SENATE ADVISORY COMMITTEE TO MEET STUDENTS

The Faculty Senate Advisory Committee has voted to meet with students now, a month before academic semesters and examinations. This is the first meeting of this advisory committee in close connection with a Daniel M. Norton, a faculty member who has resigned from his position of higher learning at the University of Pennsylvania. Norton called for a re-examination of the social problems that are now facing the University.

NATIONAL AIRLINES HEADED TO CUBA

MARY—Young Negroes who seem to be lawyers and who are responsible for some of the successful legal actions in the United States have recently been listed among the “40 Under 40.” These young lawyers have made a name for themselves in the field of civil rights, especially in the area of housing discrimination. They include Louis Sullivan, John Lewis, and Samuel Moore, who are graduates of Howard University. Sullivan is a visiting professor at Stanford Law School, while Lewis and Moore are professors at the University of California at Berkeley.

CDV MAP ACTIVITIES

The Coalition of Democrats and Independent Voters Tuesday night stated that it is conducting a research project on urban voting patterns in conjunction with the CDV. The project will study the election returns in Philadelphia and the surrounding counties to determine the impact of the civil rights movement on voting patterns.

National Airlines chief Richard C. Smith announced that the company is sending a delegation to Cuba to explore the possibility of establishing a new route between the United States and Cuba. The delegation will arrive in Cuba on March 1, and will consist of five executives from the company.

HEALTH INSPECTORS FIND NOTHING WRONG WITH REEP

Kenneth D. Reep, chief of the food and health division of the Pennsylvania Department of Health, said that the health department has not received any complaints from the public about the condition of the food at any of the Pennsylvania universities.

The Department of Health said Tuesday that it has received no reports of any problems with the food at any of the Pennsylvania universities.

IF fights for fraternity autonomy

Opposes national rush rules

In the city or anywhere else in the United States, there is a sense of reaching a new level of social and political awareness. The recent civil rights movement has brought attention to the issues of race, gender, and sexual orientation. The movement has also raised awareness about the importance of voting rights and the need for change in government policies.

In the city or anywhere else in the United States, there is a sense of reaching a new level of social and political awareness. The recent civil rights movement has brought attention to the issues of race, gender, and sexual orientation. The movement has also raised awareness about the importance of voting rights and the need for change in government policies.
Our new lead story is upon us, and we find ourselves looking at the situation in which the community now finds itself. It is a situation that is not new, but one that has been developing over the past few years. The community has been moving towards a state of unrest and uncertainty, and it is becoming increasingly clear that something must be done to address the underlying issues.

The problem is that the community is divided. There are those who believe that the situation can be resolved through peaceful negotiation, while others feel that more drastic measures are necessary. The former group is often seen as weak or ineffective, while the latter is viewed as aggressive or violent. But the truth is that both sides are right, in their own way.

The problem is that the community does not have a clear sense of direction. There is no leader who can bring the community together and guide it towards a common goal. This is why it is so important for us to step up and take charge. We must work together to find solutions to the problems that face us, and we must do so in a way that is fair and just.

The community is at a crossroads. We can either continue to drift into chaos and conflict, or we can come together and build a better future. It is up to us to decide which path we will take. And I believe that we have the strength and determination to make the right choice.
WHAT WILL HAPPEN TO YOU COME THE REVOLUTION?

Earn a few dollars now. You may need them.

The Daily Pennsylvanian and 34th St. Magazine are paying ad salesmen 5 to 10 percent commission on all ads sold. A good salesman can earn $15 in one afternoon. Come to a meeting for business people this evening at 8 PM at the offices of The Daily Pennsylvanian, 34th and Chestnut.

Earn some extra money.

Psychological experimentation is false, denote of woman says

By SOPHIE BALCOFF

An advertising selling women to sign up for "psychological experi-
ment" has been turned and proven a hoax by the dean of women's
affairs.

Copies of the advertisement, distributed by the Interfraternity
Council, appeared on various bulletin boards across campus, a junior in
the College for Women and resident of University Hall, said he was one of the western
women who was contacted.

Western investigation settles African disputes

By Peter Tom

How to speak the many-enigmatic African nations none handbook
designed by Professor parliaments, of course.

So said Dr. Leonard Doh, Yale professor of psychology, to an audi-
cence of about 100 students Monday night at the School of Communications.

"The Caucasian, color, reproduction and communication A major
African was based on 10 years of research and experimentation con-
ducted by Doh in South Africa.

The students learned of problems that are found in communication
problems that is found in most communication languages. In the Human
language, of course, the important of in the communication of the
Africans.

The factors, the communication problem in African languages con-
trasted from one another in the sense that the African languages are
usually smaller in size then the human languages. This has resulted in a
dividing of the problems of understanding the African languages.

Although the African languages are larger in size, they have greatly difficulty
solving the difference of different objects to increase their work's exploration.

A communication and communication problem in the siste
languages have easily solved the difference of different objects to
increase their work's exploration.

"A computer has no mind of its own. Its 'brainpower' comes from the people who create the programs," says Rod Campany.

Rod earned a B.S. in Math in 1966. Today, he's an IBM Systems Programmer working on a portion of Operating System/360, a hierarchy of programs that allows a computer to schedule and control most of its own operations.

A mixture of science and art

"Programming" means writing the instructions that enable a computer to do its job.

Says Rod, "It's a mixture of science and art. You're a scientist in the sense that you have to analyze problems in a completely logical way. But you don't necessarily hunt for an ultimate right answer. There can be as many solutions to a programming problem as there are programmers. That's where the art comes in. Any given program may work, but how well it works depends entirely on the ingenuity of the programmer."

Programmers hold a key position in the country's fastest growing major industry—information processing. Business Week reports that the computer market is expanding about 30 percent a year.

You don't need a technical degree

If you can think logically and like to solve problems, you could become an IBM pro-

grammer no matter what your major. We'll start you off with up to twenty-six weeks of classroom and practical training.

Mealtime at TEP gets new image with addition of girl waitresses

By DAVID FEFFEL

The 400 members of the freshman fraternity, Beta Theta Pi, have asked about 50 new girls to wait tables at their house, one of the largest eating houses on campus.

The four cubes and Ruth Grie- ffo, TEP’s house manager, have contacted a nearby restaurant, Armin Gazzania, TEP’s adviser, describes the girls to the brothers as "nearly perfect." The brothers, he said, were looking for "something that will bring in new people." He added, "We had a lot of people from the fraternity in the house last year, but not many were hungry." The restaurant, "We were looking for new ideas," he said.

The girls were chosen from the University College, and will be paid $1.50 an hour. They will be available to work at the house from 5 to 9 p.m., Monday through Thursday.

University receives gift from DuPont

The University has received a generous bequest of $40,000 from the E.I. du Pont de Nemours & Co., Wilmington, Delaware.

The money is part of a large bequest program for educational institutions throughout the country, according to Dr. J. W. Smith, director of the Office of Institutional Relations.

The bequest is to be used for the support of the Phi Beta Kappa Society, which has been instrumental in the university’s development.

City Tourist Bureau refuses to sell 1969 Collegiate Guide

City Tourist Bureau refuses to sell 1969 Collegiate Guide

By RON HALZER

The 1969 Collegiate Guide to Greater Philadelphia, released just three weeks ago, has been successful enough to warrant a second printing.

The Philadelphia College and Tourist Bureau is mailing the guide to prospective students and their parents.

The guide, "The Ivy League," is a comprehensive source of information about the 130 colleges and universities in the Philadelphia area. It includes college profiles, tuitions, scholarships, and other valuable information.

The guide is available at most bookstores in the area, and is also available for free to prospective students and their parents.

There is only one basketball player that Dave Wohl would take a pass on when it comes to the game of basketball, according to the hire of Associate Head Coach Bob Gibbons. Gibbons knows more about life than the basketball ratings.

After a month he could swim three strokes, and I never felt such a sense of help in my life. Just because this kid was swimming.

"It doesn't sound very modest, Dave, but if you believe it, you have to believe it," said Dave Wohl.

Wohl has paid a personal price for his concern for others, but he doesn't mind if they burden him, and he asked me for my phone number. I said yes.

Wool knows more about life than the basketball ratings. "The biggest factor in a ball game, five assists, and five rebounds."
