A Two-Fold Program

by Michael L. Steiner—

For a number of years a certain segment of the students at the University of Pennsylvania has been a world of conflicting values and ideals. Nowhere is this尤为明显 than in the Pre-medical School. The pre-med student is often faced with a great deal of choice which, in the final analysis, is his own. The pre-med student must choose between two paths: the path of academic excellence which will lead him to a career in medicine, or the path of less rigorous study which will lead him to a career in business or some other field.

The Two-Fold Plan

Obviously some line of competence must be drawn whereby the academic excellence and the business competence both be represented. The Pre-Medical Advice Office serves to inform the student of his options and to guide him in his decision. The advice office is manned by two faculty members who are knowledgeable in the field of medicine. The advisor is responsible for selecting the students who will be admitted to the Pre-medical program. The advisor also serves as a guide for the students who are interested in pursuing a career in medicine.

The Two-Fold Program

It is in this capacity that the committee performs its general function. At the close of each semester, the committee reviews each student's progress in the sciences. A conference is held with the student to discuss his progress and to determine if he should continue in the Pre-medical program. If the student is found to be unsatisfactory, he is recommended to the dean for possible discharge from the Pre-medical program.

The Pre-medical Program

The Pre-medical program is designed to provide an adequate knowledge of the sciences necessary for entrance into a medical school. The program includes courses in biology, chemistry, physics, and mathematics. The student must also complete a minimum of 30 credit hours in the sciences.

The University of Pennsylvania

The University of Pennsylvania is a private research university located in Philadelphia, Pennsylvania. It was founded in 1740 and is one of the nine colonial colleges and universities in the United States. The university offers a wide range of undergraduate and graduate programs, including medicine, engineering, and the arts and sciences.

I'm a liberal arts senior...

no specialized training

but I've heard there are

time opportunities at

AETNA LIFE for me in my

MANAGEMENT TRAINING PROGRAMS.

You can bet I'm going to talk to their representative and find out more about what they have to offer!!

As a student...

I'm getting a little discouraged at various times and feel I'm not making the best use of my time. I've been trying to find a job in the summer, but haven't had any luck. I'm glad to hear that AETNA LIFE is offering training programs. I'll definitely look into that.

I've been thinking about applying for a job in the insurance industry, but I wasn't sure if I had the right qualifications. The training programs at AETNA LIFE sound like a great opportunity to learn and develop my skills.

I'm interested in pursuing a career in management, and I think the training programs at AETNA LIFE could be a good fit. I'm interested in learning about the different aspects of the insurance industry and gaining hands-on experience.

I think the training programs at AETNA LIFE could be a valuable way to gain practical experience and build my resume. I'm excited about the possibility of working in a dynamic and fast-paced environment.

The training programs at AETNA LIFE sound like a great way to get my foot in the door of the insurance industry and build my skills and experience. I'm looking forward to learning more about the different roles and responsibilities within AETNA LIFE and seeing how I can fit into the team.

I'm interested in the management training programs at AETNA LIFE and would like to know more about the different opportunities available. I'm particularly interested in learning more about the customer service and sales roles.

I'm interested in exploring the different training programs at AETNA LIFE and seeing how they could help me achieve my career goals. I'm open to hearing about any programs that might be a good fit for me.
