College, CW change Drop-and-Add rules

By SOPHIE BALCUFF

Changes are coming to the way that students will register for classes at C.W. as a result of the recent announcement that the College will no longer need the adviser's signature on drop-and-add forms unless they are reducing or adding classes after their major program. The former instance will apply for the College for Women, whereas similar changes will be made Wednesday afternoon.

"We'd like there to be a less artificial atmosphere," said the advisor of the College, commented. "We don't want a student to have to see her advisor, she doesn't have to. We feel that the advisors need the option of being consulted in order to advise their students better, not to be a need to confer or comment on any students. This is an experiment," --how it works," she added.

Reactions to the new rule from the Student Committee on Undergraduate Education (SUCE) were generally favorable although members expressed reservations. Sandy Colb, chairwoman of SUCE, said Colb's ideas of the College's decision to make the rule "advising," but added, "I think the student is in the control of the computers. That's the motivation behind that change.

Colb also said that SUCE will be working on its own system to develop a drop-and-add form. She said she hopes that everyone who can be involved will support the system. Colb also said that SUCE is concerned with those who are enrolled in a course the decision of whether to continue or drop the course. I think it's a question of choosing between the student and the course. If the student is in the course and the course is in the student, then everyone who is involved must be involved and nothing must be done until everyone who is involved is aware of the decision. This is just a new experiment and we're not sure if it's going to work or not."

Another member of SUCE who is also a member of the SUCE executive board commented, "This is an experiment, it's not a system. We're not sure if it's going to work or not."

"We're not sure if it's going to work or not."

"We're not sure if it's going to work or not."

Ho Chi Minh is dead at 79

(Continued on page 2)

by JOY RIEBER

A U.S. Supreme Court ordered the University of California at Berkeley to add several sections to the psychology course in which the student body and the threat of a student protest have been a concern.

"We've been trying to get a third section to the psychology course," said a member of the Student Political Action Committee (SPAC). "We've been working with the psychology department to add several sections to the course, and we've had some success.

Ho Chi Minh is dead at 79

(Continued on page 3)

by JONATHAN TALMADGE

In response to the news of the death of Ho Chi Minh, black students and civil rights leaders have expressed their grief and called for peace.

"We are saddened by the death of Ho Chi Minh," said civil rights leader Martin Luther King Jr. "He was a great leader, a great man, and a great inspiration to all of us. We will miss him greatly."
Mather, "tired of city living," resigns presidency of UCSC

By CLAUDIA COHEN

In an interview with The Daily Pennsylvania, Mather, who has resigned as president of the University City Science Center (UCSC), reflected on his career and the challenges he faced as president.

"I believe the university should be a place of learning, not just a place of work," Mather said. "I want to see students flourish and feel free to explore their interests."

Mather said he was disappointed in the university's failure to implement his vision of a more open and inclusive campus.

"I feel that we have not made enough progress in this area," Mather said. "I hope that the new president will continue to work towards a more welcoming environment for all students."
Math department reorganizes itself into two-track system

by JOAN RIEDER

It is a University where the emphasis is placed on teaching future academicians, the mathematics department emphasizes research. There are professors who wish to major in math, but don’t plan on a graduate career in pure mathematics.

The department has adopted a two-track major system designed to provide for those who don’t intend to pursue graduate studies. Undergraduates who begin a major in mathematics will be designated as "relevant" on campus. The number of black students on campus has been significantly swelled to 180, black students on campus has been significantly swelled to 180, black students on campus has been significantly swelled to 180. The number of black students on campus has been significantly swelled to 180, black students on campus has been significantly swelled to 180, black students on campus has been significantly swelled to 180.

HILLIAN STEPHENS

Stephens is named dean of the College

"This move is quick action and no bullshit."

That’s what Sandy Celli, co-chairman of the Stephens Committee on Urban Problems, said about the new Dean of the College, Williams E. Stephens.

Stephens, who served as acting dean of the College and vice-president of the University since 1965, was appointed to the post on a permanent basis in May by the trustees of the University.

The SCUE co-chairman mentioned that it is all about designing his goal has led with the new dean. "Stephens came forth for us when we needed him."

A professor of physics, Stephens was chairman of the department for the past six years. The renowned scientist came to the University in 1946 from Stanford University.

A native of St. Louis, Mo., he received his A.B. in 1940 and M.S. in 1941 at the University of Illinois and his Ph.D. from California Institute of Technology in 1946 after serving as a graduate instructor there.

His contributions to the armed forces during World War II earned him the Army-Navy Certificate of Merit. At the University he headed $200,000 National Science Foundation project to probe atomic nuclei in a tandem accelerator.

An accomplished physicist, Stephens participated in Manhattan Proj- ects research during World War II and in the prestigious Salk Islands-Bermuda race.

A visiting professor at the University of Edinburgh in 1959, Dr. Stephens spent this past summer as visiting professor at the university’s Institute of Physics. He spent the fall, 1960 term at the California Institute of Technology working with Professor Edward Teller on computer mathematics.

Dr. Stephens is planning to rent the 14 house, but is negotiating for the University this September have...
Free men, not slaves

Robert Eaton has been sentenced to three years in jail for refusing to accept the alternative service that goes along with conscientious objection draft status. He did not refuse selective servitude for any personal gain but for the right of the majority to decide for him. His action will not save him from the present situation, but it will save the nation from an endless nightmare.

Robert Eaton could have accepted his draft order and made a martyr of himself in the settlement house that his draft board held. We believe it is more important that by that doing, he would be giving a tacit approval to the entire selective service system and to the racism that still abounds in this country. Instead, he chose to fight. What he realized, is something that all the men in this university should realize.

By accepting our privileged status as students, we are giving tacit stamp of approval to the system. Robert Eaton objected to being told by the government what he was to do with his life, for conscience truly is for the individual matter of law. The 15 undergraduate SCUE members are a small percentage of the total student body. They cannot make the distinction and straighten out their courses and closed sections of open courses, drop and add, about the content of courses, go to the SCUE office in College Hall 16 for assistance.

The issue before Bob Eaton came was with the conflict between the University's constitutional atmosphere and the personal lives of the students. The University's constitutional atmosphere is a place where there is no freedom of opinion, where there is no freedom to be a conscientious objector, and where there is no freedom to have a conscience.

Perhaps the most important contribution that Bob Eaton made to the University was the personal interest and the human consideration they gave in the midst of the University's constitutional atmosphere. Perhaps the only way to make the changes is to fight back and get the University to change its ways.

The SCUE office is a place where you can go to talk about your problems and where you can get help. They are not just a place to go to talk about your personal problems, but also a place to go to talk about the larger issues of society. They are not just a place to go to talk about your personal problems, but also a place to go to talk about the larger issues of society.

The SCUE office is a place where you can go to talk about your problems and where you can get help. They are not just a place to go to talk about your personal problems, but also a place to go to talk about the larger issues of society.

SCUE

During this year's freshmen orientation, the Student Committee on Undergraduate Education (SCUE) has been offering many students more complete course descriptions. SCUE members are providing a valuable service; with the SCUE office in College Hall 16 for assistance.

The SCUE office in College Hall 16 for assistance. They have a good idea of what students need and are well versed in the University's constitutional atmosphere.

SCUE

To the Class of '73

Eighty-four hundred forty-five students in the Class of '73, entering college during the fall, are named in congratulations digestors because of the expensive legal intricacies involved.

College students in the country have been single-minded in their efforts to have the opportunity to go to college. They have the right to be unhappy about this situation. It is one of the largest groups ever to enter the University, and it is a vital role in bringing about needed improvement at this time.

To the Class of '73, welcome to the University. The Class of '73 officially begin their academic career. We feel the 15 undergraduate SCUE members are providing a valuable service; with the SCUE office in College Hall 16 for assistance.

Two slices of American society and an overall atmosphere are highlighted in the films this week: "Midnight Cowboy" and "Easy Rider." The scenes are emotionally loaded; the acting is excellent. Dustin Hoffman and his "ラケラマス" partner are convincing in their roles. The casting is excellent, with cowboys and bikers as the main characters. Hoffman's "ラケラマス" is a free-spirited, bohemian character, while his "Easy Rider" is a serious, intellectual one.

Dustin Hoffman

"Midnight Cowboy" and "Easy Rider" are two of the most famous films of the 1960s. They both feature Hoffman in lead roles, with "Midnight Cowboy" being released in 1969 and "Easy Rider" in 1969. Hoffman's performances in these films were critically acclaimed and helped establish him as a leading actor.

"Midnight Cowboy"

"Midnight Cowboy" is a film directed by John Schlesinger, and it stars Hoffman as a French-speaking hustler in New York City. The film explores the world of sex work and the relationships between the characters involved. It was a critical and commercial success and helped establish Hoffman as a major actor.

"Easy Rider"

"Easy Rider" is a film directed by Dennis Hopper and it stars Hoffman as a biker who, along with his friend, embarks on a cross-country journey. The film explores themes of freedom, rebellion, and the American Dream. It was also a critical and commercial success and helped establish Hoffman as a major actor.

Fidelity lets you join the jet set for half fare

We want your money in a Fidelity Special Checking Account. And we're prepared to bribe you to sign up.

A free American Youth Plan ID Card entitles you to one-half air fare on a standby basis on American, United, Western, TWA, Northwest, Northwest, and Continental Airlines. And you get one-third off on a reserved seat basis on Air West, Eastern, Braniff, Delta, and National Airlines. The card gets you student rates at some of the best hotels as well. (Note: The airlines restrict the Youth Plan Card to students under 22.)

Or, if you prefer, you may choose a high intensity study lamp especially designed for deep personal thinking.

To get the bribe just open a Fidelity Special Checking Account for as little as $25 at one of our 60 offices. Fill out the coupon and bring along your student ID card or proof of college matriculation. You'll soon find out the account is a pretty good deal. Checks cost only 10¢ each. You pay only for checks you use. No 50 cents a month service charge during the summer if you don't use the account. Minimum balance? Only a dollar.

So come on in with your coupon, proof, and $25 now.

Application for Fidelity Special Checking Account

Here is $ to open a new Fidelity Special Checking Account in the name of:
