By JONATHAN B. TALMADGE

In a recent interview, author and speaker Jonathan B. Talmadge discusses the role of urban police and the challenges they face. He highlights the importance of understanding police behavior and the implications of their actions on society. Talmadge argues that police are not simply enforcers of the law but are also part of the fabric of community life, shaped by their interactions with the public.

Theoretical Framework

Talmadge begins by introducing the concept of police as public servants, not just enforcers of the law. He discusses the complexity of police work and the need for a multidisciplinary approach to understanding their role in society. He cites various studies and theories to support his arguments, including the work of Criminologist Paul Chevigny, who studied police behavior.

The Black Panther Party

One of the most prominent groups mentioned in the text is the Black Panther Party. Talmadge discusses the party's cry, "Off the pigs," and its impact on the community. He notes that the party's rise was a response to the perceived inefficiency and brutality of the police, particularly in urban centers.

Police and Community

Talmadge emphasizes the importance of understanding police behavior within the context of community dynamics. He suggests that police actions are influenced by the expectations of the community and the police themselves. He points out that police behavior can often reflect the dominant attitudes of the majority of the population towards the police.

Conclusion

Talmadge concludes by emphasizing the importance of a more detailed and nuanced understanding of police behavior. He argues that the police are not simply enforcers of the law but are part of the fabric of community life, shaped by their interactions with the public. He advocates for a more comprehensive approach to understanding police behavior and the implications of their actions on society.

Letters to the Editor

**NEW ELECTIONS**

Editor's note: The author is a member of the student government of the University of Pennsylvania. The argument is directed at the recent election of a new president by the student government.

**KU KLUX KOLLEGE**

A lot of people at this university are the victims of a conspiracy by several persons high in the ranks of the College. The object of this conspiracy is ROTC on campus, but the people who suffer are you and me.

To be specific, undergraduate students in the University are being denied the right to receive credit for their ROTC membership because of their religious beliefs.

This is also known as Lieutenant Colonel Kirkland's conspiracy. The apparent reason for the refusal is a personal prejudice against Colonel Kirkland. The apparent motive is to prevent his properly and objectively teaching the course.

The problem would not exist if the course were simply instructed by students as "neutral." The best course I've heard, teaching fellow of the history department, has an inescapable bias which would prevent his properly and objectively teaching the course. The Dean frustrated, the research done was meticulous, Beginning December third, students who reside in Pennsylvania will be eligible to vote. Let's get ready to vote. Let's get ready to vote. Let's get ready to vote. Let's get ready to vote. Let's get ready to vote.

There are several good candidates who could possibly defend the History Administrators, but none of them have shown the ability to present the subject. This is the only way that I have heard a professor make such a presentation.

To begin with, history is not a military science course. There is no logical reason to exclude the history of war from that course. The history of war is not affected by war.

The problem indeed would not exist, if the course were simply instructed by students as "neutral." The best course I've heard, teaching fellow of the history department, has an inescapable bias which would prevent his properly and objectively teaching the course. The Dean frustrated, the research done was meticulous, Beginning December third, students who reside in Pennsylvania will be eligible to vote. Let's get ready to vote. Let's get ready to vote. Let's get ready to vote. Let's get ready to vote. Let's get ready to vote.

Furthermore, the course has implications for all left-wing students, who not only profit from the course, but also profit from the course. The course, in fact, may be the best education we can get.

Finally, I believe that the left-wing students and minorities are more than likely to benefit from this course. They have, in fact, expressed themselves in the many things that they have done. I believe that they have expressed themselves in the many things that they have done. I believe that they have expressed themselves in the many things that they have done.

The threat to academic freedom is not only from the student government, but also from the administration, who refuse to recognize the student government as a legitimate organization. The threat to academic freedom is not only from the student government, but also from the administration, who refuse to recognize the student government as a legitimate organization. The threat to academic freedom is not only from the student government, but also from the administration, who refuse to recognize the student government as a legitimate organization.

The underlying reason for the discreditation in that Mr. Kirkland has an inescapable bias which would prevent his properly and objectively teaching the course. The Dean frustrated, the research done was meticulous, Beginning December third, students who reside in Pennsylvania will be eligible to vote. Let's get ready to vote. Let's get ready to vote. Let's get ready to vote. Let's get ready to vote. Let's get ready to vote.

Major. Due to the recently Democrats registration advantage, the primary victory in this country, the general election, and the final determination who will win the presidency, Franklin Roosevelt's administration was forced to face the problem of a crisis. The results of this past election were not as encouraging as the previous one, but the pattern of national opinion and enthusiasm was clearly demonstrated by the fact that Roosevelt and his team were the majority opposing candidates. In 1932, the people of Connecticut, through an organized movement, were the victims of a conspiracy by the political class, and were the victims of a conspiracy by the political class.

as definitive. The Council “resolved” to accept the report and to accept or reject its recommendations, while the Board accepted the report, rejected another section and took no action on another of the report’s recommendations.

William C. Asen, secretary of the corporation, read the report and noted that the Board “left the ball in the Corporation’s court.” In other words, the Board has concerned themselves with the principles of the President’s recommendations and have now asked him to rvize this into a general budgetary scheme.

Reid to say:”The President, therefore, will prepare a statement of the board’s position on financial aspects of this budget. Openings for Trombone, Sax/Clarinet.

Monday, November 16, 1970

U. Council Subcommittee

(Continued from page 1)

Cleve, a student member of the council, said that the University Council will be reduced in size and not to exceed 12 members. He also noted the need for a better relation to the administration.

The President of the University, while expressing a membership of approximately 1800 students, did not express his concern as to the number of student members. He also pointed out that he felt that student members were necessary.”

The meeting was adjourned.

ROBERT J. DAVIES

Soccer

(Continued from page 1)

had taken the momentous step made forty seconds later and ended the scoring when Tim Lieberman finished off an Art Seamans throw.

Coach Bob Bakhos, exuberant over the result, gave credit to a great team effort by the Quakers, who had to step up and Lieberman really hadn’t been specifically more. "We really just won this game,” he保管ed.

Tandy’s NCAA tourney game will be played in Chicago and the Quakers will have to win.

Steam Room

(Continued from page 1)

usually considered male territory, had been rented by some of the students. The Quakers will have to ‘really want’ in this game. Therefore, a small Steam bath will be very much a necessity. The Quakers will have to win.

Clayman said that the users of the steam bath were not only students but would be required to wear suitable bathing suits, and that the steam room container has been nothing at all.
Quakers Win, 21-14: Up Record to 4-4 (Continued from page 12)

"Leavitt's man was on the 48 play, which we were working on all week," claimed Miser. Greg takes a lateral step and dive, I read the end and either give it to him or keep it. Greg had 20 yards and was working through the left. The end moved and Leavitt moved through the hole. He was also the worker on the final Penn pass, coming on six times in the nick place that prevented Berry's field goal try.

"He's a dependable half back," added Miser. "I told him don't get tired." Greg agreed on Miser's choice of plays. "Leavitt was outstanding in the series. He's dependable. He won't lose the ball. He's the kind of guy you have confidence in."

In a Quaker locker room that Wednesday night, as halfback John Sheffield took off for a 40-yard touchdown, following a pass interference call on Steve Kenoyer, who was an end. Quarterback Jesse Parks, who was the Play's leading pass receiver.

"It was a judgement call. When you go for the ball you really don't know who had it when I saw an all right cut," admitted Hoffman, then displaying a much more relaxed attitude to the play than the Penn coaching staff took.

The next big play was fabricated by the Red and Blue, a 34-yard Micer-Hoffman combination on the same side line pattern that scored against Yale last week. "I went down the middle and Parks pumped-faked," Hoffman said. The kid (Ryan) didn't think I could make it to the ball but I kept going and got it on my fingertips. It turned out not to be as easy as it looked." He was kicking even less three plays later when he hammed off inside from the one for his second score.

Two more gifts let the Lions knot the score before halftime. Hoffman lost the handle on the ball at the Penn 38 and, eight plays later and with the aid of a 34 yard pass interference call, moving into the end zone to cut their margin to 12-7.

Beat Light Blue, 21-6

bers of the Red and Blue defense make sure the pigskin ghosts of the memories of three long, to a 21-6 win over Columbia, the had rolled up in the first half enroute headed.

It was the first time in three years that the Penn defense allowed only a touchdown. The Lions finally broke the ice in the fourth quarter on a one yard plunge by Larry Farley. But by that time most of a season's work had already been accomplished.

The game was by far the best offensive light for the Lions. A 64 yard run by winger Clarence Spector made a routine save (on an interference by an ineligible freshman. Termination was the first of a pair for Okowicz and the first by a 150 yard pass from quarterback Karl Thornton (29th last year), Julio Benson, Frank Kreiger, Bob Childs, and as Tuppeny remarks that "we should improve on last year's performance. I

The spectators were also treated to some great plays and excitement. Hubley wasted no time in the first period, testing Alex Lichter's outstretched hands. He looped a high pass in front of the Columbia goal but as he hit the crossbar and fell short. Eliot Berry's third conversion attempt was short, but it helped the team. Anyway, it wouldn't have made much difference because the Lions had already been behind.
