Ban on all uses of biological weapons declared by Nixon

By JOAN RIDER

WASHINGTON - President Nixon announced yesterday that the United States is abandoning all research and development of biological and chemical warfare, even in retaliation for any such attack, and ordered the Defense Department to destroy its germ warfare stockpile.

Nixon declared this as part of his broader program for national security, which would include new draft reforms, easing legal restrictions on marijuana, and the formation of a violent crime commission to be headed by Dr. Milton Eisenhower.

The report called upon the National Institutes of Health to conduct a six-month study of the chemical and biological warfare research program under the direction of the National Security Council, a review he said he had ordered more than 15 years ago.

The United States is abolishing both types of warfare just as it has already decided to abandon the atomic bomb in its present form and to destroy its existing nuclear arsenal.

The report noted that persons between the ages of 18 and 30 are the most likely to be drafted into the military. It recommended that a constitutional amendment be adopted to restrict the draft to persons under 30.

The Commission, headed by Dr. Milton Eisenhower, was set up after the assassinations of President Kennedy and Robert F. Kennedy and the 1965 draft lottery.

The report said that the commission would not address the issue of the death penalty.

**RUSSIAN WRITERS UNION SAY SOVET GHETTO MAY ERODE**

MOSCOW — The government today closed the Soviet Union's largest Jewish community, the Kovno Ghetto, in Kovno, Lithuania, according to a Soviet news agency.

The Kovno Ghetto, which was established by Soviet authorities in 1941, was used as a labor camp during World War II. The Soviet government closed the ghetto to prevent the spread of the disease that swept through the camp.

The Soviet government has been accused of covering up the extent of the disease and the number of deaths in the ghetto. The government has denied these accusations, saying that the deaths were due to natural causes.

The Kovno Ghetto was established in 1941 by the German occupiers to serve as a labor camp for Jewish prisoners of war. The camp was located in the Kovno region of Lithuania, which was occupied by the Germans during World War II.

The Soviet government has been criticized for its treatment of Jews during World War II. The government has been accused of covering up the extent of the persecution of Jews, including the establishment of ghettos and the use of forced labor.

By STEVE LEVENE

The last time an Ivy League team had failed to break into the season’s top 10 in football was 1967 in the case of Harvard and 1968 in the case of Penn.

Penn’sborrowers had not quite finished 1966 cotures — that was 1966, three times as a member of the East and the country within seven years.

Penn State had been in the East since 1961, had been in the league since 1952, and had won the NCAA title in 1961. The only thing that had changed was that Princeton had moved up to the top five teams. The only two things that had changed was that Princeton had moved up to the top five teams.
