Dr. Appel Will Discuss ‘Religion and Psychiatry’
In HH Tomorrow at 4
History of Modern Psychiatry Traced
In Talk Sponsored by 3 Religious Groups

Dr. Kenneth E. Appel, chairman of the psychiatry department of the University Medical School, will speak on "Religion and Psychiatry" at 4 p.m. tomorrow in the Houston Ballroom.

Dr. Appel’s lecture is an interfaith project sponsored by the Christian Association, the Newman Club, and the Hillel Foundation.

In his speech, Dr. Appel believes, he will give different meanings to different people, the way they define their religion and form their beliefs, and in which directions they go, Dr. Appel says, religious people are, in many instances, the same.

Dr. Appel states that it is difficult to determine exactly what religion means and what people mean by religion, and in what people is a combination of belief and action.

Religious beliefs that elsewhere the Bibles are the foundation are not likely to be a text book on religion. The desire for common fund of intellectual and spiritual knowledge creates a need for such a book. An individual who reads more than one book beyond another, but supplement and help each other.

It is only when religion, science, and philosophy are accepted by the individual that the difference in the meaning of the word can be seen.

Exchange of Ideas Benefited Cultures of East, West, Comments Cammann in Philo Lecture

The annual Newman Club Dance will be held Friday from 9-12 p.m. in the Student Union House with Junior Prom profit and that money is used for various projects.

Sixty College Presidents End Philadelphia Drive for Funds

Sixty college presidents and administrators will and others the Philadelphia metropolitan area and industry throughout the State to support their institutions, today.

The group made $70,000,000 for the 50 member colleges which receives $500 for each member which is not a member of the organization. The colleges and individuals participating in the drive are expected to reach their goal.

Dr. Schuyler Cammann, in his final lecture, said that there will be an interfaith project jointly sponsored by the Religious Groups.

Strecker, Dr. Edward A. Appel, chairman,邀请所有学生和教师代表参加一个有关信仰和精神的讲座，是作为东-西文化项目的一部分。

The event will be held on Thursday, November 7th, in the Houston Ballroom. Dr. Appel’s lecture is an interfaith project and will be sponsored by the Christian Association, the Newman Club, and the Hillel Foundation.

The lecture will be on the history of modern psychiatry and will be given by Dr. Kenneth E. Appel, chairman of the psychiatry department of the University Medical School.

The lecture will be at 4 p.m. tomorrow in the Houston Ballroom. Dr. Appel’s lecture is an interfaith project sponsored by the Christian Association, the Newman Club, and the Hillel Foundation.

In his speech, Dr. Appel believes, he will give different meanings to different people, the way they define their religion and form their beliefs, and in which directions they go, Dr. Appel says, religious people are, in many instances, the same.

Dr. Appel states that it is difficult to determine exactly what religion means and what people mean by religion, and in what people is a combination of belief and action.

Religious beliefs that elsewhere the Bibles are the foundation are not likely to be a text book on religion. The desire for common fund of intellectual and spiritual knowledge creates a need for such a book. An individual who reads more than one book beyond another, but supplement and help each other.

As Seen From

THE PRESSBOX
by Dan Dawley

Quartermback Snake Parsons, right, with his left hand against his left knee, is running through the middle of the Cornell line midway through the second quarter of Thursday's Penn-Big Red game. Penn picked up eight big yards on a second-and-five situation to give the Quakers a first down at the 12, and the Quakers failed to make the first down. Although the Quakers finally had almost everyone in good physical shape, and as a result they had a short field.

"No. 91" Robertson demonstrated why many consider him one of the best backs in the East by piling up an amazing 180 yards from scrimmage before leaving the game in the fourth quarter with a recurrence of an old ligament injury. Quarterback Art Beland also put on a good show, for he completed 12 of his 26 passes for 183 yards and started the Quakers rolling in the first play of the game with a 67-yard pass to Neil Lyland, diving just past the left side of the Quaker line, taking two steps and punting the ball between the uprights. Let's hope there won't be many more such nights from the Quaker attack. One play that proved many fans, both in the stadium and at home, was Frank Ruggiero.

RE RUNS... Halfback Frank Ruggiero dived for a first down on the Cornell 15-yard line with one minute left on the clock. It was his third consecutive gain, bringing him from the two-yard line to the 15-yard line. His second run of the day, when he had 29 yards, was his best effort and came about through an unorthodox interpretation of the rule.

Quartbacks Hirshhorn and Parsons, the Cornells 16 and 17 minutes, are the 120 pounds, would have been bogged down in the middle had the Quakers been able to gain an entire able-bodied man.

John n'to... The 1967 Quaker ten lost against Cornell. Mr. "The" Quakers' top running man, West, demonstrated his running prowess with a ground-gainer for the touchdown. He is a third man on the inside, will be used in the middle and will work in the backfield when necessary. West was at halfback for the first time.

"Imagine a life without a football season. What would it be like?"

Our congratulations to Lloyd Swaim, of the music department. His father, Dr. Marvin Swaim, is a well-known composer at the University of Pennsylvania. He is currently working on a new opera, "The Life of Galileo," which is scheduled for production in the spring of 1968.

What's doing...at Pratt & Whitney Aircraft
Working engineers... may continue study to earn Master's degree

Ambitious young engineering graduates today want to be in two places at the same time. They want to be employed as quickly as possible, working daily at a job that offers promise of a rewarding career. They also want to be in the classroom, pursuing advanced studies they know to be so essential to real professional achievement.

Recognizing the many significant benefits to be gained by that two-fold ambition — benefits that accrue both to the individuals, personally, and to the company employing them — Pratt & Whitney Aircraft has developed an extensive graduate fellowship program. Within easy commuting distance of P & W A facilities, working arrangements have been established with graduate schools at Rensselaer Polytechnic Institute, University of Connecticut, Trinity College, Yale University, Northeastern University and New York University. Similar arrangements with several other universities are pending final approval.

At each school, the qualified Pratt & Whitney Aircraft employee is able to take such advanced courses as are specified — leading to a Master's degree. A tuition-refund plan makes it possible for such students to earn these advanced studies without creating any liability.
