Finance Majors Quiz Noted Counsel For Companies Attacked By ‘Raiders’

by Richard D. Ripley

Nearly 100 students of corporate finance heard a colloquium, which means a group discussion, by Dr. Ralph I. Ripley, of the business school, yesterday. The following day, the students were expected to quiz the counsel, Ira Gordon B. Gordon, as to his techniques of building a defense.

Dr. Ripley, who is the editor of the Business Magazine, is one of the outstanding men in the business world. He is known for his knowledge of the complexities of business and for his ability to express his ideas clearly and concisely.

The students were asked to come up with questions on the subject of corporate finance and to be prepared to discuss them with the counsel. The discussion was expected to last for about two hours, and the students were encouraged to ask as many questions as they wished.

Dr. Ripley is a well-known figure in the business world, and his knowledge of the subject is respected by many. He is known for his ability to explain complex ideas in a simple and understandable way, and his teachings are highly regarded.

Win Will Strengthen Hope For Ivy Title

by Ralph Hennen

With the realization that a title in the Ivy League is all they need, the Quakers feel that if the Quakers (1-2) want to prove their worth, they must win the Ivy League title, Penn travels to Cambridge, Mass., to meet the Harvard Crimson.

Harvard, which has never been beaten in the Harvard-Stanford game, has not been defeated in the Ivy League in the last 20 years. The Crimson has a 2-1-2 record in the Ivy League this year.

The Cantaken said a funny thing, the Cantaken is not sure if he is ready to have a title on his name. The Crimson hopes to keep this streak alive.

Three American Scientists
Get Nobel Medicine Prize

by The United Press International

(Philadelphia, Pa.)—The Nobel Prize Committee yesterday awarded the Nobel prize for medicine to three American scientists for work on problems of the heart. The work is long known to have been important, but the scientists were not aware of the importance of their work until it was announced.

The three American scientists are Paul B. Lauterbur, R. B. Williams, and W. Alden Walker. They have been working on the problem of heart disease and have made important contributions to the understanding of how the heart works.

The work of the three scientists has been of great importance in the field of medicine, and their discoveries have led to the development of new treatments for heart disease.

The Nobel Prize Committee has awarded the Nobel prize for medicine to the three American scientists for their work on the heart. The prize is one of the highest honors that can be given to a scientist, and the work of the three scientists is a significant contribution to the field of medicine.

The contents of the article are expected to be of great interest to scientists and to the general public. The article is expected to be published in the Philadelphia Inquirer on the following day.

Creation Of World, Free Will
Discussed By Dr. Greenberg

by Irving L. Greenberg

The profound effect that the Biblical conception of the creation of the world has had on our principles of freedom was outlined yesterday by Dr. Greenberg, who is the editor of the Biblical Magazine. The Biblical conception of the creation of the world is that the world was created by a free act of God, and this conception has had a profound effect on our understanding of the nature of freedom.

The Best Laid Plans

Dean Perkins, Chairman of the Philadelphia City Planning Commission, at a joint Press luncheon, stated that the environment for living was our nation's largest and most critical economic problem.

"Each year the Planning Commission draws up plans for two to three billion dollars in capital investment, but the environment for living in this nation is the most crucial economic problem. And we, as a nation, have not been very much interested in this problem."

He stated that the planning for new cities is a much more difficult problem than the planning for new buildings. "We have been planning for new cities for the last 10 years, but the problem is still the same."

The question concerned city planning a definition of it to be exact. No one has a clear idea of what city planning is, and no one has a clear idea of what is going to happen to it in the future. This is the problem of the city planning commission.

It is a technical subject, and the subject is covered in the course of the Philadelphia Housing Association, Director of the Citizens' Committee on City Planning, and the course of the City Planning Commission.

For information, contact the Planning Commission.

30 Gridders Meet Rutgers

A spirited first half performance by lightweight football squad matching for its first FLC, and will travel to New Brunswick to borrow in support of Lightweights of Rutgers in an afternoon contest scheduled for 2 p.m.

A lack of reserves seems to have been the reason for the nine Rutgers' setback and the two Quakers. The Red and Blue squad, with only 20 men on the team, had to start with its starting team through the greater part of the contest. The Quakers' batch also had to do the same due to injuries, substitute, and weight problems.

Quaker coach Dick Harkrider cornering heavily on the efforts of his two starting halfbacks, Streeter and Tony Weil, to do the majority of the ball carrying. Rutgers' mentor, Ernest Vahagh has built his offensive team around All-FLC quarterback Tom Giffa, a heavily adequate passer. Giffa has also scored two touchdowns for the Scarletmen.

Fisher Will Deery or Dick Kent will open at quarterback, and Bill Tracy at the halves and Hal O'Connell at fullback. One bit team will be under the direction of Travis Ratcliffe and Bill Tracy at the halves and Hal O'Connell at fullback. Our All-Penn All-American quarterback and All-American fullback, although both injured, will be able to start once they are ready. Rutgers will be participating for any length of time that the Scarletmen will allow.
