Names of presidential choices are leaked

By JOHN RILEY

A Philadelphia newspaper, breaking a seven-month-old embargo on the identity of candidates for the University's presidency, reported yesterday that Martin Meyerson, president of the State University of New York at Buffalo, was "believed to be" the prime candidate. Meyerson is one of a group of five candidates on an ordered list under consideration by the University's board of trustees.

Meyerson, a former University of Pennsylvania provost, confirmed yesterday that the group includes, among others, Martin Luther King, Jr., whose name was the subject of a 1968 announcement. The University's board of trustees yesterday requested that the board of the University's city science center confirm that it will not be pressured to grant land for low-cost housing.

Police disclaim alleged attack on student

By ANITA SAMA

A Philadelphia Police Department official yesterday afternoon acknowledged that a police investigation has commenced because the University's chapter of the American Association of University Professors is involved in a "police action," which the police official would not identify.

The police official, who was speaking under a "public information" policy, said that a "police action" would not be identified, but that the University's chapter of the American Association of University Professors is involved in the action.

Chez the Registrar

By ELLEN WEBER

The UNIVERSITY TRUSTEES parked their cars in the Franklin Street garage yesterday, as they entered the Student Center to attend the meeting of the board of trustees. The meeting was called to order by Dr. Martin Luther King, Jr., the first black president of the University.

The board of trustees listened to a brief address by a member of the University's presidential selection committee, who was not identified, but who was believed to be the prime candidate for the presidency. The committee member was also believed to be a member of the University's quadripartite commission, which includes representatives of the University, the city, the state, and the federal government.

The committee member, who was speaking under a "public information" policy, said that the University's president, Martin Luther King, Jr., was "devoted to" the University's quadripartite commission, and that the committee was "virtually" unanimous in its support of the University's quadripartite commission.

To the Members of the University:

Re: Task Force on University Governance

UNIVERSITY OF PENNSYLVANIA

Philadelphia 19104

January 2, 1970

To the Members of the University:

Re: Task Force on University Governance

The Board of Trustees recently completed the examination of the recommendations made by the Task Force on University Governance. These recommendations are summarized in the accompanying report, which describes the Board’s reaction and the action it proposes to take in response to the recommendations. The Board’s action will be presented to the members of the University at their February meeting.

The Board of Trustees is grateful to the Task Force for its careful study and for the attention it has given to the many issues facing the University. The Board also appreciates the support of the members of the University community who have contributed to the work of the Task Force.

The Board of Trustees will continue to monitor the progress of the University in the important areas addressed by the Task Force. The Board will also continue to seek advice and guidance from the University community as it considers the implementation of the recommendations of the Task Force.

The Board of Trustees will be represented at the February meeting of the University Council by members of the Task Force and other members of the Board.

The Board of Trustees is committed to the continued improvement of the University and to the best interests of the University community.

Sincerely,

Ernest Scott - Trustee

Thomas Bauld - Graduate Student (GSAS)

Chairman, Task Force on University Governance

Working Draft of the Subcommittee on Trustees

TASK FORCE ON UNIVERSITY GOVERNANCE

Description of the Board of Trustees

The Board of Trustees of the University of Pennsylvania is the governing body of the University. The Board consists of 40 members, divided into two classes. The first class is elected for 5 years, and the second class is elected for 10 years. The first class is elected annually, and the second class is elected every second year. The Board of Trustees is responsible for the development and implementation of the University’s policies and programs, as well as for the administration of the University’s affairs.

Functions of the Board of Trustees

The Board of Trustees is responsible for the overall direction and control of the University. The Board is responsible for the formulation of the University’s policies and programs, as well as for the administration of the University’s affairs. The Board is responsible for the appointment of the University’s officers and for the determination of their salaries and terms of office.

The Board of Trustees is also responsible for the supervision of the University’s financial affairs. The Board is responsible for the formulation of the University’s budget and for the supervision of the University’s investments.

The Board of Trustees is also responsible for the supervision of the University’s legal affairs. The Board is responsible for the formulation of the University’s policies and procedures in relation to legal matters, as well as for the appointment of the University’s legal advisors.

The Board of Trustees is also responsible for the supervision of the University’s academic affairs. The Board is responsible for the formulation of the University’s policies and programs in relation to academic matters, as well as for the appointment of the University’s academic officers.

The Board of Trustees is also responsible for the supervision of the University’s physical plant. The Board is responsible for the formulation of the University’s policies and programs in relation to physical plant matters, as well as for the appointment of the University’s physical plant officers.

The Board of Trustees is also responsible for the supervision of the University’s financial affairs. The Board is responsible for the formulation of the University’s budget and for the supervision of the University’s investments.

The Board of Trustees is also responsible for the supervision of the University’s legal affairs. The Board is responsible for the formulation of the University’s policies and procedures in relation to legal matters, as well as for the appointment of the University’s legal advisors.

The Board of Trustees is also responsible for the supervision of the University’s academic affairs. The Board is responsible for the formulation of the University’s policies and programs in relation to academic matters, as well as for the appointment of the University’s academic officers.

The Board of Trustees is also responsible for the supervision of the University’s physical plant. The Board is responsible for the formulation of the University’s policies and programs in relation to physical plant matters, as well as for the appointment of the University’s physical plant officers.

The Board of Trustees is also responsible for the supervision of the University’s financial affairs. The Board is responsible for the formulation of the University’s budget and for the supervision of the University’s investments.

The Board of Trustees is also responsible for the supervision of the University’s legal affairs. The Board is responsible for the formulation of the University’s policies and procedures in relation to legal matters, as well as for the appointment of the University’s legal advisors.

The Board of Trustees is also responsible for the supervision of the University’s academic affairs. The Board is responsible for the formulation of the University’s policies and programs in relation to academic matters, as well as for the appointment of the University’s academic officers.

The Board of Trustees is also responsible for the supervision of the University’s physical plant. The University City Science Center's announcement last week that it will no longer fight against returning land for low-income community housing is a welcome step toward a more equitable distribution of wealth in Philadelphia. The Science Center, conceived with the intention of promoting scientific research and education, has been criticized for its lack of commitment to community development. The center's decision to accept the offer of land for housing is a significant gesture that demonstrates its recognition of the importance of community needs.

The Science Center's announcement follows a series of events that have highlighted the need for affordable housing in Philadelphia. The city has a housing crisis, with thousands of families struggling to find safe and affordable homes. The Science Center's decision to accept the offer of land for housing is a step in the right direction, but more needs to be done to address the root causes of the housing crisis.

In conclusion, the University City Science Center's decision to accept the offer of land for housing is a welcome step toward a more equitable distribution of wealth in Philadelphia. However, more needs to be done to address the root causes of the housing crisis, and the Science Center should continue to prioritize community needs in its decision-making process.
High draft numbers not safe, book asserts

A new book, written by two Yale graduate students, claims that students who received high numbers in last month's draft lottery should not consider themselves safe from service.

The book, entitled "The Lottery and the Draft: Where Do I Stand?" asserts that local boards will run through the numbers at different rates, and some may go through the entire pool. "There are no safe birthdays," claim the authors, David Kendall and Leonard Ross.

"Local draft boards could fail this attempt by writing only the new year in, thus invalidating the determination. The registration would then be liable for that entire calendar year," they write.

In their conclusion the authors highly criticize of selective service procedures, charging that the system is "highly inefficient and unfair to those men who maintain that the draft is not needed but who will be drafted to fill the army's needs because no substitute is available.

The Kendall-Ross book was written with the assistance of a research team of twelve Yale law students. Kendall, 25, is a second-year law student, a member of the Law Journal and a Rhodes scholar. He holds lottery number 50. Ross, 24, is a Ph.D. candidate in political science at Yale. Kendall and Leonard Ross.

"The Kendall-Ross book was written with the assistance of a research team of twelve Yale law students. Kendall, 25, is a second-year law student, a member of the Law Journal and a Rhodes scholar. He holds lottery number 50. Ross, 24, is a Ph.D. candidate in political science at Yale. Kendall, who wrote the book, is an assistant professor of political science at the University of Pennsylvania.

We seem to be in the bank in town that thinks $7000 of your money is worth investing.

It wasn't too long ago that Bill Leith's future was still a big question mark. Today he's man with the answers.

Bill Leith started as one of our management trainees shortly after graduating from Lake Forest. He was then promoted to assistant manager of our New York office, a position he held for three years.

Just last June he became our youngest Assistant in Placement at our New York office. His experience here has been outstanding.

Days before entrusting their money to us as guarantors, Bankers, Investment Counsels, and others have demanded proof that the trust is in good hands.

For the last 3 years of the past 5, we have supervised over 50 clients that have been in the same situation as you. And in all those cases we have continued to provide prompt and courteous service.

In 1967, we were one of the first to introduce the concept of guaranteeing all IRAs, and we have continued to be committed to this concept. We believe that it is the only way to protect the savings of the individual and to insure that he can make the best use of his money.

We have supervised over 250 IRAs in the last 3 years and have never had a single complaint. Our clients have been completely satisfied with our service.

In conclusion, we feel that we have the best interest of our clients at heart. And we are willing to put our money where our mouth is.

For further information, please call Mr. Morris at 693-0680. We'll be happy to give you a complete explanation of our services.
