COLLEGE SETS UP BODY TO STUDY EDUCATION PHILOSOPHY

A special committee has been named to study the educational philosophy of the College. Dr. William Steinmetz, acting dean, announced Tuesday at a 400-man meeting of the faculty of the College. The 16-member group will be charged with presenting a philosophy of higher education, Dr. Herbert H. Wolf, professor of mathematics, who is president of the college, explained. The committee will study the discontent that some students have felt in the past and try to define the purpose of the higher education and the role the College of Pennsylvania plays in the scheme of things.

MOVEMENT FOR NATIONAL PRIMARY STARTS TODAY

A new movement of students at the Pennsylvania Primary (PPP) campaign begins today. Petitions may be picked up by students at the University in front of the Administration Building, where the committee will meet Tuesday. The committee is composed of various students and faculty members who have been active in the political movement.

Bey TELLER

A group of between 70 to 80 students from the University have announced that they will be gathering for a meeting at 2 p.m. today in the Union. The group, which is called the "Movement for National Primary," has been formed to put forward the idea of having a national primary election for the presidential nomination. The group will be meeting with the upstairs of the University in order to discuss the implications of their proposal.

RAY HEPES NEW LAWYER, TRIAL POSTPONED UNTIL MARCH

James Earl Ray's originally scheduled Thursday trial to set back to charges of murdering Martin Luther King Jr., and a judge, calling the trial "the only thing," postponed his trial until March 14. Ray's trial is set for April 1, but the judge's decision to delay the trial has moved it to March 14. Ray's trial will be moved to a federal court, where he is facing charges of murder.

APOLLO 8 MISSION SET FOR CHRISTMAS

The United States announced Thursday it will send the third Apollo American spacecraft into space on December 21, in order to send the first men to the moon by Christmas. The mission is scheduled for December 21, and the spacecraft will be launched at 9:00 a.m. The mission is expected to last about 24 hours.

STORM RAVAGES EASTERN SEABOARD

Ice, snow and gales of up to 73 miles per hour, roared across New Jersey headed toward New York City. The storm has left a trail of destruction, with power outages affecting millions of people. The storm is expected to last until Christmas Day.

Condition of blacks 'steadily worsening,' declares Bond

BY ROBERT SAVETT

"Our committee is a living group," said Janice Santer, charged a statement Tuesday night. Bond, one of the original founders of the Student Nonviolent Coordinating Committee, has been a leader in the civil rights movement for many years.

"We have a problem," he said, "and we are working on it."

"In 1948, the rate of unemployment among black teenagers was 25 percent higher than for whites; now, it is 90 percent higher."

"Each year since 1952, the number of blacks employed has decreased by 1 percent."

"Every year since 1944, per capita income among blacks has decreased."

"Between 1949 and 1964, the number of black teenagers unemployed averaged 40 percent; the number of white teenagers averaged 7 percent."

"Each year since 1942, the number of blacks employed has decreased by 1 percent."

"Every year since 1944, per capita income among blacks has decreased."

The statement continues, "Be-}

cause of the difficulties we face, we have to work together to put this program into effect."

"We are working on it."

Choosing a President

One week ago today the voters of this country did not know whom their votes for President had chosen. The result was not merely a change in the status quo. But for a few hours, even the very concept of computers would not have made sense.

The reason is the antiquated system by which this country chooses Presidents—the electoral college.

Chosen by the votes of more than 50 million, 538 persons elected a President. A state fails overwhelmingly its candidate's column whether he be more popular than his opponent to that state by one vote or 100,000 votes. In an election involving two major candidates, the only concrete fear is that the "winner" may be opposed by more than 50 percent of the electorate.

To be sure, the system is as unnecessary to it as obsolete. Defenders of the system, when it was originally proposed to the Constitution, explained it was a virtually lack of trust in the will of the people. For similar reasons, there was no provision in the original Constitution for the direct election of Senators or for granting suffrage to women.

As necessary as reform is in the electoral college, it will do little to alter the outcome of elections. The primaries need not be held on the same day, nor be chosen by the candidates for President. The latter two offenses have been corrected. Clearly, this reform has been proposed by Sen. Birch Bayh of Indiana.

My people, I am pleased to report that in the past year we have made sure that even the smallest of our thousands of potential borrowers can afford to buy a house, a car, or a new appliance. Today, I would like to announce that for the first time in our history, we have been able to extend credit to all segments of the population, including small businesses, farmers, and individuals.

As we move forward, we must continue to focus on providing access to affordable housing and financial services for all Americans, regardless of their income level or credit history. Our work is not done until every American has access to the financial tools they need to achieve their goals and dreams.

TODAY 4:30 GIMBEL GYM-FREE

OVER 1,000 FACULTY AND STAFF MEMBERS ARE WITH US.

The person you work with every day is probably already taking advantage of benefits offered by our Insurance Counseling Service located right here on the University of Pennsylvania campus.

He's checking with us to see if his insurance coverage is keeping pace with the rapidly rising cost of living.

He's even getting cash dividends.

If you'd like to join up, write on over to 3725 Chestnut Street.

Or call us at Evergreen 2-8900, or 9850 on the University intercom, or send in the coupon for more information.

Three young presidents to speak at Alpha Kappa Psi

Three representatives of an unusual organization will speak on Thursday at 7 P.M. in the South Parking Room of Wannamaker Hall.

Edward Satoff, Louis Furmer and Peter Musposites here at least three things in common. They are all under 30 years old, they are all presidents of large corporations, and they are all members of a relatively young organization, the Young Presidents Club.

Speaking before an open meeting of Alpha Kappa Psi, the professional business fraternity, the three members of WPC will briefly discuss their personal and professional experiences and their respective companies. The emphasis of the program, however, is to be on an open-ended question-and-answer period.

WPC, which is 10 years old, and has already improved communication between youthful members of the business elite, has become, they say, a membership by invitation. One must become the chief executive of a corporation with at least 15 employees and one million dollars in annual sales before hisforieth birthday. When an executive reaches 50, he is automatically dropped from the membership.

Further in president of Alpha Kappa Psi, which comprises O-Club, as well as several other organizations in the Middle Atlantic area, is Dr. J. Jack F. Musson is the president of American Foremost, while Winter is the head of Safeguard Industries.

All members of the University community are invited to attend and hear a speaker for the sponsoring fraternity and the Young President's Club.

Transcendental Meditation is topic of lecture Thursday

Jerry Jerry, national director of the Students International Meditation Society, will speak about "Transcendental Meditation," a program for reducing stress and increasing productivity. He will discuss the technique of meditation, its origin and purpose, and the benefits it can bring to students and other young people.

The lecture, sponsored by the Men's Affairs Committee, will be attended by members of the Women's Affairs Council, and will be held in the Smith-Penniman Room of Houston Hall.

The lecture is open to all students, and no pre-registration is necessary. Those interested in more information are encouraged to attend the lecture and learn more about the benefits of Transcendental Meditation.
Barbers see no end to hair

George Wallace still can't sell a fox from a girl, and the Harvard "buzzard" isn't in control of the campus. Even the barbers have a problem with a mustache.

But since the good old days of the early movies when the Roos were sniping, hair and beards have become a less than cozy item of business. Particularly beards. As for artificial around, with Niedelman noting, "es- vations: "There are more sideburns, the parents."

dehumanination," or an attempt to disposed unlimited choices for the artist, as "violent protest" and cited such plays as provided a thousand scholarly journals on all aspects of the theater and was the author of more than one hundred scholarly articles as well as numerous books and articles. He has served on the faculties of many colleges and universities and has been president of the American College of Cardiology. He is a graduate of Cornell University, University of Pennsylvania, and University of Pennsylvania College of Medicine, and is a fellow of the American College of Cardiology.

Corrigan also discussed the "gray area between the aesthetic and the artistic. He said the arts are more parallel with the aesthetic than with the artistic." He cited such plays as "The Diary of an Insane," "The Diary of an Insane," and "The Diary of an Insane." The diary of an insane is a compilation of the author's thoughts and ideas. He is a graduate of the University of Minnesota.

The new. sound in popular music was viewed by Corrigan as a product of the younger generation against our generation. The new sound is designed to draw the words which are the vehicle of society. The new sound is not all that different from the new music in many respects. It has the same appeal to the young audience and to the older generation. It is a reaction against the older generation. It is a reaction against the older generation. It is a reaction against the older generation. It is a reaction against the older generation.

The barbers also see a trend to- of the barbers shop little change, but it's hard for us to judge, because they have not raised prices. The barbers also noted a trend toward increased popularity of the barbershop, which is both for regular barbershop customers. The barbershop is not just a little. And that's because of the younger generation.

Corrigan said that people come in with a better idea of what they want than old-time customers had and that they they keep abreast of the sweeping advances in technology, not because they can contribute more.

Professionallism at Grumann... personal development programs

As a growing engineer, how can you position yourself so that your career chances are con- stantly improving? Answer—get on with some enterprise where the optimum conditions are personal development programs. We are committed to this program through our own personal development programs.

Grumann is also committed to this program through our own personal development programs.

Professional Development Programs

Our technical employees are encouraged to participate in our technical training programs. We offer a variety of programs designed to help our employees meet the changing needs of our industry.

We have a wide range of programs that include both classroom and on-the-job training. Our programs cover topics such as leadership, communication, team building, project management, and technical skills.

We also provide opportunities for employees to attend conferences and seminars to keep abreast of the latest developments in technology. We encourage our employees to take advantage of these opportunities and to share what they learn with their colleagues.

The success of our professional development programs is evident in the growth of our employees and the contributions they make to our business. We believe that investing in the personal and professional development of our employees is a key to our continued success.

SPORTS

By JOHN KOTHARD

"Fair in feel and bad in fact," is how, Friday, November 8 (Penn line and fact a day I've never seen'), the Quakers responded to Saturday's game against Columbia. "It's an extremely well-played by both sides," said sneezing.

The Quakers continued to dominate the Columbia defense. Although the Quakers missed a few chances to score, they were able to hold the Columbia offense to just one touchdown.

"We've been doing a lot of hitting the last few weeks," said Booth. "I think we're starting to get into a groove now."

The Quakers went on to win the game with a final score of 42-7. They will be looking to continue their winning streak this weekend when they face the Army Black Knights.

Saturday's lineups

The Quakers are currently on a roll and are looking to keep it going against their next opponent.

The final test of the season will be against the Army Black Knights. The Quakers will be looking to continue their winning streak and secure a spot in the Bowl Championship Series.

"If you can block that first man, "Booth said. "You can do anything on the football field.

The Quakers have a strong defense and are looking to make a statement this weekend.
