Valeur Speaks On DeGaulle

by Robert L. Ford

The decisions of the French government under DeGaulle, which have withstood the test of time, are the result of a leader’s will to make a plan for the future of his country, according to President Robert L. Ford, who spoke at DeGaulle’s inauguration.

DeGaulle’s vision for France included a strong, independent nation that would not be dominated by others. His policies were aimed at achieving this goal through economic and political reforms. The United States, declared yesterday, would be a strong supporter of the new French republic.

**An Unfortunate Incident**

An unfortunate incident occurred Wednesday in the University Library. A woman undergraduate broke her leg when she fell through a hole left in the glass second floor of the stacks when a workman panel to repair it.

The workman was occupied several feet away when the accident happened, but had his back turned at the time and had no warning of the danger. Of course, the student did not pay attention to the work, but at this time of the year, students occupied with finals and thesis often tend to be less alert than would be best for their safety. But the fact remains that her accident was the direct result of lack of preventive measures by the workmen involved and as such is the responsibility of the University.

There is a possibility of further such incidents. The excavation for the new electric plant behind the Wharton School is protected only by a few wooden saw-horses. Will more adequate protection wait for an accident? We certainly hope not.

**Devoted Student**

Dr. Althea K. Hottel has served the University for 23 years. To say that she will be missed when she retires as dean of women is a gross understatement, for her energetic and devoted service to Pennsylvania has earned her a place of respect among all Pennsylvanians.

During her tenure as dean of women, she has demonstrated the highest level of effort to furthering the position of the women students of the University, and has been largely responsible for the success of the campaign for the new women's dormitories. The decision was hard, although contrary to her desire to continue in her work. Dean Hottel has never shirked a job or duty but has tackled all with enthusiasm and vigor.

We next sincerely extend the best of wishes to Dr. Hottel.
