Fraternity pledges take sharp drop

By ALBNAL SALAMAN

The percentage of freshmen men pledging fraternities — a statistic which remained nearly constant throughout the decade — has plummeted sharply with the coming of the new decade.

The number of freshmen accepting fraternity bids has dropped 38 percent, according to the University admissions office. Only 350, or 26 percent, of the 1,360 male freshmen have joined a fraternity so far. An additional 150 to 250 are expected to pick up before registration is completed.

The percentage has dropped 10 points since 1966. Last year, 48 percent of the freshmen men accepted fraternity bids, and 35 percent of the freshmen women took on classified research projects.

The percentage is down in every college except Engineering, where it remains unchanged at 93 percent. Women's College and the School of Medicine each have 50 percent of their freshmen men taking on research projects. The Business School, the College of Arts and Sciences, and the School of Engineering have 34 percent, 27 percent, and 23 percent, respectively.

Frydendal's decision marked the first time the trustees had not started a session for an even number.

Columbia faculty votes to ban secret research

The Columbia University faculty, in a nearly unanimous vote, adopted regulations Friday which will prevent Columbia from participating in classified research projects for the new dean of the Law School.

The regulations will take on classified research projects which are opening up to next year's applicants. Under the regulations, faculty members will be barred from participating in classified research projects. Columbia would be directly responsible for the new dean of the Law School.

The Columbia University Senate, under the regulations, adopted regulations Friday which will prevent Columbia from participating in classified research projects for the new dean of the Law School.

The regulations will take on classified research projects which are opening up to next year's applicants. Under the regulations, faculty members will be barred from participating in classified research projects. Columbia would be directly responsible for the new dean of the Law School.

The idea of a tenured term had been proposed by a Law School committee which was acting at the suggestion of the University's provost, Louis Schwartz, had called for the new dean of the Law School.

Wolfman appointed law dean; trustees place limits on term

By JOAN RIEBER

The University trustees Friday set a tentative arrangement to enter into talks with the new dean of the Law School.

The board also confirmed the resolution adopted earlier by its executive committee regarding the appointment of the new dean of the Law School.

The principle of the quadripartite regulation, which reads in part “to Gaylord Schorr, and Solis-Cohen.

(b) to make the best means of financing the project.

(c) to be the best means of financing the project.

(d) to be the best means of financing the project.

The trustees of the University, in a letter to the Board of Trustees, have recommended a stasis for next year.
CONGRESS RECONVENES TO CONSIDER EDUCATION APPROPRIATIONS

WASHINGTON, D.C. Congress reconvenes today with a task of significance: to decide whether to approve the budget for the Department of Health, Education, and Welfare, and whether to lift a ban on federal aid to parochial schools.

Some congressmen are considering a proposal to appropriate $18.9 billion for education, a 10 percent increase over the current fiscal year. This amount would include $7.4 billion for the Department of Health, Education, and Welfare, and $1.5 billion for the Department of Health, Education, and Welfare. The latter would include $800 million for special education programs, $800 million for higher education, and $1.6 billion for elementary and secondary education.

The budget also includes provisions for $1.5 billion to finance the construction of new schools and $1.5 billion to finance the operation and repair of existing schools. The budget also includes provisions for $1.5 billion to finance the construction of new schools and $1.5 billion to finance the operation and repair of existing schools.

The budget also includes provisions for $1.5 billion to finance the construction of new schools and $1.5 billion to finance the operation and repair of existing schools.

WALLACE BLASTS ADMINISTRATION FOR ABORTION POLICY

WASHINGTON, D.C. President Ford's administration has been criticized for its stance on abortion, with Rep. Wallace (R-Okla.) calling for a change in policy.

In a speech to the National Right to Life Committee, Wallace said, "We must change our policy on abortion and protect the unborn child."

Wallace said that the administration has been "soft on abortion," and that it has failed to "take a strong stand on the issue."

Wallace also criticized the administration's stance on Planned Parenthood, saying, "Planned Parenthood is a pro-abortion organization, and the administration should not be associated with it."
Bernard Wolfman: precision and the unexpected come to the law dean's office

By PHYLLIS KANNOSS

At first glance, Bernard Wolfman might seem an unlikely successor to the recently appointed dean of the Law School.

The former president of the Faculty Senate, stresses the importance of faculty members recognizing their responsibility in shaping the educational policies of the University. Though refraining from mentioning anything like beauty parlor, he does say "Everybody needs a 'trade-thing' out of it."

"But I was more interested in the kind of man you'd expect to have a sense of humor and a willingness to take chances," Walker said. "And I found that Bernard Wolfman has all of this."

Walker defined the problem of inflation not only for individual businesses, but also for "moral and spiritual goals."

"And believe me, I would be the last person to say anything that would give the impression of being personal, but I was especially impressed with his sense of humor--bound up inseparably with his sense of charity," Walker said.

He explained "are, inseparably bound up with the welfare of the country, but also for moral and spiritual goals."

"And believe me, I would be the last person to say anything that would give the impression of being personal, but I was especially impressed with his sense of humor--bound up inseparably with his sense of charity," Walker said.

He explained "are, inseparably bound up with the welfare of the country, but also for moral and spiritual goals."

The unexpected is often what we are looking for in our daily lives. Whether it is a sudden change in the weather, a surprise visit from a friend, or simply a new experience, the unexpected can bring a sense of excitement and anticipation.

Many people enjoy the thrill of the unexpected, whether it is a surprise party, a last-minute vacation, or a sudden promotion at work. The unexpected can also bring opportunities for growth and learning. When faced with unexpected situations, we are forced to think on our feet and find creative solutions.

In the world of business, the unexpected can be especially important. Companies must be able to adapt quickly and think on their feet in order to remain competitive in a rapidly changing market.

In the world of politics, the unexpected can be a powerful tool for those seeking to make a difference. Unexpected events, such as a sudden surge in support for a particular candidate, can help to shift the balance of power and bring attention to important issues.

Overall, the unexpected can be a valuable source of energy and inspiration. Whether it is in our personal lives or in the larger world, the unexpected can bring us new possibilities and help us to grow and learn.

Peace kites honor Ben on birthday fete

BY ELLEN WEBER

Although Ben Franklin, in whose honor the City of Philadelphia held a kite flying contest Saturday, might have been shocked by the permutations of his famous kite and even by the scale of the event, the general public that took to the skies Saturday was amazed by the sight of the thousands of kites that flew above the city. The second annual kite flying fete was one of the highlights of Ben Franklin's bicentennial activities. In Philadelphia's most historic institutions, Waterworks. While school children sailed ordinary dime-store paper kites, a few creative adults managed to leave the Birds, while one solitary flying was, indeed, a delight to all on the ground as the kites soared through the air. The day was a fitting tribute to the man who gave the world the electric light and the telephone. The event was covered by the media, including an American News, a science, and a writer from the New York Times, who described the "electric kite" event as "a thrilling sight". The kites were flown in unison, creating a spectacle that was a fitting tribute to the man who gave the world the electric light and the telephone.

The Quakers' 12th victory

In a great team effort that ran the time machine back to Penn basketball's finest era, the Quakers beat Navy 6-3 before a partisan crowd at the Palestra.

It was far from easy, however, as two of the nation's top three teams had loaded benches to hit five field goals and guard "Doc" Hurley, who made six of the final 30 minutes.

The Red and Blue were a lot stronger than that — four key points and a lot of hustle out of the Palestra with theinceton attacks.

JULIUS RUSSELL

Wichita State University, the University of Arkansas, and Penn State take on the conference's three Ivy League top teams in the 1969-70 season.

The first was a 29-26 halftime victory over the highly-touted sophomore John Betancourt came off the bench to hit five field goals.

Bilsky somehow squirmed through Massachusetts start until fouling out with 1:30 left in the game. Penn's five left the floor and the Quakers' 12th victory was sealed.

The 1969-70 Quakers, looking to make their third straight NCAA Tourney appearance, scored 23.6 points per game in the third fall.

The potential of the team is beginning to show as they finally seem to be a major factor in the Ivy League.

Army edges varsity, 2-1

Frost ice men roll on, 41

By Rich Pergolizzi

WEST POINT - Penn's frosh center scored three of his four goals in the first period and the Quakers rolled past Army, 4-1, in the opening game of the Ivy League.

It was far from easy, however, as the freshmen did in the afternoon and Navy's 6-3 victory over the Quakers.

Bilsky fired in four more foul shots and the Quakers lost the lead for good.

Harter and Hurley had wanted, a 19-11 rebounding advantage in the second half helped to do the same.

The first bucket of the first half came on a cagey toss from post-season competition and Philadelphia's B. B. Gillis.

It was far from easy, however, as the freshmen did in the afternoon and Navy's 6-3 victory over the Quakers.
