S-block Residents Displaced
By Floods in High Rise East

by Maurice O'Shields

Edwin Ledwell, director of residence, reported Tuesday that approximately 42 residents of Superblock's High Rise East have been displaced as a result of two recent water pipe breaks. The first one occurring late Monday night.

This recent flooding is by no means peculiar to High Rise East. Water problems, a recurrent problem in High Rise East, reported that a water pipe broke on the southwest floor of the basement. Water level, which came in at 1:30 Tuesday evening, causing some “dancing waters” on many of the floors of the tower.

There were two water breaks, a water pipe in each of the two building. Both of the water breaks were pronounced by the water. Both of the water breaks were pronounced by the water. However, the report said that the damage done by the water was "pretty well localized" by the placement of the breaks, and hence the damage was dealt with by the emergency.

Both water breaks were caused by the rupturing of the pipes. The water was found to be coming up from the basement, and hundreds of residents below were affected. The water was found to be coming up from the basement, and hundreds of residents below were affected.

"It is the contractors' responsibility to make sure these breaks do not happen in the future," said Ledwell, assistant resident manager of High Rise East, explained.

The water then began to travel down through the first four floors, and the water caused the ceiling of room 603’s bathroom ceiling, he said. Extensive damage was caused to the building, and the water had to be eliminated from the building.

The loss in the cost of repair was estimated to be in the tens of thousands of dollars to the building. The damage done by the water was "pretty well localized" by the placement of the breaks, and hence the damage was dealt with by the emergency.

Eight Members of the “Flower City Conspiracy” Found Guilty

By United Press International.

BOCAHESTER, N.Y.- A federal jury yesterday night heard all eight members of the “Flower City Conspiracy” guilty of all charges in connection with the remarked killing of a man and woman.

The jury, however, recommended leniency.

Sentencing was scheduled for 9 A.M. Thursday. Mr. Burke told the jury in a 3-minute charge that “good motives wouldn’t justify the action if the defendants had known that the action was a violation of the law.”

Defendants in the case are John T. Burke, 25, of Penn Yan, Joe T.

The last presentation of the American Film Festival Series will be screened today at 4 and 8 P.M. in the school auditorium. “Omen: The Vows,” (1969) by J. U. Pudovkin; “Children Who Draw,” (1969) by V. I. Pudovkin. By the Documentary Film Laboratories. Don’t Miss Nite at the Film Festival! Admission free to the showing, in the school auditorium.

Penn Union Council will present “The Looking Glass War,” based on the English novel written in Wednesday evening and to be held in the main auditorium. Admission free.

The Least Lecture Series of the College and the Institute of Contemporary Art will present a lecture of John C. C. John E. P. C. at the Hillel Foundations for all people interested.

The medical field is continuously in need of diagnostic reagents. Most laboratory reagents are prepared from human plasma and the plasmids are obtained from human blood. They are used for the diagnosis and treatment of various diseases. The method of preparing these reagents is based on the separation of plasma and blood.

Medford's Merry Men in Blue Stop Rt. 70 Drug Traffic

By DON HOROWITZ
New Jersey Route 70 runs through the middle section of the Garden State, beginning just out of Philadelphia across the Benjamin Franklin Bridge. The road meanders toward the south toward Atlantic City. It is heavily traveled throughout the year, becoming especially busy during the week-long summer and week-end vacation periods. Traffic is heavy even during the winters (and they don't quit in the winter either) pulling into the state from the north.

Locals can count the number of times they have been pulled over by the New Jersey State Police, but the exact number is probably never known. You can't escape the state troopers, but according to New Jersey Attorney General George F. McFarland, the figures are low for the state as a whole, and Medford is no exception.

Medford is an island in New Jersey, but it seems to have a problem of its own. Medford is a quiet town built around an old-fashioned community college and a prosperous business district. It is surrounded by sprawling suburbs and large suburban towns. It is a residential community, but it has its problems. Police Chief Seth McCafferty says that traffic is the major problem in Medford.

The highway is heavily traveled during the summer and has yet to get its own police force. The police in Medford are from the State Police, and they are not the most popular force in the state. The Medford police department is small, and it is hard to keep it running smoothly.

Medford is not an island unto itself. Occasionally, people in other towns in the county beg to have their police department make up for Medford's lack of a police force.

However, Medford is not an island, and the people of the town are doing something about it. They are organizing to help their police department.

The town fathers are proud of their police force, and they are working to make it one of the best in the state. The police department is small, but it is doing what it can to help the town.

Medford is a quiet town, but it is not a small town. It has a population of 15,000 people, and it is growing every year. The police department is small, but it is doing what it can to help the town.

Pi Kappa Alpha Course

The main thrust of the group's objectives, however, is finding faculty members interested in serving as facilitators: obtaining the accreditation that has been promised by the University if these faculty members are found, and obtaining interested students for the various interdepartmental courses. The group is currently trying to contact the Pi Kappa Alpha Fraternity, because they claimed that the commitment of the group will be greater than to other courses.

"If you want to offer a course, that's fine," said Kpants, adding that such an offer may be lengthy and that a plan from Dr. Jo and Sa-" he continued, emphasizing the rule of the group's students in organizing it, and the hope that the experiment will serve as a basis for other interdisciplinary studies at the University. "If you want to study what the whole thing could be," continued Kpants, "but we're beginning education for a long time and now, in a nutshell, we're putting ourselves up against the wall. We have to come through."

Athena

Starting Dec. 1

During the first week in December, it's a fairly common practice to be asked to participate in a program which is designed to be "educational." This year, however, the University has decided to schedule such an event on a somewhat more expansive scale, with the aim of providing an opportunity for students to get involved in a broader range of activities. The event, which has been referred to as the "Athena Program," is scheduled to begin on December 1 and run through the middle of the month. The program is designed to provide students with an opportunity to explore various aspects of life outside the classroom, with the goal of fostering personal growth and development. The Athena Program offers a wide range of activities and opportunities for students to engage in, from athletic events to cultural events, to community service projects. The goal of the program is to encourage students to think critically about their own experiences and to consider the impact that those experiences have on others. The Athena Program is designed to provide students with the opportunity to reflect on their own values and beliefs, and to consider how those values and beliefs shape their actions. By participating in the Athena Program, students will have the opportunity to explore new ideas and perspectives, and to develop a more nuanced understanding of the world around them. The program is open to all students, regardless of their majors or interests, and is designed to be accessible to all levels of experience. Whether students are looking for a new challenge or simply want to get involved in something new, the Athena Program offers a range of options to suit their needs. By participating in the Athena Program, students will have the opportunity to learn more about themselves, to develop new skills, and to make valuable connections with others. The Athena Program is an important opportunity for students to engage in meaningful activities, and to develop the skills and knowledge that will be essential for their future success.
Frosh Face Rutgers in Afternoon Opener

Ray Caruso is as excited about the spring of his freshman coaching career that it doesn’t bother him that he doesn’t know anything about Rutgers except that the New Brunswick school goes by the nickname of the Scarlet Knights.

"I don’t know what they have. We’ve just got to play,“ claimed Caruso, who faced Pitt last year, "I don’t want until the season begins." The Big Ten campaigning gets under way this afternoon at 4 PM, at the Palestra, Admission is free.

Caruso, a former Penn basketball and basketball captain, does have a good idea about who will figure prominently in his own team’s parade.

John Antonelli, a 6-7 product of St. Joseph’s Prep, will start at the center. Also, the Big Ten post, said Caruso, will be a two-guard, with Paul Notter (5-11) and Jack Breitenbach (5-11) in the backcourt. John Antonelli (5-11) at the forward spots. Who is John Antonelli? He will be the backcourt.Bill Finger (17) and Bill Finger (17) will be the initial relief help.

Caruso, the player, and the team will find out who Rutgers has this afternoon.

BY MARVIN DASH
Quaker swimming coach George Breen, a bit more relaxed this year— but fortunately they’re the type most coach can relate to.

For instance, there is the problem of determining a lineup. In the past, such a field was in order to make sure that the lineup is as good as it can be. This year, Caruso says, he will have to "swell" the list of potential candidates to a dozen or more. If he had time to think about it, he would have to think about it. This year’s squad is composed of 29 candidates. Eight of the 14 were high school All Americans, 12 are All Americans of high school, 14 are All Americans of high school.

"This year’s squad is composed of 35 members, including in swimmers from the past three years' regular teams. Eight of the 14 were high school All Americans, 12 are All Americans of high school, 14 are All Americans of high school.

ENTRY LINES

The six meets we lost last year were to Big Ten teams, women’s teams, and men’s teams. Against the six me"
