Survey Notes Lack of Ph.D.'s In U.S. Colleges, Universities

American colleges and universities cannot have enough Ph.D.'s to keep up with increased teaching loads. Institutions that do not have enough Ph.D.'s include the National Education Association, the American Society for Chemistry, and the American Society of Civil Engineers. The reason for this lack is that many universities are not able to attract enough Ph.D.'s to fill their teaching positions. The reason for this is that many universities are not able to offer competitive salaries, and many Ph.D.'s are looking for positions in industry or government.
