Effective Presentation of Material Relies on Intermediate Thought, Mrs. Bowen Tells Graduate History Club in Lecture Last Night

Mrs. Catherine Drinker Bowen told the Graduate History Club last night on the topic of "The Biographer's Use of Historical Material."

Written essays are a good job of gathering material and writing it down, but they frequently forget the intermediate thought which is essential to effective presentation, Mrs. Catherine Drinker Bowen said last night.

Speaking before the Graduate History Club, Mrs. Bowen, a well-known biographer, lectured on "The Biographer's Use of Historical Material."

"The Biographer's Use of Historical Material" was the last lecture in the Graduate History Club series. The club was established in the fall of 1952 to provide a forum for the discussion of graduate level topics.

Important Considerations

The author of numerous books whose three have been Book-of-the-Month Club selections, Mrs. Bowen stated that there are four important considerations in writing a biographical work. These are, she said, the choice of subject, method of research, form, and ultimate aim in writing the book.

She then pointed out the pitfalls encountered in writing five books:

"When using a great many notes, be careful not to let notes of a Source Material (a bibliography) be tangled up," she said. "When I am a little bit too much of a note-taking freak, I tend to get the feeling that the master's are mastering the writer. You must master your material or it will master you."

Mrs. Bowen then observed that picking out the most important sentences and quoting them while only explaining the rest of the section, she explained how she was able to absorb in an incident for one of her books that she wrote in a whole chapter of A. R. Bloch, in her book "The Gilded Age:"

Workers of the World

by Herbert Stein

Perhaps the most significant statement of the evening was that of J. A. Davison of the American Federation of Labor, a member of the Congress of Industrial Organizations. Davison said that there is no future for the Socialists. 

"For forty years the American Worker has been told the American Worker that he cannot get along without him, but, because of our moral, social, economic, and political needs and demands, and at the expense of the democratic rights of the workers, he has rejected Socialism and political parties and has joined with other political and religious groups," Davison believed that the Socialists can be discredited.
