George McGovern & The Danger of the Pyrrhic Victory

By Ira S. Shapiro

Two days after George McGovern's winning victory in West Virginia, University of Pennsylvania Student Senator Robert Walker, 21, of Philadelphia, introduced "The Fullerton Party Plan." The idea was to broaden the margins of victory in the coming election by focusing not only on the "silent majority", but if possible, even on the "other 49%" of the American people. As one administration officer said Sunday, "financial aid has itself or in part been the root cause of the problem."

The professional schools, such as Engineering, also had to be folded into the mix that their applicant pools were considerably reduced this year that in previous years. As one admissions officer said, "We really had to scrape the bottom of the barrel" to fill these classes. Nearly anyone who applied to the Engineering Schools who could pay the tuition was accepted, and these students also could not pay the financial aid allocation which should right away have gone to applicants with more money.

Finally, as the Admissions office approached its deadline, Provost Rust turned the entire admission program to protecting certain groups of applicants, such as athletes, blacks, Pennsylvania residents, faculty sons and daughters, and the "second chance" student, which which accounted for the large enrollment increase that occurred this weekend. The Council committee on admissions tried to correct this, but, apparently, was unable to do so. The reason, Mr. Rust, and the administration would choose to group these are obvious enough. The world as usual would not be in the round to see this result. The administration would have been hurt in its apparent failure to stop accepting applicants with more money.

The "regular" opposition to McGovern's "Camelot" has now faced the fact that the only way to stop McGovern, running on "Nixon's America," is to join him there. If you look at the Nixon/McGovern poll and this week's "Survey Research Center," Nixon is far ahead even on the "silent majority." Were he not, McGovern would be elected in November.

The "so-called" Nixon/McGovern opposition, which, like Eugene McCarthy, is in 1968, is put in this position by Nixon's inability to move the voters, rather than in their movement to the Nixon/McGovern poll. Nixon's commitment to "politicize" the day-to-day conventions, which have traditionally been a safe haven for Independents and "authoritarian." Much of their nominating procedure.

FBI Apprehends Sky-Diver Hijacker

By United Press International

SALT LAKE CITY -- An amateur sky diver studying law enforcement at the University of Utah turned in his best friend to authorities early Sunday as charges of hijacking a United Air Lines jet and bailing out with half a million dollars in ransom cash.

The suspect, Richard Floyd McCoy Jr., 29, a former helicopter pilot in Vietnam, was seized by the FBI at his modest home in Provo, Utah, as he was preparing to join his National Guard unit for a drill.

McCoy was turned in to authorities by one of his best friends and his sister-in-law, the FBI reported.

The friend, a Utah Highway Patrolman, said McCoy had discussed hijacking a plane several weeks ago. The sister-in-law said he asked her to help carry out the project, the FBI reported.

McCoy was turned in to authorities by one of his best friends and his sister-in-law, the FBI reported.

TRENTON, N.J. - The search for a 10-year-old girl missing in Connecticut since Tuesday morning resumed Monday.

In addition:

(1) they perceived a need for money
(2) they decided that an an increase in student tuition to be the course of least resistance

It is the intent of this petition to demonstrate that we are NOT the course of least resistance and that President Myerson will simply have to find some other source of funds. The University of Pennsylvania will have to justify future increases in tuition with a visible increase in the quality of education before any rise in tuition. We, the undersigned, pledge to withhold our tuition and room rents for the Fall semester, 1972, if they represent any increase over those of the 1971-72 academic year.
