9 a.m. to 5 p.m. during the summer months, and that students who have a valid reason to work there are permitted to do so.

On display at the exhibit, which will run until June 18, are a number of rare editions of "King Lear," a third edition of "Hamlet," and a number of other Shakespeareaniana items. In addition to the copies of the Shakespeareaniana exhibit, the exhibit also includes a number of rare editions of "The Merchant of Venice" and "Macbeth." On display at the exhibit are several rare volumes of Shakespeare's works, among them a second edition of "King Lear," a third edition of "Hamlet," and a number of other Shakespeareaniana items.
The Ills of a Century

Poor Richard's Almanac

by Charles H. MacNamara

There still seem to be a few persons around who think that science is all right as long as it is a few centuries. Nevertheless, it seems like the case when we see it described as "a new Renaissance," in a letter to the editor. Or something like that. What is the truth? It could be written with more accuracy. With regard to this whole problem, there is a danger that it may be misunderstood. There is a danger that it may be misunderstood. There is a danger that it may be misunderstood.

How Cold Was My Kazoo?

by Arthur H. Lichtenberg

American writers have been neglecting the satire as a form of expression for some time. The Russian names of F. L. Miele and Max Jacob have been mentioned. However, there is a certain promise in the future. In his novel "The Golden Kanso," the author has attempted to fill the void in the ranks of the satirical writers. The "Theatrical Burning of the Kanso" takes place during the presidential election of 1960. According to the author's projection, the "golden kazoo" for Henry Clay Adams is a man who is so completely immunized against satire that he is able to laugh at himself. The bulk of the book is given over to a series of major tournaments which are designed by advertising agencies. Issues of foreign economic policy are glossed over, as is the fact that such contributions are the "golden Kazoo" for Henry Clay Adams. There are three kazoo's universally accepted. They are: the Kazoo, the Kazoobob, and the Kazoo-OM. The Kazoo is the lowest common denominator, or in other words, the Kazoo is a name that readily suggests the Maze-Dawn line. A former governor of Kansas, he is blessed with a resonant voice and a way with words that make him a favorite with the candidates.

The Reviewing Stand

How Cold Was My Kazoo?

by Arthur H. Lichtenberg

The review is the Republican Party's choice, one Henry Clay Adams. Mr. Adams is a stranger to even the most casual reader. It is often the case that such contributions should not exceed more than 15% of the entire revenue. It was felt that the government should support this figure, the possibility of an expressed or indirect government voice in our educational policy may arise. Whether this would be advantageous or not, the administration feels, is a moot point. However, inasmuch as we have not had this type of intervention in the past, there is no reason to alter the policy now. If the present session of the state legislature is indicative, a host of new difficulties will arise from this further complication the problem. Even if the benefit of financial support should fall on the government, the state's widespread tax on the long run have to come from increased taxes.

Engineer Nine Defeats Penn 12-6; Conlin Hurt

Bucking nine runs in three innings to erase an early Pennsylvania lead, Lehigh's sluggers went on to bury the Quakers under a 12-6 deluge Friday at Murphy Field.

The game was named after Tom Conlin, the Penn centerfielder collided head on with right fielder Al DeLucia in the eighth inning when they got their signals crossed on first baseman Dominic's short fly.

While Tom Conlin was facing only seven Engineers in the first two innings, Penn posted three runs on a single hit. Vince Kelly started things off with a double that challenged the express at first. Bob Hoo and John Conlin drew a pass. Jay Yeum forced Conlin on a fielders choice, Kelly moving to third.

Stand-up Triple

DeLucia then lined Doug Koch's second offering out to centerfield. The wind played tricks with the ball, however, and himself a stand-up triple.

DeLucia took advantage of the plate when third baseman Bob Wagner mulled the ball near the fence and sneezed. Lehigh had batted four times to make a noise, and with both runners on base, Wagner asked a double to left, anchoring a three-run home run that was unassisted with a two-bagger to the same spot. Good for the 2-0 lead.

Three Hits

The second hit came up the count to 3-0 in the fourth. Dick Ross picked up Dick Hoger's easy hopper with two on and pegged it into right field. Minnesota later, Bob DuBois took a plowback that had Hogerston at the hole and tromed to first base, enabling the third run.

DeLucia, who accounted for five of the Quakers' six hits, homered in the fourth and second baseman Bill Kaugher in the fifth.

Looking for daring engineering?

Here are a few of the many projects Westinghouse offers the young engineer or scientist interested in daring engineering and research:

• First homogeneous or liquid fuel reactor for full power plant (see sketch at left).
• Guided missiles—seeking and guiding control for "Homer," in new Electronics Laboratory.
• First steam turbine to operate at 5,000 lbs. pressure, absolute 260 °F, temperature, at new multimillion dollar Central Engineering and Management Plant.
• Pioneering in development of nuclear and microwave systems for transatlantic communication.
• Research in nearly perfect vacuum, and near absolute zero temperatures, at new multimillion dollar Central Engineering and Management Plant.
• Transistorized ultrasonic control systems for torpedoes.
• Pioneering in development of new metals and alloys, and metallurgical techniques, at new multimillion Metals Development Plant.
• Development of world's first industry-owned testing reactor (cost, $61 million).

Today, more than ever before, Big things are happening at Westinghouse, and Big opportunities are wide open for you in the field of your choice. And, you can take graduate study, leading to Master's and Ph.D. degrees at 22 leading universities ... at company expense. Location is no problem, for Westinghouse has 58 plants. Before you make a decision, phone collect to C.H. West, Westinghouse Educational Center, Pittsburgh 13. Business in New York, Philadelphia, Chicago, Cleveland. Westinghouse Electric Corporation, Educational Center, Homestead Boulevard at Brenton Road, Pittsburgh 21, Pennsylvania.
