New Women's Dormitories Will Reflect Past

in Saarinen's Ultra-Modern Residential Suites

by Richard S. Nagel

The new women's dormitories to be erected during 1958 at the University Center and in the early nineties for the University of Pennsylvania, are designed by the architect Philip Johnson, whose name is familiar to lovers of modern architecture and students of the arts, through his collaboration with Walter Gropius, and his work in America and abroad.

The new dormitories are intended to be a unique way the keen awareness of students for the arts, the professions, and a communal service. The former will be a communal service, the latter a communal service.

Editor, Daily Pennsylvania:

It is with some the pain that I write this letter to you, because it means that the issue which I brought up in my last letter has ended a sentimental verbal war between some Wharton and some Collegeers (I refer to the "situation" article). Unfortunately, it seems that some Wharton students have been needled to stand up and fight for their rights and that the College students have been to stand up and fight as well. It is not easy to understand, but it seems to me that there is one thing that both Wharton and College students must remember. Wharton students, don't forget that you are in the majority, and that you should not allow yourselves to be bullied by the minority. On the other hand, College students, don't let the majority bully you into silence. The rule is to admit that any student (whether in the Wharton school or College) who feels that he is being wronged is entitled to the protection of the editorial staff. If students are not interested in English and not just in a requirement to pass English, they should be able to have an influence on the editorial staff. Finally, I should like to suggest some sort of plan which would allow and require Wharton and College students to meet and work out these problems.

Sincerely yours,

A. C. Blank

Editor, Daily Pennsylvania:

In your strong to analyze the motivations of players you overlooked the essential point—student Unions. With school facilities, you have in Wharton students who are capable of realizing the value of an English course regardless of whether it helps them to earn more money or not. English is a basic course in the College institution but is not the one that could have been made optional. In any case, the students are interested in English not just as a requirement but as a course which they are interested in. The right plan is that which formerly existed.

A Guts Outfit

by Robert L. Israeloff

There are many fascinating adjectives one could use to describe the Pennsylvania Guts Outfit. It is very high in spirit and very low in height. It is one of the most unusual football teams in the nation. The Guts Outfit, a cross between the Notre Dame's fighting Irish and the New York Times' baseball team. It is a team of fighting giants who can run and block with the best of them. It is a team of the unknown who will not be satisfied until they have defeated the best of the best.

For the first time in the history of the Guts Outfit, there are signs that the team is beginning to take shape. The Guts Outfit is a team of fighters who will not give up until they have won. They are a team of believers who will not be satisfied until they have achieved their goal. They are a team of fighters who will not give up until they have won.

Sincerely yours,

Robert L. Israeloff
