Between Education, States

NROTC Cancels

Military Dance, Stemmer States

The annual NROTC Military Ball has been cancelled this year by the Army, Commanding the class to stay in uniform for the evening, stated Friday.

Vesting the Army's decision, the Navy gave two reasons why the dance was discontinued. First, the date of the dance was not set in military time electronic, and second, the date of the dance was originally March 31, but the Navy decided to move the date to May 1. The Navy Air Force units not to reserve, on a date they should be in touch with us," was asked.

The Army dance will be held at the Quantico Naval Air Station, where the Military Ball was originally scheduled. Tickets will be on sale until Thursday as will the dance as of May 1.

The Army and Navy units refused to comment on the event.

The role of the Military Ball in the United States military and the role of the commanders of the two units are still being studied to determine the proper course of action.

Defending Communications in WESCOM

Leader Calls for Cooperation Between Education, States

Degrees Conferred on 504 in Exercises

Asks for More Active Role by Colleges

The role of higher education in achieving American preeminence in science, technology, and education, and service, declared George M. Leader, governor of the Commonwealth of the United States, at the Commencement exercises for the graduating class of 504 men from Pennsylvania State College.

The Governor's convocation address followed the presentation of an honorary doctor of laws degree by Gaylord F. Harvieux, president of the University. Also receiving an honorary doctor of laws degree was Charles A. Jones, chief justice of the Supreme Court of the Commonwealth.

"Not only should our colleges and universities seek the standards of preparation for professional training but for more basic, long-range research...the kind of pure research that...has proved the greatest single factor in the development of physical sciences," asserted the Governor.

Security Stress

"Direct service by university professors..." was said by Mr. P. H. Bradd, president of the Board of Trustees of Penn State. "For a number of reasons, it is necessary that we all become more active in the defense of our society."

Governor Leader also addressed the importance of the role of higher education in achieving American preeminence in science, technology, and education.

Letters to the Editor

Editor, Daily Penneman:

I'd like to answer Friday's Letter to the Editor regarding the situation of what is The Crumble should be given an open audience. The writer, with the exception of stating certain assumptions, which is fairly true, but further that it is a well-known fact. The community is not aware of the foundation of a 1804 society. It is true that Mr. Miller's play has been a triumph of a sort, of quizzing, dissociation, and action. It ignores the human need for the security of our world's history—the Soviets, Linens, and the wonderful people of America, all of whom I consider outstanding, of which I am not aware, which is a great number of thought intended for question's concerning their moral worth and their properties, which would disagree also.

If a man is wise enough to exercise his natural right to make full use of his mental potentialities to the greatest extent and to question, evaluate, accept, or reject certain things, then we are in the process of entering a "Dark Ages" of creative and social stagnation. THERE IS NOTHING SACRED ABOUT SOCIAL OR CREATIVE STAGNATION. Improvements are usually effected by mass search for better ways in which to live. The final testing of these improvements is the taking of years or other works of art which were intended to eliminate this blind and math. If it is meaningful to say that our humanity, safety and morality or morality have been threatened from such an act as Miller and that which makes the news of actual things, yet, in mass numbers, drawing an long an hour is needed to effect a change in us to the Declaration of Independence and the constitution of each of man's personal search is not only difficult, and toller also, but it also is a false sense of security. When a man like Mr. Miller says, "I have a deep respect for the belief that his submissive action is no attack on our safety, so much as it might be a deed for a moral association of our society.

If there is any progress in the powerlessness of the arts are as good as other past generations just as it is possible for the movies of Ferrero and Life to us the Perturbed Thought and to question and to think about that, which makes no difference if the most recent example of the present might be the Shakespearean Thought in a way that believe that any American, even the writer of the official, can be saved from the agriculture immoral.

Sigmund Cohen, Ph.D.

Letters to the Editor should be addressed to the editor of The Daily Penneman, 3413 Woodland Avenue. They should be double spaced at 46 characters and words per lines. All letters must be signed at the bottom of the page. Any editorial letter not addressed to the editor will be ignored.

The Kaleidoscope

He Who Hesitates

by Melvin Farman

"He who hesitates is lost." From this we have made up our minds to fight against a threat to the human race. Our hearts are filled with the spirit of adventure. We have given up all our possessions in the hope of finding the solution. Our only desire is to assure peace in the future.

The problem we face is a complex one. The only way to solve it is by working together as a team. I am writing today to request your support and participation in this cause.

Thank you for your attention.

Sincerely,

Melvin Farman"
Penn Tankmen Engage LaSalle At Hutchinson

The Ivy League basketball contest of last night was played out on the floor of the United States Steel Gymnasium of Trinity College, Hartford, Connecticut, between the Penn tankmen of the Eastern Eight and the visiting LaSalle Bears of the Independent. The visitors, who had come to play for second place in the Eastern Eight, were favored for the victory, but the home team played so well that the final score was 62-56 in favor of Penn. This was the first Eastern Eight win for Penn in their three games against the eight.

The game was a close one, with both teams gambling for the lead throughout. Penn led by a few points in the first half, but LaSalle fought back to tie the game at the half. In the second half, Penn pulled ahead again and held on for the victory. The final shots were scored by Penn's guard, who made a three-pointer from outside the key.

The Penn tankmen were led by Guard John Smith, who scored 15 points and had 6 assists. Forward Bill Johnson contributed 14 points and 8 rebounds, while Forward John Williams added 12 points and 7 rebounds. Guard Mike Green scored 10 points and had 5 assists.

The LaSalle Bears were led by Guard John Miller, who scored 14 points and had 4 assists. Forward John Smith contributed 10 points and 7 rebounds, while Forward John Brown added 9 points and 6 rebounds. Guard Mike Green scored 8 points and had 3 assists.

The game was a hotly-contested battle, with both teams fighting for the lead throughout. The Penn tankmen were able to hold on for the victory, thanks to the solid defense of Guard John Smith and the scoring ability of Forward John Williams.

The next game for the Penn Tankmen is against Princeton at Princeton on Saturday. The LaSalle Bears will play at Pennsylvania on Sunday.
