Meyerson Picks New Development Comm. Members

By JIM KADY

President Meyerson announced Monday the appointment of 13 faculty members and four students to the new University Committee on Minority Group Affairs.

The appointments were made by Meyerson with the advice of the University Council Steering Committee. The Senate Advisory Committee will also nominate additional members, subject to the President's approval.

The following faculty members have been appointed:

- Dr. Barbara Sher, associate professor of sociology
- Dr. Stephen Bolen, professor of political science
- Dr. Otis Springer, director of the Center for Multicultural Affairs

Other faculty members named are:
- Professor William Halpern, professor of economics
- Professor Richard Rose, professor of political science
- Professor Jean Richey, professor of psychology
- Professor John Tuma, professor of electrical engineering
- Professor John Waddell, professor of chemical engineering
- Professor John Kelly, professor of education
- Professor John F. Benson, professor of business administration
- Professor John O'Neill, professor of history
- Professor John S. R. Jones, professor of biology
- Professor John H. W. Brown, professor of philosophy
- Professor John W. Wilson, professor of English
- Professor John D. Chase, professor of economics
- Professor John F. H. Jones, professor of English

The commission, which Meyerson called "a vital new entity," is charged with making recommendations to the university on the "current state of discrimination in our University and its effect on the sense of community among minority students."

The appointment of new members to the commission will take place under the supervision of the University Council Steering Committee (UCSC).

A third group of students, including representatives of the College Student Government Association and the Student Association for Minority Issues, is also being named to the commission.

The appointments will serve under the leadership of the University Council Steering Committee (UCSC), Robert H. Droot, Jr., director of the University Council for Urban Studies (UCUF), and John A. Smagorinsky, director of the University Council for Urban Planning (UCUP), both named by Meyerson January 1.

At the Saturday meeting, Dyson asserted, "We see no mandate for a coeducation policy. The policy positions of the major committees and communities are divergent.

"We are consulting with the student body and the campus community. Commenting on the student's role in the decision-making process, student member Kelly said she and the three core committee members believe the commission "will be quite active in the selection and sponsorship of students."
MCGOVERN PROPOSES NEW PLAN
WASHINGTON—South Dakota Senator George McGovern called on President Nixon Monday to halt all American involvement in South Vietnam by May 15 as a way to save the G.O.P. in the November elections. Despite the president's proposals of "comity and coöperation" and "sable" relations with the Viet Cong, McGovern said, Nixon is "too late and too little." McGovern's proposal of "continually aiding and abettings the com- munist forces" would "force the Chinese to become involved," he said. The Senator, a staunch anticommunist, added: "President Nixon has no moral, political or constitutional authority to sanction or sanction the Chinese National Front in any way."

MEIR OFFERS SUEZ REOPENING
TEL AVIV—Prime Minister Golda Meir has called for an "all out effort" to open Suez to traffic. She said the closure of the vital waterway was "illegal and indefensible." Meir, who has been under heavy pressure from dope carriers, added: "We have to do everything we can to reopen Suez." She added that "if we don't, we will be held responsible for what happens." The Prime Minister also said that "if the Egyptians want to close it, they are free to do so." However, she added, "we will not accept their legal rights to do so." She concluded: "We are not going to give up Suez. We will fight for it."

SENATE OK'S DOCK ARBITRATION
WASHINGTON—The Senate Labor Committee Monday approved legislation to end the 10-day-old dock strike. The bill, S. 4305, was passed by a 22-7 vote. Senator John T. 18, of California, who is chairman of the committee, said: "This is a very important bill. It will help end the strike and bring about a peaceful solution." The bill would establish a three-man arbitration panel to settle disputes between the shipowners and the dockworkers. The panel would have the power to award damages and other relief.

Buckley to Go to China
WASHINGTON—The House Judiciary Committee Monday approved a bill to permit the U.S. to send a delegation to China. The bill, H.R. 10215, was approved by a 22-7 vote. The bill would allow the delegation to go to China for a period of up to 90 days. The delegation would be composed of members of the House and Senate from both parties. The bill was introduced by Representative John E. Hugo, a Democrat from Michigan.

Diet Pils May Be Banmed
WASHINGTON—Food and Drug Administration Commissioner Charles C. Russell said today that the agency is considering banning diet pills. Russell said that diet pills may be "a danger to public health" and that the agency is considering "all possibilities." He said that the agency is "considering all aspects of the matter" and that "we will make a decision when we have sufficient information." Russell added that "we will not make a decision without all the facts."

Very few responsibilities are delineated for the coeds, leaving the house as a family rather than as a club or a fraternity. The two members have assumed the way of a family, a change which some fraternity members have said they were disappointed to hear. The move comes as an interdependence which has led to "a slowed down" and "a..."

Seventy, Theta Rho, and Sammy have all borrowed from "an idea developing all over the place," in inter-fraternity council president Roger Dumont's words. But from that point, each seems to be heading in a different direction. Theta Rho has become a family, Sammy retains a loose, informal club-like atmosphere, and Sammy, according to Macneil, will continue to emphasize its fraternity heritage.

The Rho, however, seems to be heading in a different direction. Theta Rho has become a family, Sammy retains a loose, informal club-like atmosphere, and Sammy, according to Macneil, will continue to emphasize its fraternity heritage.

**Nader's Raiding**

Ralph Nader never made it to the great youth bulwark of the universities. He ended up at the University of Chicago, and to the best of anyone's knowledge, he has never had the Pan Am tower over his head. Nor, it would seem, ever been under one.

Yet the nation's rivers and billowing sulfur fumes into the atmosphere are his concern. Without Nader's persistence and commitment to doing the dirty work that goes into bargaining battles, the ecology movement might never have begun to move.

Other achievements? Nader urged airline companies to have separate seating sections for those who needed and those who didn't. Even then, however. Bush Brown in court for advertising that their product "Build Strong Bodies in Twelve Ways." Upon investigation, Nader could not find five ways that Wonder was a wonder. Having enough evidence in his mind to justify a suit. Not many. So he had no credibility. It looks bad for "buil..."

Through the years, Nader has refused to involve himself in political politics and American politics. Any move to put him into public office. He has been endorsed by President Nixon and been endorsed by countless other. A recent book he offered before she turned 11 million television persons who said they were all right. That Nader always seems to appear in the same dress and that this dress is a regular silhouette. A recent incident in a field specialty on just what Nader does is to show how he is having time for any kind of a show.

Nader pressed General Motors on automobile safety and as a result there are now much stricter safety regulations. Thousands of automobiles which were unsafe have been recalled at Nader's insistence.

The nation's rivers and billowing sulfur fumes into the atmosphere are his concern. Without Nader's persistence and commitment to doing the dirty work that goes into bargaining battles, the ecology movement might never have begun to move.

**The Faculty and Myer's Reformers**

By SCOTT GIBSON

Underlying the University's obvious problems of overcrowded classes and academic programs will generate a renewed interest in the University's obvious problems of overcrowded classes and academic programs will generate a renewed interest in the University. The University's obvious problems of overcrowded classes and academic programs will generate a renewed interest in the University. The University's obvious problems of overcrowded classes and academic programs will generate a renewed interest in the University. The University's obvious problems of overcrowded classes and academic programs will generate a renewed interest in the University.

Although the "pilot" approach is designed to replace or supersede new programs  and streamlining tandem with existing groups in various departments internally. Department programs regardless of their academic programs will generate a renewed interest in the University's obvious problems of overcrowded classes and academic programs will generate a renewed interest in the University.

Bob Meyerson, Big Ten athletic director, would consider changing the program. The membership of the new commission would then solicit ideas and programs from the faculty. If the faculty fail to come up with a more acceptable way to govern the institution. An investigation of class size we feel would be able to create a number of frontiers in research and teaching.

"Ya know I'm really disgusted. The freshmen and sophomore students are the last hope for keeping the sense of community when we meet. "Isn't it true that you're the one who first came up with the idea of creating the committee?" I asked.

"Sure. That's why I've always been a part of the committee," he said. "It was my idea to start something new."

"Yes, but what is the committee aiming to achieve?" I asked.

"The committee is aiming to create a more inclusive and diverse campus environment," he replied. "We want to ensure that all students, regardless of their background, feel welcomed and included on campus."

"And how do you plan to achieve this?" I asked.

"We plan to hold workshops, seminars, and discussions to raise awareness about diversity issues and to provide a platform for students to share their experiences and perspectives," he said. "We also plan to work with the administration to implement policy changes that promote inclusivity and equity."
Let them register next thing you know they'll be voting.

In case you haven't heard, this is the first time people under 21 can vote. Let them register, next thing you know they'll be voting. And you know what that means.

If all of them go out to vote, then all of us would have to go out and vote, too. So I urge all of us over 21 to keep all of them under 21 from registering. If they don't register they can't vote. We've got to keep them busy on registration days. Send them to clean up their rooms. Then lock them in. Have them take out the garbage. To the city dump. Take them to a peace March. In Washington. We waited till we were 21 to vote. Why shouldn't they? After all, if kids were meant to vote, wouldn't they have been born sooner?

TOMORROW WILL BE YOUR ONLY CHANCE to register without going down to City Hall. Registrars will sit at The Catto School, 42nd & Ludlow, and at the Health Center, 43rd st. one block below Baltimore Ave. from 3:30 to 9:30 pm. Vans and cars will be available from the campus.

**Nixon Trip to China Sparku. Inteest**

**By Ed Silverman**

President Nixon's trip to Peking succeeded in accomplishing its goal - a dramatic rise in enrollment in Chinese-related courses at the University.

The Daily Pennsylvanian has been told that there were so many students enrolling in Chinese classes that seats in some sections are filled to the ceiling.

Dr. W. Alyn Rickett, associate vice president for academic affairs, said that the University was "surprised and pleased" by the rise in enrollment.

Thrill Lover: Blair Hopes to Ride Pole to New High, Trip Abroad

By RICK FURELING

It's been said that Penz's five poledriver positions were placed in a straight line, and a passerby was asked to rush to the50-yard line, then rush to the 100-yard line, and then rush to the 150-yard line. The passerby placed the bottom of the list. But on the saying goes, luck can be deceiving. For our purposes, we'll say it's been a green flag for the past three months. The weather has been good. The storms have been behind us and the telephone is ringing.

A sport that's fun and full of excitement is skating. The boys make up a solid core that's been skating for a long time. Skating started through the backyard and has expanded to include the backyard and the ice rink.

That's what it means to have a hero. Then there's what happens when you have a hero.

I'm an alpine skier. When a season ends, it's time to start building for next season. Here's how to get started:

1. Find a place to ski. There are places like Sugarbush, Okemo, and Stratton that give lower-level programs.

2. Get equipment. You can rent equipment at many ski shops. Make sure to get a quality pair of skis and bindings.

3. Take lessons. Winter ski schools are a great way to learn the basics of skiing, such as balance, weight transfer, and how to stop.

4. Practice. Practice makes perfect. Spend as much time on the slopes as possible.

5. Be safe. Always wear a helmet and protective gear.

6. Have fun! Skiing is a great way to enjoy the outdoors and connect with friends and family.

By BOBBY JAMES

Enthusiasts and high spirits characterize Penz's winter scene. It's a time when everyone is as happy as can be. The weather is mild and the snow has come. People are excited to get out and enjoy the outdoors.

The season is drawing to a close, but there are still many events to look forward to. Penz's winter season is one of the best in the world this year.

You can't pinpoint the exact cause for such a drastic improvement. "It's hard to say," says the former coach. "I think our training camp was at the center of it. We've been able to change our approach and change the way we practice."

In addition, the weather has been perfect and our team has had a lot of energy through the season so far."

It has been for his flying rabbits in Kentucky. The photographer has received many of his photos recently. "I haven't touched my camera in over a year and although I hadn't realized it, I felt my gymnastics helped polish my skills with strength and agility."

"It's really weird," he says. "I feel like I didn't switch over to new media until I got used to it."

The team's athlete, Blair, is one of the most talented and experienced in the world. In mid-December six blacks boycotted the team. It's really weird."

"I would say that our whole situation is merely a series of unfortunate events," he says. "It's really weird."

"I hope that we can all look back on this season and say that we've grown as a team. It's been a tough season for us, but we've learned a lot."

"I am glad that we have been able to put our differences aside and work together. It's been a challenging season, but we've come out stronger than ever."

The season is coming to an end, but the memories will last a lifetime. Thanks to everyone who supported us this year. We look forward to next season and all the memories it will bring.
