Tenure Crisis Hits Instructor
In Romance Language Dept.

By BOB HOFFMAN

A member of the Romance Language department who has been denied tenure by a high administrative committee because of "hesitant reasoning." The instructor--the only French native currently in the department--had been denied tenure by a high administrative committee because of "hesitant reasoning."

Mrs. Lucienne Frappier-Mazur, who expects to receive the doctorat d'etat, or state doctorate, degree, generally requires up to 10 years of teaching before she is entitled to receive the prestigious "doctarat d'etat" from the Sorbonne in Paris next year, had her request for an appointment to the 8th U.S. Circuit Court of Appeals "very modified explanations." The doctorat d'etat, or state doctorate, degree, generally requires up to 10 years of teaching before she is entitled to receive the prestigious "doctarat d'etat" from the Sorbonne in Paris next year. WASHINGTON, D.C. — According to the Nixon administration, and President Nixon, and the Nixon administration, and President Nixon, the Department of Health, Education, and Welfare, and the Nixon administration, said that the Indians preferred to live on their own freedom for the good of the other Americans. They're due to splashdown Friday afternoon in the Pacific Ocean. The patched-together spaceship carrying James A. Lovell, John L. Swigert and Fred W. Haise, is lined up in land about 680 miles southeast of Pago Pago in the South Pacific. Splashed-down will come at 1:34 EST, EST, Friday morning. They're due to splashdown Friday afternoon in the Pacific Ocean.
**WHY WAR**

World War I, World War II, Korea, Cambodia, the Middle East, Vietnam, Chinese, Russian, Vietnamese, and others, have been fought in all corners of the world. Today, the wars that are being fought are more destructive than ever before. The United Nations, the Red Cross, and other organizations have been unable to prevent these wars from happening.

**NAIVE SOLUTIONS — NIX**

How naive can we get? When we are coming of age? A man is basically good? The truth hurts. It's not soothing to take responsibility for our actions. When we are hurt, we are hurt. When we are hurt, we are hurt.

**MAN'S TRANSFORMATION NEEDED**

A first-century follower of Jesus stated it bluntly as one can.

"What is causing the quarrels and fights among you? Isn't it because there is an array of evil desires within you?" But then, it hurts today, because we have never faced up to the truth.

**HOW TO CHANGE THE WORLD**

The first disciples of Christ transformed the world. Their solution was simple. They said, "For love of God has been poured out in our hearts by God's spirit who has been given to us. Give God's love a chance." Here's how you do it. It's written, "To all those who receive him the power to become the children of God." Transform yourself through talking to God. God will help you over others. Jesus Christ to come into you and give you new life. What does this have to do with changing the world? It's this: individuals make up our world. When a sufficient number of individuals are changed, society is changed. That's the only real way to do it - by changing the people, not things.

**GIVING BLOOD**

Still may give you Puerto Rico
give blood and get a chance!

Sociology Proposals Accepted

In a statement drafted in cooperation with Bernard William, the grand president of the Graduate Sociology Society, Bob Walberg said, "We need to serve as a fountainhead for promoting a substantive change in the department of sociology as it stands today."

The proposal is to change the beginning of the department in the fall to improve the quality of the department.

Walberg and Paulson also said that further program reforms are needed and the changes announced today represent a commitment to the people's request.

Dr. E. Digby Baltzell, professor of Sociology, who was last for four or five days, said, "I am very pleased with the decision of the faculty."

Baltzell said that the graduate students will now proceed to implement the changes that will improve the quality of the department.

Dr. John Hogan, chairman of the sociology department, said he was "very pleased" with the decision of the faculty. Hogan said, "My initial reaction was that this would be the most important decision in the history of the sociology department and it will serve as a model for other departments.

Hogan also said the graduate students will now proceed to implement the changes that will improve the quality of the department.
Richard the Great?

Peter the Great, the tyrannical czar of early 18th century Russia who led hundreds of thousands of Russians to their destruction during 20 years of constant war for territorial conquest, died himself in a battle but needless attempt to save a few drowning sailors. The prime ministers of the 18th century had little regard for human life measured against his insatiable desire for empire. Peter had lived throughout the age as a symbol of the incoherence of the times. We have read of the 13,000 miles away in Vietnam which continue to kill and maim, whose warriors and falls are still raging once again, and we have three men 200,000 miles from Earth whose lives are also in danger. And Richard Nixon — whom history will surely term far from Great — has announced that he will pray for the safety of the three Apollo astronauts. While thousands die, in the jungles and deltas, largely unnoticed, needlessly.

In all likelihood, Nixon is not alone in his irreverence of life, in his warped perspective that justifies unfathomable destruction — and continued death — in an area so unrelated to America's strategic interests.

He has a nation at his disposal, so to the marvels of apace-space technology and to the banner newspaper headlines, that on the eve of the spring anti-war offensive, Vietnam could not be further from their minds.

Indeed, it is one of the supreme ironies of our age, that a nation that can host a man on the moon — and hopefully bring him back alive when that technology fails — does not have the intelligence or resources to terminate our tragic involvement in Vietnam. We are too more concerned for the lives of Lovell, Swigert, and barefoot, waiting for the final moment of splashdown and safe recovery.

But we cannot forget the names we carried in June, the March in April, the December that has died since.

We cannot forget, and we cannot forgive.

Experimental College II

As experimental college has been established at the University, and it will be an experiment in continual change and growth, and will be wider in scope than any other studies center at the University. The emphasis will be on group studies with small numbers of the faculty, advising the students and participating in the discussions. The group of students involved has received the endorsement of the University and there are already several.

It must be said, however, that to find more interested students who are willing to help plan and participate in this program. This is an opportunity for students seeking reference in the University, for those who have learned a system which will be personal and meaningful, and useful in present University courses.

Our hope is for the University to participate in this demonstration in a meaningful way.

The University of Pennsylvania has recently beenimmunized against the variola virus, and unimmunized students who participate in the demonstration have signed a form which the University will receive from the Office of Health Affairs.

Fraternity Suspension

(Continued from page 1)
Commenting on the Council’s resolution of last April to end the bone system, by January 1, 1970, Holtz said the Fraternity has no plans to appeal the resolution. "There really can’t be much to their official ban, because we’ve been out of IF Council since April 3, 1968.” The fraternity had considered the consequences of resignation before they made their decision, Cabaness said, adding that the withdrawal resulted from a lack of support within the fraternity and the small number of pledges, which will assure a full house next year.

Concerning the possibility of the University’s appeal, sightseeing Cabaness felt that the University would not take the matter up, only to be declared by the University.

In addition, the option will be open to the University as of January 1, 1973, to purchase Phi Kappa Psi’s Lowell Hall house, and if it chooses to do so, the University will also have the prerogative to evict the twenty-two Phi Kappa Psi members subsequently voted into the house.

Bard's Bench

PERSEVERANCE

By Jeff Rothbard

The story of Charlie Moore is not a Chip Hilton scenario. Everything was against him. At 9, he couldn't walk. At 13, he couldn't run. At 15, he couldn't hit a tennis backhand. But he didn't allow any of these setbacks to stop him. He kept practicing, and today he is one of the best tennis players in the country.

Charlie came back to practice after sitting out a match and worked even harder. That spring, Moore finally emerged from obscurity. "I started at number five and worked my way up to number two," he said. "I finally had a chance to compete against the best." And he did just that, winning two straight matches to reach the number one spot. The resulting first place was a difference of eight points—the biggest margin of victory in his career. He then went on to win the national championship, beating the top-ranked player in the country in the final. Moore had suddenly become a rout.

And then, for the first time, a score was announced: Penn 94, Princeton 69. It was a decisive victory, and the Philadelphians were on their way to a successful season.

It's a testament to Charlie Moore's determination and perseverance that he was able to overcome such obstacles and achieve such success. His story is one of inspiration for anyone who has ever felt like they were living a life of defeat. Charlie Moore proved that with hard work and dedication, anything is possible.
