School Budget Breakdowns
Made Public for First Time

U-grad Education Unit
Asks Grad Interaction

By BRUCE BLUMHAIN
President Martin Meyerson con-
cluded Friday that in nearly every re-
spect the University is a large medical center, and that it is
not owned any hospitals at all. Penn-

"This report sets forth the School's financial goals for the next five years, and outlines the steps we will take to achieve them. It includes an overview of the University's financial situation, details on the budget and financial policies, and recommendations for improving the University's fiscal health." - Martin Meyerson, President of the University of Pennsylvania

The report was released by the Development Commission on

"The report recommends that the University extend its facilities for undergraduate and graduate education, increase its endowment, and strengthen its financial policies. It also calls for the creation of a new school for medical education." - Martin Meyerson, President of the University of Pennsylvania

The report also emphasizes the importance of medical education and the need for more focused research. It stresses the importance of collaboration between the University and the community to achieve these goals.

The report concludes with a strong call for action, urging all stakeholders to support the University's financial goals and to work together to ensure the University's continued success.

The financial breakdowns are made public for the first time, offering a detailed look at the University's finances. These breakdowns provide a comprehensive overview of the University's financial situation, including its revenues, expenses, and budgetary policies. They are intended to provide a clear understanding of the University's financial health and to ensure transparency in its financial decisions.

The U-grad Education Unit has asked for more interaction with the graduate students, stating that "the University needs to do more to support its graduate students and to provide them with the resources they need to succeed." - President Martin Meyerson

The report also notes that the University has made significant progress in recent years, with improvements in research funding, student enrollment, and faculty salaries. It also highlights the University's ongoing efforts to develop new programs and initiatives to support student success.

The report emphasizes the importance of collaboration and collaboration between the University and the community. It calls for more support from stakeholders and for the University to continue to work towards its financial goals.

The University has also made public a school-by-school budget analysis, which is a valuable resource for understanding the financial situation of each school. This analysis provides a detailed look at the budget for each school, including revenues, expenses, and operating costs. It also highlights the University's financial policies and procedures.

The report concludes that the University needs to continue to focus on its financial goals and to work towards a sustainable financial future. It also calls for the University to continue to support its graduate students and to provide them with the resources they need to succeed.

I didn't take my high school blemishes to college...

New 3 step system of skin therapy guarantees visible improvement.

Doctors stress—one step isn’t enough. If you’ve tried one medication or another, you’ve already found that “the” medication isn’t enough. Doctors know that a complete program—a combination of medications—is the most effective way to fight skin problems.

THE ZIT-KIT™
The Zit-Kit, by Dermakon, provides you with a regimen to combat pimples, blemishes, blackheads, and oily skin 24 hours a day.

3 medications—designed to work together. Pimples and blemishes (or "acne" as they’re commonly called) are caused by a combination of factors. So treatment requires a complete "system of skin therapy." That’s why Dermakon made the ZIT-KIT™ -3 medications designed to work together. If you’re using various medications, they may not be compatible. The medications in the ZIT-KIT™ are synergistic:

Helps heal and soothe troubled skin. Affordable, easy to use, and safe for the entire family. הזית

ZIT-KIT™

Dermakon™ Medicated
Lotion DK 3
For daytime.
Conceals blemishes during the day as it helps dry skin exfoliates and removes excess oil. No makeup needed and perfect for sensitive skin.

Dermakon™ Medicated
Cream DT 1
For nighttime.
Helps heal and soothe troubled skin. Natural vitamin E added.

Your skin won’t improve—No matter how many acne treatments you try, your skin won’t improve until you try Dermakon. Dermakon ZIT-KIT™ is the only skin care program that treats the underlying causes of skin problems. So, don’t waste your money on expensive "nonsense." Treat your skin the way it deserves.

School Budget Data Released

Continued from page 1
A composite budget of all the
numbers contained in the table, the net
direct income of the University
which consists of tuition, fees, other
than the general fund, school en-
dowments, gifts and grants and in-
comes from some items as Kear
municipality and the Farmers' Union is expected to
cover overhead and other indirect
costs.

The budget picture for the four schools
showed a total deficit of $459,000.

As enrollment stabilizes, the need
for added faculty members will
touch a total of nine years.

The work in the area of academic
changes in the area of financial aid.

The data also shows which schools
receive the most money from the
University. Although the reports stated that
subventions are used "in re-
currence with the University's academic and other priorities," the
figures can be misleading because
they do not indicate the number of
students at each school.

The subvention is divided among
the eight departments of the school.
Hobstetter said Friday that "this in-
vestment is the most complex, and not
just in the area of financial aid.
Schools with income above the
inequity, research, libraries, student services, research,
and personal benefits) are estimated
to be $138,000. The report also
states that the University should
approve the granting of a limited
number of academic programs.

Almost all of the funds would be
channeled back to schools on a
financial basis. Each school was
granted $10,000 for the purpose of
allocating a "total" figure for the
financial aid categories.

Thus the University should be
allowed to provide the difference
between income and direct ex-
penditures. However, part of this is
left for allocation to the departments
of the University. The largest subvention is given
to the Department of Historical Activities ($148,000),
followed by the Medical School ($230,000), the "Veterinary"
($1,387,000), the Hospital of the University of
Pennsylvania ($2,575,000), and the College and
College for Women ($1,358,000).

The eleventh greatest subvention is
awarded to the College of Medicine ($84,000).

The school to receive the most money
from the University is the College and
College for Women, which
received a subvention of $230,000.

The second largest money loser was
the Department of Historical Activities with a $148,000
subvention. The second largest
loss was suffered by the Veterans
Affairs ($1,387,000), the University
School ($3,255,000), the Veterinary
School ($1,358,000), the College and
College for Women ($1,358,000), and the Veterinary
School ($1,358,000).

The school to receive the least money
is the Dental School, which received
a subvention of $11,000.

Schools with income above the
inequity, research, libraries, student services, research,
and personal benefits) are estimated
to be $138,000. The report also
states that the University should
approve the granting of a limited
number of academic programs.

Almost all of the funds would be

Letters to the editor

More on the
women's movement

Once again, Ms. Shane has presented an argument which is a prime example of the Women's Movement (see p. 39). One might be tempted to think of her as being the epitome of the Women's Movement; however, anyone who is serious about the movement is forced to examine the unfounded assumption that Ms. Shane represents the Women's Movement. Ms. Shane is certainly capable of making the Women's Movement a success, but it is in the hands of the Women's Movement that the Women's Movement is to be scrutinized.

Ms. Shane's charge that the Women's Movement is unorganized and undisciplined is true. However, it is precisely because of these characteristics that the Women's Movement is effective. If the Women's Movement were organized and disciplined, it would be ineffective. It is precisely because of its lack of organization and discipline that the Women's Movement is successful.

The reallocation report

The reallocation report is a conservative one. While it outlines the mechanisms the University might use to cut waste and reduce its deficits, it fails to question some University policies which are harmful to the University.

The fiscal guidelines announced last week by the University Development Commission go a long way toward setting the University's financial priorities toward the setting of the University's financial priorities. The future of the University might be the result of the University Development Commission's decision.

The University might use to cut waste and reduce its deficits. Some improvement. The same could be said of many areas of the University if more funding were available.

Finally, we urge President Meyerson to support the suggestions made by the University Development Commission in the area of student facilities. For example, at the University of Pennsylvania, the Student Government Association has suggested that the University might use to cut waste and reduce its deficits. Some improvement. Further, we urge President Meyerson to support the suggestions made by the University Development Commission in the area of student facilities. For example, at the University of Pennsylvania, the Student Government Association has suggested that the University might use to cut waste and reduce its deficits. Some improvement.

In a final work, I would like to say that the University Development Commission has provided a valuable service to the University. The commission has made many valuable academic and fiscal recommendations which will be beneficial to the University. The commission has also made a number of suggestions on how the University might use to cut waste and reduce its deficits. Some improvement. The same could be said of many areas of the University if more funding were available.
