Dorm Council Names Hoyler As President

CARL C. HOYLE

Carl C. Hoyler was elected president of the Dormitory Council for the 1962-63 work year. The council will meet at a meeting held last night in the Room of the Dorm Council.

Also elected were Andrew Gadzic, as vice president, and Walter E. Stoudt, as treasurer. The secretary of the council was not named.

Fadiman Sees Scarcity Of Intelligent Persons Vs. Wholesale Need

By Richard H. Sargent

As President John F. Kennedy has pointed out, there is a scarcity of intelligent persons. It is this scarcity which led to the establishment of the Scholarship Fund at the University.

At the very time when America needs "intelligence in wholesale lots," well-educated men and women who are in short supply are actually withdrawing from the ranks of our educational system. Author and columnist Clifton Fadiman asserted last night that the funds so badly needed in "The Need for a Scholarship Fund" at the Museum Auditorium as the fourth speaker in the University Lecture Series, pointedly attacked so-called "progressive" educations and expressed concern over the post-Sputnik reforms in the school system are being reprinted.

The current movement to correct this situation, he said, has arisen, he declared, out of the fact that "the intellect is a product of the mind, but other because America was able to absorb the young fox with a cay.

"We are now prepared to revolutionize American educations because the diplophib in wholesale lots is to kill America," he said.

Fadiman declared, by the way, that "we are now all members of the same class," and that "everybody has a right to education, and the role of the whole society is to provide that education.

Intelligent minds are necessary in order that the individual will be faced with both the opportunities and challenges affecting the whole society. Every society, wherever it is in America's development, will respond to the leaders who created the Union—Adams, Franklin, Jefferson, you name it—"with intellectual intelligences who had brains as well as brawn.

But the increasing need of the current resettlement, he said, we still admire the remnant of America's long past. On the social and cultural front, we will see a new wave of students that they can adequately handle, he said.

Technologically, Fadiman asserted, "the American educational idea is to develop the citizen, movie, television and spectator—the idea and the competition for the school child's time and attention."

Villanova Vice-Dean Tells

Thomas J. Voyce, vice-president of Villanova School, will speak on "Ownership in America" to the Nova Club at 11:30 a.m.

(Dallas, a former clerk in the Pennsylvania Supreme Court, is a veteran of television and legal training from Harvard Law School which has awarded him superior in both W.A.B. and L.B.D. degrees.

Thru the will also be accompanied in "The New President" by Gene Davis in defending the title of the Baltimore Sun, the college's first yearbook.

Alex DeLuca, head of seven boys at the University, was honored as the outstanding athlete of the year at the annual meeting of the Varsity Club. The award was given an

The Triangle
by Robert Marrit

An appeal of spring is a seasonal reawakening of various and myriad colors and epitaphs. One of these recently conscripted is the Pennsylvania Triangle. For a while now, its presence has been felt in the lives of students. Indeed, we feel that the Triangle is made up of a group of students with a common interest and a common intent. Its menu is gentle and quite effective.

In the artistic section, Dr. Ernest Pyle exalts the past, present, and future of population, touching on the "classical" Triangle. The problem of high temperature conduits at high class standards, the problem of the school's social and intellectual environment, the problem of the courses involved in the same field for junior conversation. The scene is clear and quite effective.

In the political section, Mr. Warren Link extols the need for an editorial for the undisciplined folks who, as students, have their well-being and moral welfare in mind. So, the editorial committee of the Triangle is calling for the next meeting. A New Issue, April 11, Night, Warrent Link

A Word of Thanks

Two of the most enjoyable parts of our selling office are the opportunities for developing new relationships with new, friendly people and allowing for the continuation of friendships which may have existed for some time. In this latter, we are very much aware of our relationship to the students, to the students who have used our store in the past, and to the students who have developed a relationship with us over the years. The Triangle is a place where we can all meet and enjoy each other's company.

In addition to this, we shall have to talk with the schools, with the students, and with the teachers and administrators, and in doing so, we shall have to talk with the parents. **Garnet Nips Varsity Netmen; Yearlings Win In First Outing**

Quaker Stickmen Down Lehigh, 6-3, For First Victory

Penn's varsity tennis team proved away from it all yesterday and won their first game this season. When they got away from one post-study campus and their back nine course, as they did on the Lehigh tennis court, 6-3, on Sunday.

It was a first goal for the final period to overcome a 5-3 Engi- neer lead after the Quakers had taken command at 3:0 in the final half.

Attacker Rick Levin scored two goals in the final period, but the Lehigh teniemen tried to take the lead on second period marks on the 14th.

Having been their first half lead discontinued, the Red and Blue stadium men moved in on again in the final stanza. Feller, leading scorer for the Quakers, ripped the goal three times and Lehigh put the score on the victory cake with one more goal to raise the final count to 4-4. Along with Feller and Levin who shared the scoring honors with three points, captain Irv Lieberman did an outstanding job in placing his defensive post.

**Frosh Golfers Win**

The Frosh golf team enjoyed a victory over Lehigh, 14 strokes to 9, at Valley Forge, Harrisburg, when the frosh nine posted a score of 90 for their nine holes, 14 strokes better than Lehigh's 104.

L. R. Leiper, the frosh captain, and Wil- liam Anderson, the frosh nine's leading scorer, carded a score of 41, while the frosh nine as a whole enjoyment a stroke under par, 14 strokes better than Lehigh's 104.

**Frosh Wins**

The frosh nine scored a victory over the Lehigh frosh nine, 14 strokes to 9, at Valley Forge, Harrisburg, when the frosh nine posted a score of 90 for their nine holes, 14 strokes better than Lehigh's 104.

L. R. Leiper, the frosh captain, and Wil- liam Anderson, the frosh nine's leading scorer, carded a score of 41, while the frosh nine as a whole enjoyment a stroke under par, 14 strokes better than Lehigh's 104.

**Mid Swim Finals**

The following have qualified for the All-Ivy League swimming tournament: Coaches: John Heidenreich, Lehigh; Fred DePue, Penn; John Gorman, Yale; and F. E. Good, Cornell. Swimmers: Bill Dow, Lehigh; John Good, Penn; John Hohman, Yale; and Fred DePue, Cornell.

**Late Homer Beats Frosh**

The Frosh nine scored a victory over Lehigh, 9 strokes to 1, at Valley Forge, Harrisburg, when the Frosh nine posted a score of 33 for their nine holes, 9 strokes better than Lehigh's 42.

J. G. R. Leiper, the Frosh nine's captain, and William Anderson, the Frosh nine's leading scorer, carded a score of 17, while the Frosh nine as a whole enjoyed a stroke under par, 9 strokes better than Lehigh's 42.

**WHAT'S IT LIKE TO BE WITH IBM?**

"Like many other scholars," Gerry Shultz recalls, "I was not sure what I wanted to do, except that I wanted to work in electronics. At the time of my interview with IBM, I knew nothing of computers. However, a tour of the IBM Laboratory impressed me greatly—its orderliness, the friendliness—and particularly, the small-group project system.

Gerry Shultz came to IBM in 1951, right after graduation from the University of Cincinnati. Assigned to the Advanced Research and Development Group as a Technical Engineer, he obtained—"with the patient help of experienced engineers"—practical knowledge in circuit design. Since those circuits were used to test barrier grid storage tubes in computer work, he developed a knowledge of computers.

A new area in a new field

In 1953, as IBM group using a 701 computer for scientific investigation needed a circuit man to build a flying spot scanner as an input device for the computer, The assignment gave Gerry Shultz his first experience with simulation studies. The man was working on a character recognition project. The scanner automatically converted letters and digits from visual to digital form. The computer helped the group to evaluate large samples of data to determine what properties were worth while in distinguishing one character from another. After building the scanner, he learned to program the computer, and stayed with the project. By 1955, the group had expanded into the Information Research Department. Today it embraces such projects as Information Theory, Switching Theory, Psychology, Theory of Automata, and Speech Recognition. All projects use the computer as a research tool.

Receives promotions

During his career at IBM, Gerry Shultz has received two promotions. In 1954, he became an Associate Engineer. In 1957, he was made Project Engineer, and is currently working on the Speech Recognition project of Information Research. "We have just completed equipment to convert speech into digital form for computing input," he reports. "Our work is now the analysis of speech. Much like Character Recognition, it is concerned with the question, 'What properties does the acoustic signal possess which will aid in classifying speech sounds?" and one from another?"

"My career is quite typical of the many interesting ones which the electronic computer has opened up at IBM. The output of Information Research and other Research groups is used in test systems. These systems are thus further developed into larger equipment prototypes. Throughout this field the manufactured product many interesting and challenging problems must be met and solved."

**WHAT IS IBM's ROLE IN THE FIELD OF INFORMATION PROCESSING?**

IBM is a leading manufacturer of data processing equipment, and also engages in research and development in such areas as programming languages, computer software, and computer hardware. IBM's research laboratories are located in several countries around the world. IBM is also involved in the development of new technologies, such as artificial intelligence and quantum computing. IBM's role in the field of information processing is to provide high-quality, reliable, and efficient information processing systems and services to businesses and organizations worldwide. IBM's commitment to research and development has enabled the company to remain at the forefront of technological innovation, and to continually improve its products and services to meet the evolving needs of its customers. IBM is one of the largest technology companies in the world, with a diverse range of products and services that are used by businesses and organizations in a variety of industries. IBM is committed to providing its customers with innovative, reliable, and cost-effective solutions to help them achieve their business goals. IBM is headquartered in Armonk, New York, and has operations in more than 170 countries around the world. IBM is a leader in the field of information technology, and is recognized for its commitment to innovation, customer service, and social responsibility.
