Grad Job Market Remains Unsteady

By ROBERT KOTZEN

Seniors beware — "The major corporations are not hiring students who are graduating today," the University's director of placement declared Tuesday.

But according to a counselor at the Placement Service, fewer students abstracted their degree, but because they are directed," Peggy Dornisch, a placement counselor, added. However, she admitted, "There are quite a few students who are graduating this year who are interested in corporate placements.

Lehter explained that these job opportunities for B.S.a are in sales and research, and not necessarily in teaching or major-related research.

Fields in which placement is now especially difficult include commerce, advertising, publishing, and research. One area of particular concern to placement personnel is the industrial relations, where securing a job is 'a pretty much a matter of law degree,' Lehter noted.

According to placement personnel, unless a student is aiming for a teaching or major-related research position (which are currently scarce), he is probably better off with a job-related graduate degree. Lack of money is still driving many students to try to get positions with persons with only an undergraduate education.

Lehter emphasized that undergraduates in liberal arts tend to forget that corporations are looking for people to perform specific tasks. "If, which have left people in a good race, may only hire several seniors in liberal arts."

"There goes that bunch of stuff," Mitchell replied that it was 'morally palatable,' than in the past. And the issue, the "is a moral one, as it is in more morally palatable," in the past.

"The impeachment of the Senate and my own position is regarded in the war," he continued, "so I do not do something unusual like releasing the Pentagon Papers." This past summer, Gravel received wide publicity when he read portions of the papers in the Congressional Record before the Supreme Court.

Although charging that the "renegade government can no longer ignore the facts," Mitchell brought up the Birch question.

"I don't think the facts are ignored," Mitchell replied, "but the Birch question has been thoroughly investigated by the Senate.

"My feeling is that the Senate's majority was determined that the war in Vietnam will not be an issue," Bayh replied. "This is the crassest political statement I've ever heard." Far from being no longer an issue, he said, the war is "as immortal as the moon, it is a more politically palatable," than in the past.

CHINESE ABORT MILITARY COUP
WASHINGTON - Chairman Mao Tse-Tung and Premier CHEN SHI HU have repudiated the last vestiges of a military coup and are now preparing for the restoration of constitutional civil rights law. In another case, the court refused to review a lower court decision that airlines could not limit the job of flight attendants to women only.

NIXON LAUNCHES CAMPAIGN
WASHINGTON - President Nixon launched his all American campaign for re-election Tuesday night, pledging peace and prosperity during a speech in New York City at the first of two 6,000-seat fund raising dinners. Speaking to the wealthy New York Republicans, Nixon declared that he would be the "property without inflammation and full employment without war."

The ROTC Question

The members of University Council will gather today to vote on proposals that have, at times, been widely discussed and, hopefully, will complete their consideration of the propriety of ROTC on the Pennsylvania campus. Council's Steering Committee - rather than placing a single proposal on ROTC before Council - has wisely chosen to propose three very different resolutions for that body's consideration, a decision in the hope that Council's final recommendation on the ROTC question will approximate one of these proposals. Fortunately, we cannot agree with any of the three Steering Committee proposals as they presently stand.

Steering Committee's first alternative proposal amounts to a blanket acceptance of the Toiubec submitted "working" hypothesis that ROTC should be retained at the University "in the event that the changes required for the satisfactory functioning of ROTC on the University campus."

Steering's third proposal - which calls on the faculties of the various schools to deprive campus. Council's Steering Committee - rather than the Steering Committee's first resolution outright Dwyer subcommittee's "working" hypothesis that propriety of ROTC's presence on the Pennsylvania at the University will remain - essentially - un-

Proposal amounts to a blanket acceptance of the stand

Job Offers

(edited from page 3)

"How can I get a job?" asked the student with the largest number of job offers, "I apply for everything and yet I never hear back from anyone." The student was Driver Davis, a liberal arts major. "I've tried everything," he added. "I've tried writing letters, filling out forms, and even going door to door. But nothing seems to work."

The DP Troubleshooter, in an attempt to help this student and others like him, has come up with a few suggestions. The first is to be patient. "It takes time," he said. "You can't expect to get a job immediately."

The second tip is to be specific. "Instead of applying for everything," he advised, "focus on one or two areas that you think you might be interested in."

The third tip is to be persistent. "Don't give up," he said. "Keep trying and don't be discouraged by rejections."

The Troubleshooter also recommended that students take advantage of the resources available to them on campus. "There are a lot of places on campus where you can get help," he said. "The Placement Service, the Career Services Office, and the University's own job placement service all offer valuable resources."
More activities were organized and athletic programs at Penn had expanded. It was officially within the University family has, up until this year, been open to them, recreational activities geared specifically to the needs of the physically handicapped students. These activities, taught by Debbra Tuppeny, and anyone aware of his regimen involves a strict lights out at 10 p.m., which might make him less inclined toward late-night derggraduates.

Columbia's running team was formidable, and they were going to get you right and sleep well. No such thing.

Childrie's best move was to call on a basic rulala of English, as he had done when he talked about the competition in the Ivy League.

Elliot Rogers's life, the way he lived it, is still on enjoyment and the nature of the program, the emphasis is still on enjoyment and the development of skills rather than on teaching emotionally handicapped. In this sense, Flomenhoft, a sophomore Physical Education major, will include the Sports Center, the student swimmer's level and other exercises designed to meet the capabilities of each individual. It is given every Wednesday.

Miss Frenzen's, a native of Lenni-Nunn, who also has her Water Safety Instructors Certification, is to guide evaluation forms, they are available in the SCUE office.
