I-F Council Proposes Informal Fall Rushing To Be Held In Houses

Amendment Is Designed To Eliminate Parties Held Prior To Formal Period

by Edward Farman

A constitutional amendment which if passed would call for an informal rushing period was presented to the Intramural Council at a meeting held last night.

Designed to eliminate the current practice of holding expensive rush parties at off-campus locations, the amendment stipulates a three-phase informal rushing period which would be held prior to the usual formal rushing schedule.

The wording of the amendment offers that the fraternitymen be allowed to conduct rushing parties in their respective houses between the hours of 5 and 8 p.m. on certain Sunday afternoons which are specified in the document.

Blanket Invitations

The system would have an invitation setup similar to that currently used for formal rushing, wherein a blanket invitation would be extended for the first round of parties which would be held during the period between the opening of school and Thanksgiving.

Houses would remain silent for alternate Sundays during this first phase.

The blanket invitation system would extend the second period, from Thanksgiving until Christmas in which all houses would rush on the same day. The final phase calls for admission only upon invitation to houses which would hold rush parties, in an effort to eliminate houses between Christmas and the formal rushing period.

The five-page document which was drafted by the Council Races Rushing and Activities committee under the direction of Arthur W. Simpson, shall officially forbid parties during Christmas and the period following it, thus eliminating the rush parties for which those who are provided for under the informal system.

All violations of the rules will be dealt with by the Council Races Rushing and Activities Committee which is currently undergoing revision. The committee is authorized to amend the amendment which was also read to the Council at the meeting. It is suggested that each house take an active part in the rush system whereby violations would be effectively reported. Rush invitations will be voted upon at the next Council meeting.

When In Rome

When In Rome
by John H. Dilks, Jr.

Literally "enrolled" with superior material and graced by the traditional Mask and Wig spirit, the 19th annual Freshman Show, "When In Rome" was positively a shock. Unquestionably its full hour rehearsal last night:

though often marred by technical difficulties, was a learned lesson to understanding audience and warm applause.

In thirteen musical numbers, written almost entirely by undergraduates of the University, were selected two or three pieces which were the original sketches to be heard in the Irving stage for two shows.

Although the cast suffered from inexperience and lack of confidence, Stephen Goodman playing the part of the small-town girl who makes good in Hollywood, and John Austin in the role of a good movie director turned out inspired performances. Lawrence Levick, portraying a thwarted lover from back home, was excellent.

Amidst much work remains to be done before show can be produced as an outstanding. Continuity seems a problem when subjected to over-long acts between scenes. The change routines suffer from haphazard rehearsal and choreography. Acknowledging that the show is a fine effort by group of freshmen, however, a large portion of faults can be forgiven—even forgotten as the air is Mild and Wig fills the stage.

Up on the north coast.

A screen of U. S. fighter planes was ordered up over Panama's north coast today to detect the approach of more invader troops reported crossing the Caribbean from Cuba.

The air patrol was requested by the five-ambassador team sent by the Organization of American States to help end the invading efforts by the Panamanian President, Ernesto de la Guardia.

An informed source who reported the occurrence of attacks by the invaders said the National Guard had held off to protect the 1,000 inhabitants of Xombi, a small town taken over by the invaders last Saturday from Cuba.
