Library Budget A voids Cuts in Book Purchases

Van Pelt Library, due to stringent containing and careful budgeting, will be able to carry out the plan throughout the rest of this fiscal year.

In 1971, when University budget cuts forced a 10 percent cutback in book purchases in March, Van Pelt Library had no problems with regular periodic or publication orders, according to assistant director Bernard Ford said that "nothing happened again."

Ford noted that departmental spending cuts and postponed purchases in book purchases in stringent fixed dedication. Natural sciences and similar subjects are particularly vulnerable.

"We have cut back all the time but have never cut back," Ford has pointed out. The library has spent a great deal of its time on organizing and scheduling, including the O.K. University's publications and other material which was not cut back at all. The library has now reached the point where its collection is being improved.

Despite the province of this, Ford said that the library's collection is a very large one, especially the collection of rare and special materials. This year, the library has been authorized to purchase all the books that needed to be purchased.

"We are not going to do anything to cut back," Ford said, "but we will do things that are not cut back in the usual way."
Lillian Hellman
To Speak Today

By SHELLEY FRANCA

Even when it achieves technical perfection, University theater is almost always lacking one professional element—contact with the playwright. Student theater is usually amateur theater, whether the playwright is Shakespeare or Edward Albee, so it utilizes a student audience, people who are still in the process of learning. This heady, heady experience has no direct way of having the playwright relate to it or to the audience. Even in a preparatory solution to this problem, Lillian Hellman, one of the foremost playwrights of this century, will speak tonight at 4:00 P.M. in the new auditorium on the University campus, 2211 Locust Walk, and will answer questions. Hellman, a graduate of the University, has been working and studying in Israel. Departure: October 27, 1972.

The BSR 810 offers an impressive group of design innovations that promise to move the company to new levels of transcriptions. . . . and for the audiophiles who works in sophisticated electronics equipment for the home, the BSR 810 is the instrument of choice. . . .

TAMPA, Fla. — Magnetic tape recorders will soon share their job and get a little help from robots. University of South Florida computer scientist Prof. Norman R. Smith said today that the new robots will work with the磁带 recorders.

“It’s a good and important step,” Smith said. “It’s a good step for the future.” He added that the robots will be able to handle various tasks, such as moving the tape recorders from one place to another.

Smith said that the robots will be able to handle the tape recorders in a variety of ways, including moving them from one place to another.

He said that the robots will be able to move the tape recorders from one place to another, and that they will be able to move them in different directions, depending on the location of the tape recorders.

Smith said that the robots will be able to move the tape recorders in a variety of ways, including moving them from one place to another in different directions, depending on the location of the tape recorders.

Smith said that the robots will be able to move the tape recorders in a variety of ways, including moving them from one place to another in different directions, depending on the location of the tape recorders.

THE COLLEGE OF THEMATIC STUDIES FOR SPRING 1973

Topic IV: WOMEN'S STUDIES

The recent expansion of consciousness regarding women has led to the realization that the factual material and theoretical constructs underlying academic disciplines are biased and limited by their neglect of the feminine study of women. Analyze based upon partial information is inadequate and must now be corrected. Penn's Women's Studies Planners (WSP) proposes that this past neglect be corrected through research and teaching. We see the Women's Studies theme as a pilot project, the success and viability of which may determine the kind of permanent, interdisciplinary women's studies program to be established at Penn.

We wish to increase our awareness of the role and status of women through an identification of the factors that assign us to "our place" and keep us there. These factors will be explored within the framework of existing academic disciplines, i.e., biology, sociology, psychology, economics, etc. In the Women's Studies theme we want also to emphasize the personal/subjective/experiential aspect of Women's Studies. A significant goal of this theme is the realization of social change within the classroom and through the classroom experience. The individual change accompanying this experience can result in increased self-confidence and self-esteem. The collective nature of this experience can foster ideas of how social change is brought about through collective endeavor.

The College of Thematic Studies (CTS), one of the newest educational programs to be offered at Penn, was created especially for freshmen and sophomores in order to provide an educational environment in which the integration of learning in the rule and not the exception. CTS offers small seminars of no more than 15 students where participants are brought together through a common commitment to an intellectual venture and where faculty/student contact is maximized and flexibility is the keynote. The seminars are supplemented in various ways by independent study, field trips, guest speakers, and a CTS library.

Registration will take place during the week of November 6. Students will sign up for two seminars and an independent study. For general information about CTS call Jan Bell at 594-7231 and for specific information about the Women's Studies theme call Cynthia Secor at 594-8603.

WS001 WOMEN: SOCIOLOGICAL PERSPECTIVES, Ann Bos (Sociology) Thurs. 9 - 11
This course will focus on several sociological theories of the nature of social change and the application of these theories to the changing status of women in American society. This analysis will take into consideration the social structural, cultural, and psychological factors which have shaped the position of women in this society and the development of the women's movement.

WS002 PSYCHOLOGY OF WOMEN, Susan Brooks-Worley (Education) Wed. 3 - 5
This seminar will focus on various psychological theories and processes which deal with women. Sex-role development and child-rearing practices will be stressed with consideration of outcomes and alternatives. Attention will be given to the self-esteem and motivation of women. The question of whether or not knowledge gained from psychology can aid in the process of altering sex stereotypes, aspirations, attitudes, and roles of women in our society.

WS003 WOMEN IN ASIAN SOCIETIES, Priscilla Chong (History) Tues. 2 - 4
This course is an exploration of the cultural and historical diversity of social organizations in Asia comparing societal structures in China, Japan, India, Southeast Asia, and matriarchal societies in the Near East. An examination will be made of the different roles a particular social organization imposes on its members with emphasis on women. This will then be contrasted to the present role of women in American society.

WS004 FEMINIST THOUGHT, Cynthia Secor (English) Wed. 1 - 3
We will discuss the lives and writings of feminists giving particular attention to the way in which their particular insights were generated and justified by the circumstances of their lives.

WS005 WOMEN IN CHINESE LITERATURE, T'ou-yi Qu (Oriental Studies) Mon. 9 - 11
This course will include an historical examination of the role of women as agents of social change and a focus on opportunities for self-realization in current movements for social reform, co-existing with performing the homemaker role. Rewards, difficulties, and advantages of the change agent role will be noted, as well as the principles and methods of planned social change.

WS006 PSYCHOLOGICAL HISTORY OF WOMEN AND THE FAMILY, Carroll Smith-Rosenberg (History/Psychology) Tues. 9 - 11
This course will examine the history of women in the 16th and 19th centuries in the United States. Principal emphasis will be placed upon psychological and sociological approaches. After examining various behavioral science models, the students will explore their usefulness in interpreting the sociobiography of women and what we know of the family and domestic communication networks.

WS007 WOMEN AND THE LAW, Sharon L. Vala (Law) Mon. 10 - 12
The history and current status of the law relating to women's rights, and the dynamics of change through court action and the political process.

WS008 WOMEN AND FILM, Sandra Grilizakes (Anthropology) Thursday 3 - 5
Emphasis will be placed on the importance played by the media in the socialization process and on how the creative work of women and men reflect this influence. A full schedule of films by women will be screened and discussed with particular attention to the treatment of certain basic themes and the way in which women perceive these from men.

WS009 WOMEN AND LANGUAGE, Lynette Hirschman (Linguistics) Thurs. 1 - 3
This course will examine the role of language as a social institution and women's place in society will be dealt with: how language reflects the status of women; and how linguistic behavior (on the part of both men and women) perpetuates women's inferior status in society.

WS10 THE ECOLOGY OF WOMEN, Eileen and Ingrid Gersh (Animal Biology), Ingrid Waldron (Biology) Tues. 7 - 9
This course will focus on the biology of women from the point of view of genetics, anatomy, physiology, and behavior.

WS11 TWO ROLES: WIFE AND SOCIAL REFORMER, Martha Lowell (Human Resources Center) Wed. 1 - 3
The course will include a historical examination of the role of women as agents of social change and a focus on opportunities for self-realization in current movements for social reform, co-existing with performing the homemaker role. Rewards, difficulties, and advantages of the change agent role will be noted, as well as the principles and methods of planned social change.

WS12 WOMEN IN ECONOMIC AND DEMOGRAPHIC PERSPECTIVE, Eliza J. Bollers (Economic History) Wed. 10 - 12
This seminar will focus on the changes over time in important economic and demographic factors and the ways in which these changes have affected women's lives. Among the topics examined will be: birth rates, death rates, marriage patterns, contraception, employment, women's production in the home, women's role in economic development, and women in socialist economies. Interrelations between these factors will be analyzed.

U. Blood Donor Club Needs Additional Blood

By OLIVIA SHERIDAN

At this time the University Student Blood Donor Club is 160 units short of their blood quota for this time last year. Only ten percent of the student enrollment (including graduate students) have donated blood, according to club member Georgie Arader. Donations are taken from anyone over age 18 and weighing more than 100 pounds. Each potential donor is carefully screened by a registered nurse to secure readings on pulse, temperature, blood pressure, and blood count. All the blood donated is used immediately by hospitals all over the country, most of the blood is used right at the University Hospital. HUP uses only blood donated through the student blood drives and the Red Cross instead of the commercial blood banks where the danger of hepatitis is great. Each blood donor becomes a member of the Blood Donors Club for one year following his donation. This membership makes that member, and any member of his immediate family to receive, free of charge, any amount of blood needed ranging from $5 to $100 a pint and is not covered by either Blue Cross or Blue Shield. Donors to collect blood from students are held about every two weeks during the school year in such places as Superblock, fraternities, Houston Hall the C.A., and McClelland Hall. The next drive will be held on Thursday, Nov. 16, in McClelland Hall.

Some of the best legs we know are wintering in Scholl Exercise Sandals this year.

They belong to the U.S. Ski Team, but they could belong to you. Handsome anyone cares more about legs and feet than a skier. And the Ski Team knows how Scholl Sandals relax your feet, when you want to keep going after a day on the slopes.

And Scholl's exclusive toe-grip encourages your toes to grip firmly, helping to tone and firm your legs—whether you're a skier or not. So if you'd like to get through winter in beautiful shape, put on some Scholl Sandals the way the U.S. Ski Team does.

After all, what's good enough for their legs and feet should be good enough for yours.

Scholl
exercise sandals

There never has been and never will be anyone exactly like you.

There's only one YOU. That's why Scholl Sandals are custom-made just for you. The only way to get them is to try Scholl Sandals for yourself. See if they fit and feel right for you. Why not make Scholl Sandals your trademark for better feet and legs? It's just one more way Scholl Sandals help you look your very best.

To order your free 18" x 24" poster with this advertisement, write: The Equitable, Dept. J, O.P.O. Box 1170, New York, N.Y., 10001.
The greatest attitude at which to be looking is one that looks forward to what is happening. — Coincidental Foundation

Do you use an after shave just to smell good?

If you thought after shave lotions were just to smell good, that's only half the story. After shave lotions help heal nicks and re-establish the skin's proper acid/alkali balance after a shave. (Bet you didn't know that, did you?)

But smelling nice is, after all, the nicest thing about finishing off a shave. So why not smell great?

ENGLISH LEATHER MAKES IT A LITTLE NICER TO FACE THE DAY.

Energy CTS

(Continued from page 1)

negotiate a smaller program size
with the University, he said. The
first segment of the semester will
be taught by Zandl, technology
professor R.G. Mitchell, industry
professor R.G. Mitchell, and R.G. Mitchell,
electrician engineering professor.

Each department will teach a
week-long segment. Zandl
mentioned only one week of
the course will be technologically,
and that the program requires no
scientific prerequisites.

Following this immersion into the
basic concepts of energy management,
each student will take
additional courses in the
fields of energy management,
Technology and Atomic Energy.

Although Ziegler would not say
which cabinet position he was
to fill in the eastern half of the
country, he said he had
visited Washington to discuss this
matter with the University if
necessary.

Students will then travel around
to discussions of the Tennessee Valley
Authority and several dams and strip
mines.

Zandl also commented that most
students would benefit from
studying one area exclusively for a
period of time. This is a great need for
those who can effectively articulate
a problem as well as approach it
with a solution in mind, he said.

The following day the University
is attempting to eliminate a number of
sections of the program. It recently
approved a new $2
million graduate program in the
fields of translation, transcription, analysis
and received vital information.

As an essential, but knowledge of idiomatic,
fields of translation, transcription, analysis
and receive vital information.

NSA offers you this opportunity to further
broaden your knowledge of modern language
in one studio, and to see your talents in a
challenging and rewarding career while you

Career language positions are available in the
fields of translation, transcription, analysis
and documentation. Fluency in speaking is not
essential, but knowledge of idiomatic,
colloquial and dialectal variations is desirable.

At NSA you will be joining an Agency of
national prominence—a unique civilian
organization responsible for developing
"secure" communications systems to transmit
and receive vital information.

NSA offers you this opportunity to further
broaden your knowledge of modern language
in one studio, and to see your talents in a
challenging and rewarding career while you
enjoy the broadcast. Blend benefits of Federal
salary and the opportunity to
broadcast on "The White Truth." It covers
how "Altna" works, and the many
vacancies and opportunities we have for people of
all talents.

Think about what you want from a career. It's something more than the
average, think about it.

We're not your average insurance
company.

BY MARGIE SAMPLINGER

It used to be when a student had a problem it would see his faculty adviser assigned to him as a freshman. This never seemed on close family and was merely assigned and were simply unable to give the needed guidance. Over the past few years the academic advising Program has evolved into a core of specialized personnel in the school office who handle problems relating to academics. Departments have still retained academic chairman on call to handle "major" related problems of pieces and majors. The system appears to be a much better arrangement for both students and advisors. The advisors are now available full time to students, and the amount of time is spent with students has greatly increased. The need for more full-time help was cited by advisors in both CW and the College. "There ought to be at least one person to coordinate the advising personnel," Mrs. Hartman said.

While it is difficult to divide problems into categories, the primary job of the advising service is to handle problems of an academic nature. "Within that area we advise an appointment basis but do see any student who has an emergency," Ms. Blazey said. When problems are encountered, a number of drug related and social-interpersonal problems come to the academic counseling offices. "We frequently send students to the University Health Service," Ms. Hartman said.

"It is very difficult to be inventive about thinking up new programs unless you allow the staff time to do it. In this office we have to do both advising and inventing," Ms. Hartman said. "We have to keep our heads above water and we're very, very limited in planning other activities." The need for more full-time help was cited by advisors in both CW and the College. "There ought to be at least one person to coordinate the advising personnel," Ms. Hartman said. We really need a female segment of the administration to do advising because of the lack of role models within the faculty. Especially when women are coming and the old traditions are not necessarily the ones that they will follow through. In the need for special advising, far away students are trying to follow a program fitting with post-graduate options. Group meetings could give advice on vocational placement and the proper attitudes upon entering a field.

The academic advising centers have been working隐患 with other offices and organizations in the University. "They're getting in touch with other people who give advice. We're trying to get in touch with the remedial skills office, and have setup a line of communication with the athletic department," Hartman said.
