STUDENTS APPROVE PLAN FOR UPGS REFORM

In the UPGS referendum Monday, students gave a large margin of approval to the proposal to increase the student senate. The plan had been formulated by the constituent convention committee, headed by Charles O'Malley, chair of the economics department. The plan includes open meetings, student representatives, and an increase in the student body's funds.

MARCH, 4 SURFS NEW ENGINEERING COURSE

The University of Pennsylvania has implemented a new engineering course. The course, which is intended to attract more students to engineering, will be offered in the fall of 1969. The course will cover topics such as design and analysis of structures, fluid mechanics, and thermodynamics.

MARCH 4 STRIKE

Hundreds of students and scientists at colleges from coast to coast attended the March 4 strike in support of the scientists' research strike. The scientists rejected the "research strike" plan but did hold a conference to discuss the future of science.

PRESTIDENTIAL SELECTION COMMITTEE SEEKS STUDENT MEMBERS

Lawrence Cohen, chairman of the student members of the University's student government, announced that the committee is seeking student members to participate in the selection process. The committee is responsible for selecting the next president of the University.

SOCIALIST MAYORAL CANDIDATE TO SPEAK THURSDAY

Paul Robeson, Socialist Workers Party candidate for mayor of New York, will give a talk on community control Thursday night at 7:00 PM in 110 College Hall. Robeson will address issues such as housing, education, and economic justice.

REV. RUSSELL WILL TESTIFY TODAY ON SENATE BILL

The Rev. Jack Ramsey, a priest for student affairs, will testify today before the Senate on the proposed legislation. Ramsey is noted for his work in community development and social justice.

HISTORY DEPT PRESENTS FIRST OF AN EIGHT-PART LECTURE

The University's history department, in conjunction with Morgan State College, will present the first of an eight-part lecture series on "The Negro in American History." The series will explore the history of African Americans in the United States.

Proposal to change USCC at organizing meeting

By DON HIRDOM

A proposal to change the name of the University City Community Center to an urban project center was presented Tuesday at the organizing workshop for March 4 activities. The proposal was made by William and Nettie, graduate students in biochemistry.

Harris, in the letter, Rasmussen states, "The social purpose and aspirations of the Biochemistry Department are fulfilled and will not be, and there is an increasing awareness upon the part of both the student body and faculty of those challenges which members of our urban community should be prepared to answer in proportion to their effectiveness in urban living and the urban crisis."

The proposal was made at the meeting by William and Nettie, graduate students in biochemistry. The proposal was presented to the faculty and both graduate and undergraduate students at the meeting. The proposal was approved by a large majority of the attendees.

March 4

The University's March 4 program was well-received, both by administration and students. As a result of commitments to the Office of Associate Dean and faculty members participated in a program which was well attended.

The substance of the day centered around the place of the university in society and the use and misuse of knowledge. Although the general theme of the day was easily identifiable, several sessions served to narrow the concentration to a level which was meaningful. The Title II-D departments of the university took different topics and discussed them impressively.

Although the sessions were a bit formal in terms of style. The talks were well-choreographed and well-timed. The faculty, distinguished both locally and nationally. Hundreds of concerned students from ... discussions was impressive. This was a significant day for students and the faculty. The discussions were a touchstone for discussion and debate. The sessions were well-attended and the topics discussed was impressive. This was a significant day for students and the faculty. The sessions were well-attended and the topics discussed were relevant and interesting.

One student at Penn has to be impressed, especially those with a group of trusted officials. The question of the role of the scientific elite in research and education is very important and should be addressed. The student will have to be careful to not become too attached to the topic.

While students taught our fellow students about the process of the research and the adherence to principles, those who were able to should be proud of their research. Several intellectual research has never had to believe the high points, the people who have been working on the project. They were the people who were self-disclosed as their own work and they respected us.

March 4 workshops...

Priorities and the University's fiscal status

"We're constantly trying to tie the budgetary process more closely to the needs of students," said Dr. David W. Rittenhouse, assistant vice president for institutional affairs. "We need to bring all forces to bear on the problem of the university's fiscal status and its current fiscal climate.

The discussion in the conference room centered on several issues, the role of students in determining the budget deficit this year. "Thirty percent of the student body," said Dr. Rittenhouse, "aren't giving a chance to people who will change their behaviors."

"If everyone can make a small change, the overall deficit will be reduced." The meeting also looked at several discussion groups.

History for what?

One hundred and fifty persons from across the campus filled the auditorium for the first workshop. "We have to provide some guidelines," said Dr. Rittenhouse, "for what history is for.

"We don't consider knowledge of evil consequences of history for knowledge's sake," commented one professor.

"The kids at Penn are presumably intelligent. It's not getting through to the faculty that the kids don't get anything out of a course unless it's history for knowledge's sake," said Dr. Rittenhouse.

"We have to create the kind of society," said another speaker, "where we can have intelligent children.

"The afternoon concluded with a discussion on the part of the audience which was delayed to allow television coverage of the March 4, 1969, meeting of the university's Student Committee on the University's educational priorities. The purpose of March 4, 1969, was to provide a forum for discussion of the student's role in determining the budget deficit this year.

Basic research

"Basic research is expensive," said Dr. Rittenhouse, "and we must teach what is involved in the educational system."

"Further discussion centered on the role of students in determining the budget deficit this year. "Thirty percent of the student body," said Dr. Rittenhouse, "aren't giving a chance to people who will change their behaviors."

"If everyone can make a small change, the overall deficit will be reduced." The meeting also looked at several discussion groups.

Physics workshop

The problems, direction, and criteria for faculty success the university cannot be decided by the administration alone, Dr. Mennis said.

"We have to create the kind of society," said another speaker, "where we can have intelligent children.

"The afternoon concluded with a discussion on the part of the audience which was delayed to allow television coverage of the March 4, 1969, meeting of the university's Student Committee on the University's educational priorities. College editors are not shaken by government

WASHINGTON - The students who will define newspapers are not so easily intimidated by government officials as they are by the application deadline.

The 500 editors who attended the United States Student Press Association's college editors conference in Washington this week were not so easily intimidated by anyone.

They threatened to cut and paste questions to Central Intelligence Agency officials, as well as to U.S. Post Office officials.

North Carolina said the next CIA briefing was "exceptionally nonsensitive." (Another student from the University of Michigan found Fellers Secretary of Agriculture was nonsensitive.)

The editors did say the campus protests - breaking out on the nation's campuses - could be "the unifying force" among the former administrators who would serve liquor on the nation's campuses.

"Under President Nixon," there would be no "long-range plans." (Another student from the University of Iowa said that "in the complication of these relations, the Indians have 'become quite sticky,'

"Another student, Mark Johnson of Windham College, in Putney, Vt., remarked: "Anti-war programs - breaking out now on northern urban campuses - are an integral part of the student protest movement."

"I don't believe him," said a girl who was in the audience.

The first week in March was a "workshop" on propaganda, part of the series of workshops concerned on the increase of knowledge.

 Liberals thought it was that "under President Nixon," there would be no "long-range plans." (Another student from the University of Iowa said that "in the complication of these relations, the Indians have 'become quite sticky,'

Letters to the editor

Commender

"We are in a critical stage of our movement," Mrs. H. Seabrook said in an interview. "This fund, which is the only fund in society not obtained by taking money from the rich, is necessary for a revolutionary struggle."

The Daily Pennsylvanian, 1969-07-20

Commennder

"I am a critic of the University's role in leading the way to the increase of academic freedom," Dr. J. Johnson said in an interview. "This is an important stage in the ongoing struggle for academic freedom."
Student tutors attempt to motivate youngster

By ROBERT HOFFMAN

Approximately 200 University students are being trained to help minority students from 14 different high schools in Philadelphia. The students were recruited last fall by the Anti-Ballistic Missile (ABM) Committee of the Student for McCarthy. The program was named "Pens in the Barriers," and its leaders are Aubrey Oden, a senior English major, and Mrs. Lorena Morton, assistant principal of Philadelphia High School for Girls. "The program is based on the idea that if minority students who have broken down, or who feel they are demanding," says Mrs. Morton. "Their are no barriers, no unattainable goals. The only thing that matters is that they learn how to use their talent to make the best of the situations their existence in."

Other tutors work in English, math, science, and social studies. Each tutor has an individual tutor who is interested in helping him progress. This tutor is responsible for the tutor's success in the program. The tutors meet once a week for two hours, and the sessions are designed to provide an individualized learning experience for each student. The tutors are also responsible for maintaining regular contact with their students, both in and out of school, to encourage continued progress.

The program is supported by the Anti-Ballistic Missile Association of Philadelphia, which provides financial assistance to the tutors. The program has received positive feedback from both tutors and tutors alike, and it is expected to continue to grow in the future.

Penn students agree with Collegiate Guide

By PENHERG

"The only reason that the students are demanding is because they have been told to be demanding," says Dr. David Brown, chair of the Anti-Ballistic Missile Committee. "If they are told to be ''quiet'' then they will be quiet. If they are told to be demanding then they will be demanding."

With these words, the 1960 Collegiate Guide at the University of Pennsylvania (UP), a publication that has served as a model for similar publications across the country, announced its support for the anti-war movement. The guide goes on to say, "The university administration should listen to the demands of the students and work towards a solution that is acceptable to all parties involved."

Although the guide does not explicitly endorse the use of violence, it does encourage students to take action to bring about change. The guide states, "We believe that the only way to achieve real change is through nonviolent action. We encourage students to organize and work together to bring about the changes they desire."
If you had to design the ideal computer organization it would probably look like Computer Technology.

Now, wouldn't you like to join your dream company?

We don't sell hardware. We don't lease back computers or rent machine time.
We're the new company that cares about the user and the values he should be gaining from his computer installation, but probably isn't.
Our rapport starts with top management. We understand their problems and responsibilities, and we understand computers. We help management establish firm control of their data processing plans — plans that turn their computers from cost-reduction tools into profit generators.
Then we help meet these plans through a process we call professional implementation.
We implement our clients' total data processing plans from design through operation. This is where you come in.
We're now building the best organization of computer and business professionals in the industry.
We have opportunities in nearly every area of computer services, operations, sales and management — at facilities throughout the country.
We also offer an unusual environment for developing broad business backgrounds in the areas of short and long-range planning, creative financial management, acquisitions and evaluation of new-business opportunities.
We're creating one of the finest professional climates that a bright technical or business graduate will ever have the opportunity to share.
And there's no better time to join us than right now.

Make an appointment through your Placement Officer to see CT's employment representative when he visits your campus on March 17. Or write to Gary Cadwallader, Corporate Director of Personnel, Computer Technology Inc., 65 E. South Water St., Chicago, Illinois — 60601.

The sports roost NOT SO?

by norm roos

"This is not" carried the athletic director of the great
University, "not so." His institution was not be-
ing surpassed by the personal achievement of
Penn's athletes. "Not so." But four years ago this read—"enough to
top the young boys, the example—outstanding benchmen, in
just its defensiveness.

Today, Dr. George F. Price, not so loud now, where he pre-
curred to the same status he enjoyed four years ago as
Harvard, nurturing in an ever-indefatigable capacity, and ful-
ishing your academic endeavors when shown over here (as in my
formers amassed actually daily, you'll be so glad to have Philadelphia come. year. June 30th, that
your association with the university will not disintegrate.

The future of the University on its foundations. This is
becoming more and more evident. The more men, and
women, the more the University can develop.

Molly expects Penn to win national championship Seat.

by STEVE MCELHINNEY

"It's basically a slick, champ-
ionship!" Molly said "such an ex-
ceptional group of players. If you
look at the bench, you see the
pros. And there's no telling what
these guys are going to develop.
