Published Report Rejects Blame On Development

In a recent published report by the University, "Standing Together — The University and the City," the possibility of locating a campus to clear and redevelop land area within the city limits of the building of women's dormitories was disclosed by the University.

The section of the report, which was printed in "The Daily Pennsylvanian," states that "the Pennsylvania Redevelopment Authority, with the understanding from the City Planning Commission designated the site that should be cleared and redubed."

In the introductory page the Authority invited the University to consider the possibility of the development of the area. Since that time, the report indicates, the 12-acre tract would serve "as a model for this technique," and it has been successfully developed and cleared of all structures.

Transfer To Be Acquired

Given the approval, the Authority will now make the further study of the University's request to extend the University's development to the area. The project, if approved, will result in the University being able to develop the area without the need for additional financing.

The report, which was commissioned a prominent architect to draw up a plan, includes several feasibility studies of the area. Among the many feasibility studies, the report considers the possibility of a transfer to the campus for the University. The report finds that the area could well be used as a transfer to the campus for the University. The report finds that the area could well be used as a transfer to the University, and that the area could well be used as a transfer to the University, and that the area could well be used as a transfer to the University.

Monday's Deadline For Queen Entries

Deadline for entries in the Ivy Ball Queen Contest is Monday May 11, chairman for the contest, announced yesterday.

The contest will be open to any girl attending the University, the winner should be announced at the Awards Banquet, which is scheduled for May 17, at 7:30 in the Thaddeus T. Shreve Building.

The purpose of the contest, it is stated, "is to select a woman who is the best representative of the University and to award the title to the student who is selected."

The contest will be open to any girl attending the University, the winner should be announced at the Awards Banquet, which is scheduled for May 17, at 7:30 in the Thaddeus T. Shreve Building.

The winners will be chosen from a panel of judges, consisting of the University's faculty, including the Department of English, the Department of History, the Department of Philosophy, the Department of Physics, and the Department of Mathematics.

The queen will be crowned at the end of the competition, and a plaque will be awarded to the winner. The plaque will be presented to the winner by the Ivy League, and the winner will be chosen by the University's faculty, including the Department of English, the Department of History, the Department of Philosophy, the Department of Physics, and the Department of Mathematics.

In the annual meeting of the operations research society of America, women will be held on May 11, 1951, at the Penn University Hotel.

The meeting, which is co-sponsored by the University and the Ivy League, is to be held in the Penn University Hotel.

The meeting will include discussions of recent developments in operations research and management science, as well as presentations of current research in the field.

Radioactive Fallout

Dangers Without Number

by Justin W. Heatter

Among the present dangers of the world stands the reactor, which may have enough fissionable material to yield a bomb at least equal to the Trinity bomb. Until recently, its potential danger has been generally underestimated, but now, with the development of techniques for the control of the reaction, its potential danger is coming to be appreciated. The most obvious threat is the possibility of its use in a military context for the purposes of deterrence or surprise attack.

Effects Are Expected

dr. DeSchutter's remarks, he drafted on the possibility of certain genetic effects in the human population resulting from the use of a nuclear weapon. He pointed out that the realization of such effects is not a matter of mere speculation, but that they are a matter of scientific concern.

The possible effects of the atomic bomb on the human population are of great concern to medical and scientific communities worldwide. The potential for serious harm to individuals and communities is real and must be acknowledged.

Pennsylvania's Newest Squad in Action

Stickmen Meet Drexel; Seek Third Victory

Begun by its powerful showing in overcoming Lafayette Saturday, the varsity lacrosse team tackled the Drexel Dragons on the Drexel home court at 6 p.m. and prevailed. 2 to 1. Freshmen Bob Humber led the Davids and the All-Americans, Denny Birkett and Bob Shuman, led the Dragons. The game was suspended in the third quarter due to rain and will be continued on May 1. The Drexel team was awarded a 2-0 victory.

The following day, the Quaker team played against Temple University on the fifth ribbon of the seventh inning. Templeans, who had never before scored a run in the Quaker Park Press, finally put one run on the scoreboard. This was the only run scored in the entire game. The Quakers were snapped by the game, and the contest was forfeited to the Drexel squad when Templeans refused to leave the field.

Frosh Runners—Face Delaware

Coach "Red" Monson sends his undefeated freshman track charges against Pennsylvania State University this afternoon at 3:30 on the Birds' track.

The first-year Quakers have already captured their second indoor season title and three meet titles during the outdoor season, and thus far, it is obvious that this is the best freshman track team at the University since 1951, which included 19th- and 21st-century stars.

First last Saturday in New York, the Red and Blue Blue closed out the season with a 134 to 52 victory against Penn and a 120 to 51 victory over Drexel.

Barney Kellinger, the individual medley winner, scored 14 points against the Lions, including a new high jump and long jump, and a third place in the 300 yards. Kellinger will compete in the same events today in the Delaware meet.

Frosh Golfers Play

Penn State's Frosh Golfers played a match against the University of Pennsylvania at Hill School today in an effort to be better than the 1-4 mark. Penn has beaten Harvard School and holds a strong Lawrenceville team, 4-2.

Golfing number one for the Red and Blue is Don Nitsch. Nitsch played for the Red and Blue golf set Joe Calabrese, Frank Egan, Mike Femia, Joe Grappie and Bill Grossman.

Steve Adamson

and his  "The Red and Blue also loved to the Groom."

Coach Bob Matthews' lineup was bolstered by the return of Dave Briggs to the attacking midfield and the return of Carl Weiser to top form. Briggs, who has sidelined him since the opening of the season, scored a goal out of 11 aerials.

Weiser, who had led the entire game and then found himself off the starting unit for a while, re-entered against Lafayette and scored six goals. Bob Sobel, tallied three times and Fred Feldman hit the nets twice. Steve Adamson will open at goalie.

Frosh Tennis Action

Seeking to meet a four-match losing streak, Pennsylvania's freshman tennis team journeys to Pennsylvania this afternoon to face a strong Hill School team.

The Penn Frosh will have Gray, Perkins, in the number one spot. Perkins is a Hill School graduate. Bill Caldwell will be playing two with John Feldman and Dick Harrison in the third and fourth positions. Charles Bishop and Dave Beloff will round out the Penn six.

Questions students ask Du Pont

"Do you hire men who have definite military commitments?" asks Owen A. Riter, Jr., of Louisiana State University. Yes, because Du Pont has always been interested in men of a large type. Du Pont has employed many graduates with military commitments even though they were due to report for duty a few weeks after joining the Company.

"Would a graduate degree help my chances for advancement at Du Pont?" asks Gaylord E. Moss, of Tufts College. Many factors are involved, and an advanced degree would undoubtedly have a favorable effect in all technical work, but it would probably be of more direct benefits in research or development at Du Pont than in production, marketing or sales.

"Now are chances for advancement in a large company like Du Pont?" asks John C. Frontenac, of Villanova University. Good! Du Pont is large, but it's made up of 11 independent departments, like smaller companies under one management. And it's a basic policy of the Company that, within wide limits, men are given chances to prove their worth.

We can give only brief answers to these questions in this space. But we'll be glad to answer them more fully, and to try to answer other questions you may have that bear more directly on your own future. Why not write us today? Address: The Du Pont Company, 206C Nemours Building, Wilmington 90, Delaware.
