UPCoS debates proposal to dissolve student gov't

By JOAN RIEGER
A short while ago the membership of the Council of Student Representatives called for the preparation of a new student constitution. This week the committee presented its proposal to the class. The meeting was attended by representatives of the Divisions of Social, Physical, and Business Administration, as well as the University Senate.

The proposal was introduced by President Harnwell, who said that the purpose of the meeting was to discuss the proposal and to receive suggestions for its improvement. The committee was then given the floor to present its proposal.

The proposal was then discussed by the members of the meeting. The discussion centered around the need for a new constitution and the importance of a strong student government. The members agreed that the current constitution was outdated and needed to be updated.

A motion was then introduced to approve the proposal and to send it to the University Senate for consideration. The motion was seconded and passed by a large majority.

The meeting concluded with the president thanking the members for their participation and encouraging them to continue to be active in the student government.

Council to discuss research guidelines

The University Council will meet this afternoon to discuss the research guidelines that have been proposed by the University's research faculty. The guidelines are designed to provide a framework for the conduct of research and to ensure that research is conducted in a manner that is consistent with the University's goals.

The proposal is the result of a series of meetings between the University's research faculty and the vice-provost for research. The proposal is expected to be approved by the University Council and to be sent to the University Senate for consideration.

Clothes go ahead of cost-cutting reductions

By BOB HOFFMAN
President Harnwell today announced that the College faculty has voted to approve the University's proposed budget for the next academic year.

The budget, which totals approximately $1.7 million, was approved by a vote of 10 to 0.

President Harnwell said that the budget was necessary to support the University's educational programs.

The budget includes an increase in the cost of tuition and fees, as well as an increase in the number of faculty members.

The budget was approved by the University Council earlier this month. The council was asked to approve the budget by the University Senate.

State Senate will vote today on University's budget allocation

By DAVID TYEE
The State Senate will vote today on the University's budget allocation for the next fiscal year.

The University has requested $12 million for its budget, which is $3 million more than the amount allocated to the University last year.

The budget is expected to be approved by the State Senate and sent to the Governor for his signature.

Prospects for the bill's passage are good, according to sources familiar with the legislation. The bill is expected to be signed by the Governor within a week.
Nixon proposes plan to save environment

By United Press International

WASHINGTON — President Nixon's most aggressive industry in saving America's skies and waters, with a $10 billion proposal to help smokers, the nation's most polluting industry, put up more park lands and develop within five years a government plan to fight pollution.

—A governmental review of current use of the 750 million acres of federal lands, with an emphasis on recreation lands, with pollution control and development of lands up to now used for grazing.

—A program to work on 2,500 existing ones, tying the Department of the Interior Secretary would be authorized to seek emergency injunctions against serious water pollution.

—As he had promised earlier, the President asked the Senate for 14 billion to help cities and counties establish 1,500 new treatment plants and implement 14 treatment construction bonds and sell them at no rate than 5 percent.

—Federal regulation of fuel com- pounds, which the President said were causing high levels of pollutants in our air and waters.

—Research aimed at finding ways to create more fuel-efficient engines to make cars lighter, more easily disposable, and less dependent on foreign oil. The council urged giving the vote to any person, regardless of race. It asked the Senate to vote on the nomination of Judge Haynsworth.

—The council required that the auto industry voluntarily make plans to comply with 1975 new standards for car engines.

—As a result, the council said, there was sometimes accused of encroachment on the autonomy of the Republican party. The council urged the Senate to vote on the nomination of Judge Haynsworth.
Fraternity elections

Four vie for IF positions

By ANITA SAMA

The Interfraternity Council, which recently has established a council for pledging and running in the University
fraternity system, will hold elections
to fill the three top offices.

In an interview last month, the Interfraternity Council president, G.E. Kramer, who is running for
all three offices, said he sees the presi-
dent's role as one of inspiration
rather than administration and as a
member of a small house, he is
elected into the role of an advisor
to the council and pledging vice-
